8	Forward Work Programme	Cllr Neil Moore

	 Vale Public Services Board Forward Work	
<b>9</b>	<b>Calendar of meetings for 2017</b>  Vale of Glamorgan Public Services Board	Helen Moses
<b>10</b>	<b>Any Other Business</b>	Cllr Neil Moore
<b>11</b>	<b>Date of next Public Services Board meeting</b> 31 <sup>st</sup> January 2017	

## Vale of Glamorgan Public Services Board

### 27<sup>th</sup> September 2016

### Minutes

<b>In attendance:</b>		
<b>Name</b>	<b>Title</b>	<b>Organisation</b>
Cllr Neil Moore (NM)	Leader	Vale of Glamorgan Council
Rachel Connor (RC)	Executive Director	Glamorgan Voluntary Services
Mark Brace (MB)	Assistant Commissioner	South Wales Police and Crime Commissioner
Vaughan Jenkins (VJ)	Group Manager	South Wales Fire & Rescue Service
Gareth O'Shea (GOS)	Director of Operations (South)	Natural Resources Wales
Sharon Hopkins (SH)	Executive Director of Public Health	Cardiff and Vale University Health Board
Judith Cole (JC)	Deputy Director Reforming Local Government Programme: Finance	Welsh Government
Peter Vaughan (PV)	Chief Constable	South Wales Police
Martin Jones (MJ)	Superintendent	South Wales Police
Kay Martin (KM)	Deputy Principal	Cardiff and Vale College
Bob Tooby (BT)	Head of Operations (Cardiff and Vale)	Welsh Ambulance Trust
Rob Thomas (RT)	Managing Director	Vale of Glamorgan Council
Huw Isaac (HI)	Head of Performance and Development	Vale of Glamorgan Council
Helen Moses (HM)	Strategy and Partnership Manager	Vale of Glamorgan Council
Fran Howorth (FH)	Business Support Officer	Vale of Glamorgan Council
Lloyd Fisher (LF)	Policy Officer	Vale of Glamorgan Council
<b>In Attendance for Agenda item 4:</b>		
Simon Dovey (SD)	Assistant Catering Manager	Vale of Glamorgan Council
Rhianon Urquhart (RU)	Principal Health Promotion Specialist	Cardiff and Vale Public Health Team
<b>Apologies:</b>		
Cllr Mike Cuddy (MC)	Nominated Town and Community Council Representative	Penarth Town Council
Huw Jakeway (HJ)	Chief Fire Officer	South Wales Fire & Rescue Service
Anne Wei (AW)	Strategic Partnership and Planning Manager	Cardiff and Vale University Health Board
Peter Greenhill (PG)	Head of Local Delivery Unit	National Probation Service Wales

	Actions
<p><b>1. Welcome and Introductions</b></p> <p>NM welcomed everyone to the meeting and introductions were made.</p>	
<p><b>2. Apologies</b></p> <p>See above.</p>	
<p><b>3. Minutes of the Public Services Board 7<sup>th</sup> July 2016</b></p> <p>The minutes of the previous meeting were agreed.</p>	
<p><b>4. Food Poverty and School Holiday Enrichment Programme</b></p> <p>SD introduced the Food and Fun School Holiday Enrichment Programme. The programme was targeted at children from low income families who are more likely to experience food insecurity, family stress, social isolation and poor health during school holidays. This was a pilot project for the Vale of Glamorgan following a successful project run in Cardiff during summer 2015. The programme ran for a 3 week period in the summer school holiday, providing sports and nutritional activities 4 days a week. It was targeted at 10 and 11 year olds in the transitional year 6 and 7 school years. The programme provided breakfast and lunch for participants and work was undertaken in partnership with the Communities First team to identify 40 at risk households for the programme.</p> <p>The programme was hosted at the Bryn Hafren and Barry Comprehensive School sites with boys and girls split separately between the two sites. Due to the separation Cardiff University chose to undertake a study based on the differing experiences. As a result of agreeing to partake in the University study participants were allocated pedometers and given a £10 gift voucher. The evaluation report will be available in November.</p> <p>Participants were involved in a range of different activities, specifically receiving talks on the nutritional value of food from the Public Health Wales team. Participants were asked to undertake at least one hour of physical activity each day. This was aided in Bryn Hafren by the programme co-ordinator being the Head of Dance, culminating in a street dance workshop at the end of the 3 weeks.</p> <p>Going forward the programme is seeking further funding from the WLGA as the organisation was match funding the project. It is hoped that in the future the programme could involve additional Public Services Board members.</p> <p>The project had a slow start with just 2 pupils in each school but this was due largely to the very short timescales involved in developing the project, although the programme had been promoted on Bro Radio. The limited interest led to the programme being extended to a wider age group of seven to thirteen year olds. Parents were encouraged to join the programme every Thursday to be involved and join participants for lunch. The project involved 6<sup>th</sup> form students from Bryn Hafren and Barry Comprehensive School who volunteered to help with the</p>	

programme. Over the two weeks of the programme 196 children were involved at the Barry Comprehensive school site and 188 children involved at the Bryn Hafren Comprehensive school site. In addition, at Barry Comprehensive school 20 meals were served to parents and 18 meals to siblings over the three Thursdays. At Bryn Hafren Comprehensive school 28 meals were served to parents and 23 meals to siblings over the three Thursdays.

SD said that he would circulate the evaluation report on the programme following its release.

RU proposed that the Vale of Glamorgan catering team should be congratulated on leading the way in tackling food deprivation in school holidays. This work was undertaken as part of a wider workstream in the Vale, working towards the development of a food charter, with input from the Local Authority, Housing Associations, growers and food suppliers.

KM proposed that if the college could provide any support with facilities and buildings or the use of college chefs and football and rugby academies then it would be very willing. KM extended an invitation to SD and RU to attend a meeting on the shortage of people in the food industry.

MJ echoed the positive effect on educational attainment that programmes such as this can have and commended the Vale of Glamorgan catering team's performance. MJ proposed that future programmes could be looked at as a means to further safeguard children and would be a programme that the Police would assist with and support in the future, and an opportunity to involve Police Youth Volunteers.

Both VJ and BT echoed MJ's support and proposed that the Fire and Rescue Service and Welsh Ambulance Service could support a future programme.

RT enquired, with five Local Authorities being involved in the project, whether there was certainty that funding would be secured for next year. SD clarified that funding has not yet been confirmed and meetings were planned with the WLGA to confirm the future funding structure. RT questioned if funding were to be available whether it would be made available to all of Wales. SD explained that it is anticipated that funding will be made to the whole of Wales and for all school holiday periods.

NM proposed that the programme would provide an opportunity for the Youth Forum and Youth Cabinet to be involved and encourage wider participation in the Youth Forum.

RT stated that the power of the programme has been proven by PSB members wishing to be involved in any future programmes. There is also an opportunity to bring in additional teams from around the Council, and this could encourage the project to become self-sustaining.

Contact details for Vale of Glamorgan Catering Team and Public Health

- Symon Davey – [sdovey@valeofglamorgan.gov.uk](mailto:sdovey@valeofglamorgan.gov.uk)
- Rhianon Urquhart – [Rhianon.Urquhart@wales.nhs.uk](mailto:Rhianon.Urquhart@wales.nhs.uk)

The contact details of partners will be forwarded to the Council's catering team.	LF
<p><b>5. Community Strategy Annual Report 2015/16</b></p> <p>HI introduced the Community Strategy Annual Report which provides an update on progress against the Community Strategy and the Delivery Plan. The Community Strategy was agreed in in 2011 and includes ten priority outcomes, and the report outlines progress all of the priorities. The Delivery Plan was agreed in 2014 and focuses on tackling poverty and the Annual Report illustrates progress against the workstreams in the Delivery Plan. These will eventually be replaced by the Well-being Plan when it is published in 2018.</p> <p>This Annual Report is very much a snapshot of achievements over the year and complements the annual Core Indicators report and twice yearly Delivery Plan progress reports.</p> <p>The Community Strategy Annual Report will be replaced in the long-term by the Well-being Plan Annual Report.</p> <p>The Annual Report was agreed by the PSB and will be translated and published.</p>	HM
<p><b>6. Ageing Well Plan Progress Report</b></p> <p>HM presented the Ageing Well Plan Progress Report. The plan had been produced in 2015 at the request of the Older People's Commissioner and this is the first progress report. The plan is structured around 5 Ageing Well themes:</p> <ol style="list-style-type: none"> <li>1. Age Friendly Communities</li> <li>2. Dementia Supportive Communities</li> <li>3. Preventing Falls and Fractures</li> <li>4. Access to Employment, Education and Training</li> <li>5. Reducing Social Isolation and Loneliness</li> </ol> <p>It is likely that the plan will eventually be incorporated into the Well-being Plan.</p> <p>John Porter the Council's Older People's Strategy Co-ordinator who had drafted the Ageing Well Plan has been working with lead officers to provide updates against the Plan. This report provides a flavour of the type of work that has been undertaken as part of the older people's agenda in the Vale of Glamorgan. HM highlighted that some of the figures contained within the progress report, especially those relating to health and social care statistics, cover Cardiff and the Vale.</p> <p>HM explained that the Vale is very fortunate to have an active 50+ Forum that has been and can be used by all partners for engagement and consultation. HM provided an update against the 5 themes.</p> <p>SH asked about the baseline information that had been used to inform the plan and if progress could be reported against it to help illustrate the progress to date.</p> <p>HM agreed to include more information regarding outcomes and measurable progress in the next report.</p>	HM

<p>BT informed the Board that the Welsh Ambulance Service is piloting a community paramedic service in Llantwit Major and it would be interesting to work with John to extend the project. HM to provide John's contact details.</p>	
<p><b>7. Well-being Assessment Update</b></p> <p>HM provided the Board with an update on the progress of the Well-being Assessment and work that has been undertaken over the summer. The Let's Talk engagement has been undertaken including the Well-being Survey and various engagement activities which have occurred in parallel with the Population Needs Assessment.</p> <p>A workshop has been organised for November to work through some of the findings and draw out the key points coming through the analysis, focusing on areas where there may be scope for further analysis. HM informed the group that the Board has to consult on the assessment and it is intended that rather than a collection of raw data, that the assessment will give some direction.</p> <p>Work has been undertaken to produce a structure for the Assessment and this was presented to the Board. HM explained that the assessment is envisaged to be made up of a package of different components: a comprehensive overview document, a detailed engagement report, a detailed evidence report and a directory or database where the information has been taken from. At the November workshop the Board will have the opportunity to work through some of the key findings arising from the assessment. The draft for consultation will then be presented to the Board in December for sign off prior to consultation with the public and stakeholders.</p> <p>HM talked the Board through the engagement report. The report provided an overview of the different responses received through the engagement work from different age groups and housing sectors, and responses ranging from the importance of community spirit to problems with anti-social behaviour. A consistent response that emerged throughout the engagement process was the importance of the physical environment in contributing to overall well-being.</p> <p>FH presented the draft Healthy Lifestyle chapter to the Board as an example of how the assessment would be structured. FH explained that this is a first draft chapter and has yet to be sent to relevant stakeholders, in particular the Public Health Team, for consultation. Comments are requested from all partners to help shape the chapters.</p> <p>BT enquired whether there was scope to engage with community based forums to further shape the assessment. FH advised that 300 or so survey respondents said that they were interested in being involved in the focus groups; however, very few of these responded when invited to the focus groups organised in September. It is planned that these focus groups will now be held in the new year.</p> <p>HM explained that the assessment is being seen as a two year process and we are now starting the conversations and building that into our work. HM informed the Board that conversations with Welsh Government were demonstrating an appreciation on their part that expectations and timescales are challenging.</p>	

<p>MJ stated that it was obvious that much work has been undertaken through the Summer; in November it will be necessary to have some focus and learning shared by partners to highlight opportunities for partners to add value to the assessment.</p> <p>PV said he supported the approach being taken by the PSB and suggested that it is important to communicate to people that their views have been taken into account, and to reflect what we are doing about these views - a 'you said', 'we did' approach.</p> <p>GOS echoed PV's support for the approach and noted that it will be necessary for partners to be wary of silo-thinking, whereby partners begin pursuing their own agendas through the assessment.</p> <p>FH said that there is an awareness that many issues will be cross-cutting in nature, in particular that the environment will be reflected in many of the different sections. HM stated that it is important to note that the Well-being Plan isn't necessarily going to follow the same structure as the assessment.</p> <p>SH suggested that a great job has been done so far on the assessment and was heartened to hear partners saying the same things. It will be necessary at the November workshop to digest this work and move towards cross-cutting themes to be reflected in the Well-being Plan.</p> <p>HM noted that if the Board was broadly happy with the direction being taken, work will continue to enable meaningful discussion at the November workshop and consideration of a draft in December.</p> <p>NM advised that even after publication it is intended that the assessment be a live document and continue to be developed</p>	
<p><b>8. UHB Big Improvement Goals</b></p> <p>SH gave a presentation on the UHB BIG Improvement Goals. These have been developed to align with the work being undertaken in partnership through the PSBs in the Vale and Cardiff and are framed within the UHB 'Shaping Our Future Wellbeing Strategy'. They have been developed to help communicate key messages to staff about the UHB's goals and to bring the strategy alive.</p> <p><b>Goal 1 is 'In Hospital – Re-organise the way we use our medical beds'</b>- This is about shifting resources and ensuring that hospital beds are being occupied by those who need them. A Day of Care audit identified that 23% of patients in UHW beds do not meet the criteria for secondary care; in University Hospital Llandough the figure is 42%. A pilot approach has been developed to help test new ways of working, learn from them and improve. This involves a prototype "half ward" for those waiting for nursing or residential placements.</p> <p><b>Goal 2 is 'In Community – The perfect locality, focusing on home first'</b>- By December 2016 a 'perfect locality' will be designed in terms of what it would look like from the perspective of the community. It is important to get resources out</p>	

<p>to the community and this goal is about place-based planning, care and delivery and ensuring connectivity across services. GP services are often the cornerstone within a community and work is taking place with GP clusters across the Vale. It is also important to get the terminology right regarding community/locality/neighbourhood. In the Vale there are some energetic and forward thinking GP clusters who will be instrumental in making this happen. The perfect locality will build on existing area plans, needs assessments, cluster priorities and good practice.</p> <p><b>Goal 3 is ‘Outcomes that matter to people - reducing harm, waste and unwanted clinical variation’</b>- This is about avoiding waste and duplication. The two areas of focus for the initial pathfinders which will reduce variation and improve patient outcomes are musculoskeletal care and eye care. Detailed scopes for the pathfinders have been prepared based on benchmarking.</p> <p>SH advised that the UHB is optimistic about the pace and momentum for the goals and asked the PSB how they would like input into the BIG priorities. MJ raised the importance of befriending services and maximising the capital within our communities.</p> <p>BT was enthusiastic about the opportunities for shared learning and was keen to be involved.</p> <p>KM offered for the college to work with the UHB to help design and promote messages e.g. around the cost of wasted appointments. She referred to a successful project they had undertaken with Welsh Water regarding reducing waste.</p> <p>RT was keen to make links with preventative work and recognised the benefits for all partners if these goals are successfully delivered.</p>	
<p><b>9. “Making a Difference: Investing in Sustainable Health and Well-being for the People of Wales”</b></p> <p>SH tabled the Making a Difference Executive Summary document for discussion by the Board. SH explained that this is an evidence-based document which outlines some of the actions needed to make the biggest difference in delivering sustainable health and well-being.</p> <p>HM noted the accessible format of the Summary and suggested that a similar style may be adopted in the production of the Well-being Assessment Overview document.</p>	

<p><b>10. Social Services and Well-being Act Update</b></p> <p>SH explained that the implementation of the Social Services and Well-being Act is being overseen by the Regional Partnership Board. The suggested governance structure has been signed off; however it is worth the PSB noting that there is limited value in the two Boards working in silos to differing agendas. This is especially important in the context of the two Assessments and avoiding duplication.</p> <p>NM echoed SH's point that the agendas of the two Boards need to align and there must be an awareness by the members of both Boards of the work that is being undertaken.</p>	
<p><b>11. PSB Forward Work Programme</b></p> <p>RT advised that the Councils' Cabinet had referred a report on Youth Employment levels to the PSB for consideration. The focus of the report is the level of youth, or younger employment in public services.</p> <p>PV advised that the question of apprenticeships had also been raised at the Cardiff Public Services Board.</p> <p>KM suggested that apprenticeships offer a good way to bring in talent to an organisation; ICT apprenticeships have been particularly successful. KM stated that she would be happy to talk about the new Apprenticeship Levy at the next PSB and this would probably tie in with a discussion of the employment of young people within our organisations.</p> <p>HM suggested that this issue be included on the agenda of the Improving Opportunities Board and for the discussion to be fed back to the PSB.</p>	HM
<p><b>12. Any Other Business</b></p>	
<p>GOS explained that Natural Resources Wales are currently working on two pieces of work that will be of interest to the PSB. These will be put on the agenda for the December meeting of the group. These are the climate change risk assessment and State of Natural Resources reports.</p>	
<p><b>Date of Next Meeting</b> 15<sup>th</sup> December 2pm, Committee Room 2, Civic Offices, Barry</p> <p><b>Workshop</b> 11<sup>th</sup> November 2- 4.30 pm, Corporate Suite, Civic Offices, Barry</p>	

## **Community Strategy Delivery Plan 2014-18**

### **Progress Report - December 2016**

#### **Introduction**

The following report has been produced to update the Vale of Glamorgan Public Services Board on progress towards delivering the actions within the Community Strategy Delivery Plan 2014-18. In response to the findings of the 2013 Unified Needs Assessment it was agreed that the focus for the next phase of delivering the Community Strategy would be on tackling poverty. The Delivery Plan 2014-18 has been aligned to Welsh Government's Tackling Poverty Action Plan and encompasses three workstreams – Preventing Poverty, Helping People into Work and Mitigating the Impact of Poverty.

For each workstream, a Senior Reporting Officer and lead group has been identified to oversee delivery of the actions under the workstream. Each of the lead groups have contributed to the drafting of this document which is a twice yearly report to be presented to the PSB updating on progress throughout the course of the Delivery Plan. The reports form part of a package of performance information with progress towards delivering the overall Community Strategy continuing to be monitored through the Annual Report and an annual Core Indicators Report. This will also be supplemented by the use of [InfoBase Vale](#) as an online tool designed to keep the needs assessment 'live'. The Local Government Data Unit has also produced an [in-depth analysis of poverty across the Vale of Glamorgan](#), providing further context within which the PSB is working.

The Delivery Plan is designed to be a dynamic document which can be adapted in response to trends observed through regular progress reports. Following each progress report an updated version of the Delivery Plan is published on the PSB website pages. The PSB is asked to respond to any amendments requested under each workstream. The December 2016 update reports provide an update on the next steps identified within the previous progress report.

The Delivery Plan will continue to be implemented and monitored until the PSB agrees a Well-being Plan in 2018 however amendments may be made in response to the findings of the Well-being Assessment which will be published in 2017. In delivering the actions within the plan due regard is paid to the five ways of working and to ensuring the PSB is contributing to the national well-being goals.

## Executive Summary

### Preventing Poverty

- Taff Housing Association has been recruited through Supporting People funding to ensure appropriate housing related support is being given to people who are supported by Families First, Communities First and Flying Start.
- In addition to the support work, Taff Housing will work across the programmes to map service provision and identify if there is any duplication in terms of support provision across the programmes.
- Training around parenting attachment is currently being planned to initially help staff to identify issues but with the potential for further training for relevant staff to equip them to help resolve problems. This is being funded through Families First and will be offered across all four programmes.
- A European Social Fund (ESF) lead worker event was hosted on the 12<sup>th</sup> October, with 55 partners attending. All current ESF projects in the Vale of Glamorgan presented outcomes of their programmes. The event allowed workers from each project to network and compare programme criteria.
- A workshop is planned for the 10<sup>th</sup> February 2017 entitled 'People, Poverty, Action - Working Together to Reduce Inequalities'. The workshop will bring together board members for Communities First, Supporting People, Flying Start and Families First to learn about the different programmes and identify opportunities for further alignment of activities.

## Helping People into Work

- Communities for Work (C4W) staff have been appointed and are moving forward with the programme. The team has been integrated into the Communities First Prosperity Team for maximum efficiency and effectiveness.
- The delivery of services at the Open Learning Centre at Barry Library commenced in November 2016. The new facility includes three classrooms, a computer suite, office space and a crèche; this has transformed the library into a learning hub.
- First Job opportunities project is making linkages between the Council Housing Improvement programme and creating opportunities for local people, supported by Communities First. Communities First has also engaged with Newydd Housing Association along similar lines.
- The Inspire to Work bid is a joint project with Llamau Housing, working with unemployed young people aged 16-25. The project will seek to mentor young people and help them access education and employment opportunities. The Business Plan has been submitted to WEFO for approval with an expected start date of the project in early 2017.
- Guest speakers from FirstSource, Deloitte, Welsh Contact Centre Forum, Conduit, Admiral and Welsh Government's St Athan & Cardiff Airport Enterprise Zone have been invited to talk at IOB meetings. This engagement has led to knowledge sharing, employer engagement, and has offered benefits to the employers who have all experienced recruitment issues historically.
- CAVC has also shared details of the Labour Market Intelligence they have developed - both for the Vale of Glamorgan in general, but also for the 9 key Welsh Government priority sectors.
- In all main indicators, the performance of eFSM pupils has improved over time and shows an upward trend. Where the gap has not narrowed, it is as a result of nFSM pupils improving in line with or at a faster rate than eFSM pupils.
- A range of activities are progressing with regards to NEETs and figures continue to improve.

## Mitigating the Impact of Poverty

- To ensure a consistent approach to the changes implemented to the Local Housing Allowance is taken across the Vale of Glamorgan, the Council's Operational Manager for Public Housing Services is exploring options to establish a smaller working group.
- A Sensemaker project, involving the collection of qualitative data on the food environment in the Vale of Glamorgan has been undertaken, with a particular focus on the Barry area. Based on the findings, a Food Vale Steering Group has been established, the first meeting of the group was held on 10<sup>th</sup> November 2016. This group will develop an Action Plan, work to refresh food asset mapping and work towards the submission of a Sustainable Food Cities application.
- A detailed presentation and demonstration of the Citizens Advice live web-chat service was brought to the Financial Inclusion group in July. The web-chat service was piloted in its first phase by a number of branches including Cardiff and Vale of Glamorgan, with branch advisors working on web-chats, although clients from across the UK could access the service.
- A School Holiday Enrichment Programme (SHEP) was piloted in the Vale of Glamorgan over the school summer holidays. The project was hosted in Barry Comprehensive and Bryn Hafren, targeting children aged between 11-12, in the transition year between school years 6 and 7. A total of 93 children benefitted from the programme which provided participants with a healthy meal, alongside a range of physical activities, at a time when some parents struggle to provide an extra meal in the holidays.
- Following initial momentum in the delivery of the Financial Inclusion Strategy, due to changes in group membership, including its chairperson, there has been a loss of focus in the delivery of the strategy. It has been agreed that when a new permanent chair is in place, new leads and timescales will be assigned to actions in the strategy to regain momentum.

## Progress Update

### Preventing Poverty

**Senior Reporting Officer:** Phil Evans (Director of Social Services, Vale of Glamorgan Council)

**Monitored by:** Children and Young Peoples Programme Board and Poverty Alignment Group.

Align Families First, Communities First and Flying Start programmes to help children, families and communities to escape poverty.				
	Task	May 2016 - Next Steps	December 2016 Update	What are the next steps?
1	Map services provided by the four programmes in terms of service type, customer group, geographical area and partners	To map parenting services and projects. This will be finalised in the summer to inform any changes to services for the Autumn.	<p>Initial mapping of Families First and Flying Start parenting services has been completed. Further work is on hold until January 2017 whilst details of funding changes to the relevant programmes is awaited.</p> <p>Taff Housing Association has been recruited through Supporting People funding to ensure appropriate housing related support is being given to people who are supported by the other three programmes</p>	<p>Awaiting guidance on programmes for 2017/18 to help determine any future mapping exercises.</p> <p>As part of the Taff Housing work which is a 12 month project work will be undertaken to map service provision and identify if there is any duplication in terms of support provision across the programmes.</p> <p>A workshop has been arranged for December to bring staff from all 4 programmes together as part of this project.</p>

Align Families First, Communities First and Flying Start programmes to help children, families and communities to escape poverty.				
	Task	May 2016 - Next Steps	December 2016 Update	What are the next steps?
2	Collate information regarding current monitoring and reporting frameworks including timeframes	<p>A workshop across the four Vale programmes is planned which will enable relevant officers to develop a better understanding of the aims and scope of each programme and where similarities and opportunities for closer working exist.</p> <p>This will also include input from Public Health regarding how all four programmes can contribute to their priorities.</p> <p>Work is being undertaken across all four programmes with regards to current governance structures, funding and commissioning of services to identify areas for greater alignment and delivery of shared priorities</p>	<p>On the 22<sup>nd</sup> September a 'Vale Wellbeing Roadshow &amp; Networking' event was held for front-line staff at Barry Memorial Hall. This involved 56 organisations hosting stalls and over 300 + people attending. The event also saw the launch of the Dewis Cymru website <a href="https://www.dewis.wales/">https://www.dewis.wales/</a></p> <p>Feedback from this event was very good (see Task 4 below for further detail).</p> <p>The PAG continues to meet to ensure 'closer working' and alignment will continue amongst the participating programmes.</p>	<p>Once guidance for 2017/18 has been issued and more information is available regarding Communities First the group will explore further opportunities for joint working/sharing of information.</p> <p>The group previously participated in the trial of a common outcomes framework and are willing to consider participating in any future WG pilots.</p>
3	Explore opportunities for joint training across the four programmes	<p>Further joint activities are planned: Reducing child accidents Lead workers Forum for ESF Networking Event for professionals</p> <p>Other training such as Making Every Contact Count (MECC) and Brief Intervention for Smoking Cessation and Alcohol Awareness may be arranged via the Local Public Health Team</p> <p>An exercise will also be undertaken</p>	<p>Training for both the Making Every Contact Count (MECC) and Brief Intervention (BI) for Smoking Cessation programmes have been widely advertised and additional programmes will be arranged. 17 MECC training sessions were held across Cardiff and the Vale of Glamorgan, with 13 of the organisations involved working across Cardiff and Vale of Glamorgan.</p> <p>In addition, MECC training has been rolled out to individual teams, with</p>	<p>The Flying Start programme continues to provide access to in-house training via the Vale of Glamorgan Council STMS training system on:</p> <ul style="list-style-type: none"> <li>• Child Development</li> <li>• Reducing Accidents of the Under 5s</li> <li>• Positive Parenting</li> <li>• Promoting Speech, Language and Communication in Young children</li> </ul>

Align Families First, Communities First and Flying Start programmes to help children, families and communities to escape poverty.				
	Task	May 2016 - Next Steps	December 2016 Update	What are the next steps?
		across all four programmes to identify future training needs.	<p>Barry Communities First hosting MECC training through the Community Wellbeing Coaches.</p> <p>An additional 18 professionals have received training on Universal Credit and 5 on child DLA through Families First. This training will help support staff working with families to ensure accurate advice and signposting is carried out.</p> <p>A European Social Fund (ESF) lead worker event was hosted on the 12<sup>th</sup> October, with 55 partners attending. All current ESF projects in the Vale of Glamorgan presented outcomes for their programmes. The event allowed workers from each project to network and compare programme criteria. This event received excellent feedback from participants.</p>	<p>All training funded through Families First will continue to be offered to appropriate staff, organisations and customers across all four programmes.</p> <p>Training around parenting attachment is currently being planned to initially help staff identify issues but with the potential for further training for relevant staff to equip them to help resolve problems.</p>
4	Explore opportunities for a more joined up approach to engagement and information provision across the	<p>Discussions are taking place about pooling skills across the programmes to develop work in this area.</p> <p>The need for frontline staff to be more consistent in terms of questions asked, how and when to make referrals and knowledge about a range of services has been identified.</p>	<p>Work has continued across the four programmes to develop a shared approach to engagement. This has included the 'Vale Wellbeing Roadshow &amp; Networking' event which was attended by more than 300 people and included 55 information stands.</p> <p>127 people completed an evaluation</p>	<p>A workshop is planned for the 10<sup>th</sup> February 2017 titled 'People, Poverty, Action - Working Together to Reduce Inequalities'. The workshop will bring together board members for Communities First, Supporting People, Flying Start and Families First to learn about the different programmes to gain a better understanding of the four</p>

Align Families First, Communities First and Flying Start programmes to help children, families and communities to escape poverty.				
	Task	May 2016 - Next Steps	December 2016 Update	What are the next steps?
	four programmes		<p>form and in response to the question - <i>What have you found most useful about the event?</i></p> <p>Attendees found that the most useful part of the event was the chance to network with other partners. It gave them the time to make those valuable links to ensure strong partnership working that they would not normally be able to establish on a day-to-day basis. People also found that the large variety of stall holders and information available was beneficial.</p>	<p>interrelated poverty programmes.</p> <p>There will also be an opportunity to discuss how/if greater alignment can be achieved across all or some of the programmes. Ideas and information from the discussions will be then fed back to the Public Services Board.</p>
5	Support the embedding of team around the family approaches.	<p>Awaiting new guidance from Welsh Government regarding how TAF is rolled out further.</p> <p>Task and Finish Group within Flying Start established to move this forward in 2016-17</p>	<p>Families First Guidance regarding the roll out of the team around the family approach is not likely to be issued before March 2017.</p> <p>The FACT team are currently providing Team Around the Family training to Supported People commissioned projects.</p>	The Flying Start programme is looking to progress work in this area next year.
6	Work with Head Teachers to explore options to maximise	Poverty Alignment Group to consider how best to link in to any work on this issue	Please see update for action 15 in the Helping People into work section.	The Head of Achievement for All (Learning and Skills) has arranged a meeting with relevant parties to progress this issue in the New Year.

Align Families First, Communities First and Flying Start programmes to help children, families and communities to escape poverty.				
	Task	May 2016 - Next Steps	December 2016 Update	What are the next steps?
	how the Pupil Deprivation Grant could be utilised to fit with other intervention programmes			
7	Ensure that all four programmes link closely with public health priorities for the Vale and help to address health inequalities.	Trina to circulate relevant data to the group and participate in the proposed workshop. This will help ensure a clear understanding of public health priorities (local and national) and the current and potential contributions of the four programmes and promote joint working with relevant health agencies to ensure staff disseminating relevant information	<p>Following a presentation from the Cardiff and Vale Public Health Team on tackling childhood obesity to the Council's Healthy Living and Social Care Scrutiny Committee the PAG were tasked with looking at how the four programmes support this agenda. Discussions are ongoing between officers with regard to responsibilities, remits, priorities and funding. Future planning of activities will have to be in line with the revised priorities and funding requirements of the programmes or be part of a wider discussion regarding funding and targeting of services.</p> <p>Two Comprehensive Schools in Barry participated in the School Health Enrichment Programme (SHEP) during the summer of 2016. As part of the programme participants learned about healthy eating and physical activity. Over the two weeks</p>	<p>Further discussions between the programme leads and the Dietetics team with Cardiff and Vale Public Health are planned for January.</p> <p>A presentation on SHEP was made to the PSB in September and partners were keen to be involved in future programmes. Information will be shared as soon as possible about future activities to increase</p>

Align Families First, Communities First and Flying Start programmes to help children, families and communities to escape poverty.				
	Task	May 2016 - Next Steps	December 2016 Update	What are the next steps?
			<p>of the programme, on average 16 children attended on a daily basis at Barry Comprehensive and Bryn Hafren Comprehensive school. Parents were also encouraged to attend on one day per week to build relationships with the schools in preparation for their children to 'transition' and siblings were also included in this process.</p> <p>Both of these schools are participating in a wider Wales evaluation of the programme being conducted by Cardiff University.</p> <p>A number of volunteers were also recruited onto the project from the Bryn Hafren 6th form and its envisaged these volunteers will continue to work with the Communities First team as well as Glamorgan Voluntary Services (GVS).</p>	<p>the number of participants and range of activities.</p> <p>18 Local Authority areas have 'expressed an interest' in participating in the programme for the summer of 2017 which will be hosted by the WLGA and will require match funding.</p>

Further Actions	
<p>Are there any changes needed to the delivery plan?</p> <p>No changes are required at this time however following the workshop in February there may be a need to revise activities within the delivery plan.</p>	<p>Any Additional Actions Requested:</p> <ul style="list-style-type: none"> <li>• None</li> </ul> <p>Any Amendments Requested:</p> <ul style="list-style-type: none"> <li>• None.</li> </ul>
<p><b>PSB Response</b></p> <p><b>Does the PSB have any revisions or additions (For use at the PSB)</b></p>	

## Helping People into Work

**Senior Reporting Officer:** Kay Martin (Vice Principal, Cardiff and Vale College) and Marcus Goldsworthy (Head of Regeneration and Planning, Vale of Glamorgan Council)

**Monitored by:** Improving Opportunities Board

Improve opportunities for employment and skills development to improve access to jobs that can be a route out of poverty and to a better quality of life.				
	Task	May 2016 - Next Steps	December 2016 Update	What are the next steps?
1	Promote digital access and literacy with particular reference to deprived areas and hard to reach groups	<p>A schedule to train key local authority staff as digital literacy practitioners has been agreed.</p> <p>Cascade digital learning training to Tutor teams and monitor practice embedded in lesson plans and course outlines.</p> <p>Work of 'Get the Vale Online Partnership' to continue.</p> <p>The Vale's Digital Inclusion Working Group to continue.</p> <p>Will continue until at least March 2017.</p>	All Tutors across the CAVCLP have been offered Digital inclusion awareness and embedding training. 2 training sessions have already run with over twenty tutors in attendance.	<p>Two further training sessions will be run within this academic year.</p> <p>Upgrade the software to Windows 2016 in the digital suite in Central Library used by the Digital Inclusion Team</p>
2	Put in place an exit strategy for when funding for	The funding for the Communities 2.0 project ended in March 2015 but partners agreed to continue to update and monitor the site, so it's	The Get the Vale Online Steering Group is also still in existence and meets on a quarterly basis. The meetings are chaired and facilitated	Steering groups and current partnership work will continue. A list of current free Digital Drop-Ins being provided across the Vale is

## Mitigating the Impact of Poverty

**Senior Reporting Officer: Awaiting appointment of a new Head of Housing Services**

**Monitored by:** Financial Inclusion Group.

Improve the advice and support available for Vale residents experiencing financial and housing difficulties enabling them to maintain a suitable standard of living and to find a route out of poverty.				
	Task	May 2016 - Next Steps	December 2016 Update	What are the next steps?
1	Raise awareness about the impact of welfare reform with staff and residents including delivery of the Families First funded project 'Raising Awareness of Welfare Rights'	<p>Universal Credit support has been put in place as per the update on action 2 as below.</p> <p>The Financial Inclusion Group are discussing the forthcoming changes to Local Housing Allowance and a smaller working group will be established to discuss how these changes are dealt with in the Vale, particularly in relation to under 35s in order to avoid having to use Bed and Breakfast accommodation again</p>	<p>An in-depth briefing note on the Local Housing Allowance was discussed by the Financial Inclusion Group in October. To ensure a consistent approach across the Vale, the Council's Operational Manager for Public Housing Services, Mike Ingram is establishing a smaller working group.</p> <p>33 Families have been have been directly referred and accessed the 'Raising Awareness of Welfare Rights' project via the FACT project. 12 accessed the project for money advice and 28 for benefit advice. Through this project approximately £20,000 of debt was written off and over £78,000 of benefits was gained for these families.</p> <p>Through the Families First</p>	<p>The forum to discuss the changes implemented through the LHA will be established and will report progress to the Financial Inclusion Group.</p> <p>Support those affected by the reduced Benefit Cap. Partners are beginning to collect information on the distance claimants affected by the cap are away from the labour market, considering how likely they are to gain employment as a solution to the issue.</p>

Improve the advice and support available for Vale residents experiencing financial and housing difficulties enabling them to maintain a suitable standard of living and to find a route out of poverty.				
	Task	May 2016 - Next Steps	December 2016 Update	What are the next steps?
			<p>programme an additional 18 professionals received training on Universal Credit and 5 on Child Disability living allowance, this training will help support staff working with families to ensure accurate advice and signposting is carried out.</p> <p>Unfortunately, due to changes in the criteria to the Families First programme the 'Raising Awareness of Welfare' project will cease in March 2017. The Welsh Government are exploring how this may be supported through additional avenues.</p> <p>Partners have discussed upcoming changes to the Benefit Cap and contact is being made with those who will be affected by the cap.</p>	
2	Monitor an agreed Partnership Delivery Agreement and continue to share and	Continued dialogue between partners will ensure that any claimants needing Personal Budgeting Support are referred. The Council's benefits and housing teams will meet with Registered Social Landlords to put official referral mechanisms for	Regular dialogue with partners has continued and the PBS process is always being improved and monitored, to ensure we provide the best possible service. The referrals are increasing and the Council, in consultation with Department for	Continuing to provide and refine the service to meet the specified needs of claimants. Work with partners to increase the amount of referrals received to ensure that those most vulnerable, receive the support they require.

Improve the advice and support available for Vale residents experiencing financial and housing difficulties enabling them to maintain a suitable standard of living and to find a route out of poverty.				
	Task	May 2016 - Next Steps	December 2016 Update	What are the next steps?
	discuss best practice/research undertaken in other authorities	Personal Budgeting Support in place.	Work and Pensions, is looking at new and innovative ways to assist with PBS.	
3	Work with residents to ensure they are receiving correct benefit entitlements and to develop their budget/financial management skills	<p>The Benefit Cap will reduce from Autumn 2016 therefore partners are working together to identify all those who will become affected by the reduced cap and ensure they are made aware of the changes coming into effect and are offered budgeting support.</p> <p>Following a mapping exercise of local services (see action 7); the group are keen to discuss models to ensure clients receive the right advice from the correct specialists and avoid duplication. The group recognise that it is important that the client is directed to the most appropriate organisation for help and support based on their circumstances and are keen to explore the possibility of a 'gateway' model.</p> <p>The next standing agenda item at the Financial Inclusion Group to share ideas will include a demonstration of the Citizens Advice live webchat service. Partners are keen to learn from this and explore new ways of engaging with customers who need</p>	<p>A Benefits general update continues to be discussed as a standing item at the Financial Inclusion Group. The group continue to be updated on both the numbers of residents affected by the future Benefits Cap changes and Discretionary Housing Payments.</p> <p>The Financial Inclusion group received a detailed presentation and demonstration of the Citizens Advice live webchat service in July. Increasingly Citizens Advice are seeing more 'middle income earners' who work during office hours and are digitally competent requiring advice, a live web chat service was piloted as an approach to providing advice in alternative ways. The web chat service was piloted in its first phase by a number of branches, including the Cardiff and Vale branch with these advisors working on the web chats, although clients from across the UK could access the service.</p>	Continue to provide a range of services to develop budgeting skills.

Improve the advice and support available for Vale residents experiencing financial and housing difficulties enabling them to maintain a suitable standard of living and to find a route out of poverty.				
	Task	May 2016 - Next Steps	December 2016 Update	What are the next steps?
		support. The Families First 'Raising Awareness of Welfare Rights' project will continue to be funded for 2016/17 to help ensure families are receiving their correct benefit entitlements.		
4	Continue to develop a range of tools to provide a customer focused housing (plus) advice and options service	Work to continue to develop the tool.	We are currently awaiting the new release of the OHMS Housing Management software in order for the on-line Housing Advice tool to become fully functional. The Council's Housing Solutions Service is currently in discussions with the Vale of Glamorgan Citizens Advice to provide a drop in service for households who are homeless or threatened with homelessness.	Further development of the housing advice tool is reliant upon the release of the new OHMS Housing Management software. While awaiting this update we will continue to identify and develop further support and advice opportunities.
5	Utilise a range of information gathered including the use of Foodbanks and reasons for referrals to help inform the Public Health team work to develop a Food Charter and Network for the Vale of Glamorgan.	<p>Due to staff shortages as a result of long term sick leave within the Public Health Team the charter has not yet been published however this work will be reviewed shortly.</p> <p>Capturing baseline data relating to the project is also under development.</p>	An update on the progress of the Food Charter and Network for the Vale of Glamorgan was brought to both the July and October meetings of the Financial Inclusion Group. A network group has been established for the Vale with a working title of 'Food Vale'. A Sensemaker project has also been undertaken, this is a project that has involved collecting qualitative data around the food environment in the Vale, with a particular focus on Barry. Volunteers have been used to collect information around people's experiences with food; feedback on	<p>The first meeting of the Food Vale steering group was held on the 10th November 2016. The group will develop an Action Plan and work on refreshing the mapping of Food Assets in the Vale</p> <p>The group will also work towards the submission of a Sustainable Food cities application, involving:</p> <ul style="list-style-type: none"> <li>• Establishment of an effective cross-sector food partnership</li> <li>• Embedding healthy and sustainable food in policies</li> </ul>

Improve the advice and support available for Vale residents experiencing financial and housing difficulties enabling them to maintain a suitable standard of living and to find a route out of poverty.				
	Task	May 2016 - Next Steps	December 2016 Update	What are the next steps?
			the project has been presented to the network group.	<ul style="list-style-type: none"> <li>• Development and delivery of a food strategy and action plan</li> <li>• Development and production of a food charter.</li> </ul>
6	Promote schemes and projects to help reduce energy costs and fuel poverty including Cyd Cymru	<p>Fuel Poverty remains high on the agenda for the Financial Inclusion Group and a mapping exercise will take place (see action 7) to determine services which currently exist across partners.</p> <p>The NEST partnership manager for the Vale of Glamorgan will attend the next meeting of the group to provide an update on NEST services and contribute to strategic discussions as the group are keen to ensure that issues around fuel poverty in the private sector are also captured.</p> <p>Hafod will provide feedback to the group on the Oxypod trial once the official results are available.</p>	<p>Registration for the collective switching scheme Cyd Cymru is currently closed. Since 2014 the programme has helped over 4,000 households switch saving a total of over £950,000.</p> <p>The group is awaiting an update from Hafod Housing on the Oxypod trial. It is anticipated that this will be received when official results are available.</p>	<p>Continue to monitor the Cyd Cymru programme for confirmation of the dates of the next switch period.</p> <p>When official results of Oxypod trial are made available the group will invite Hafod to provide an update.</p>

Improve the advice and support available for Vale residents experiencing financial and housing difficulties enabling them to maintain a suitable standard of living and to find a route out of poverty.				
	Task	May 2016 - Next Steps	December 2016 Update	What are the next steps?
7	Develop and implement a Financial Inclusion Strategy for the Vale of Glamorgan	An in depth questionnaire developed by the Wales Cooperative Centre has been adapted for the Vale of Glamorgan (with permission to do so) to assist with the mapping exercise. The questionnaire will be circulated shortly. The results of the exercise will be made available to partners as a resource and discussion are on-going into how this is presented. Results will feed into other work being undertaken by the group such as being able to identify gaps in services relating to fuel poverty and to begin informing discussion around a gateway model for money advice support as per action 3.	<p>A mapping exercise to identify gaps in provision and overlaps in client bases has been started by the group; however there was a limited response to the mapping questionnaire.</p> <p>Following initial momentum in the delivery of the strategy, changes in membership of the group including its chairperson and increasing pressures across all members of the group has resulted in a loss of focus in delivering the strategy.</p>	It has been agreed that when a new permanent chair person is in place new leads and timescales will be assigned to the actions in the strategy to regain momentum.

Further Actions	
Are there any changes needed to the delivery plan?	<p>Any Additional Actions Requested:</p> <ul style="list-style-type: none"> <li>• None</li> </ul> <p>Any Amendments Requested:</p> <ul style="list-style-type: none"> <li>• That PSB Agree changes to Financial Inclusion Strategy Action Plan.</li> </ul>
<p><b>PSB Response</b></p> <p><b>Does the PSB agree or have any further revisions or additions? (For use at the PSB)</b></p>	

7 November 2016

Dear Councillor Neil Moore,

On 11 October, the Cabinet Secretary for Communities and Tackling Poverty made a statement in Plenary that signalled the start of a broad programme of engagement with stakeholders on the Welsh Government's proposed new approach to building resilient communities. The statement indicated that he was also minded to phase out the Communities First (CF) Programme while establishing a new approach to meet the challenges of the future. I am writing to you as part of this engagement process.

My team and I would welcome the opportunity to meet with members of your Public Services Board in order to discuss the proposed new approach.

Building resilient communities focuses on three priority areas of Employment, Early Years and Empowerment. By prioritising in this way, the Cabinet Secretary wants to create communities that offer children the best start in life, communities that are ready and able to work and communities where the voices of local people are heard clearly when decisions are made.

Engagement activities are broadly threefold, seeking views upon: our proposed new approach to building resilient communities; the role of Communities First in delivering services and support to communities; and the practicalities and operational aspects of our current interventions, including links to the Lift and Communities for Work programmes. Our programme of engagement has already started with an online survey 'Talk Communities' launched on 24 October giving members of the public the opportunity to feed in their views. The survey can be accessed here <http://gov.wales/topics/people-and-communities/communities/talk-communities/?lang=en>

Local Authorities and Public Services Board members are an important part of our programme of engagement. Through the new approach to communities, we are seeking to strengthen the framework within which Local Authorities and Public Services Boards engage with their communities and develop services that are sensitive and responsive to their diverse needs. I am conscious that you are currently undertaking an assessment of local well-being and engaging communities in that process. It would be very helpful to hear from you what you are learning from the process and what issues are being highlighted as important to communities.

My team and I would be very happy to attend a meeting of your Public Services Board to discuss the new approach to building resilient communities and to hear your views. If you would like to take up this offer, please contact Gemma Phillips on 03000 256560 or by email, [gemma.phillips@wales.gsi.gov.uk](mailto:gemma.phillips@wales.gsi.gov.uk) to arrange.

Yours sincerely

A handwritten signature in black ink, appearing to read 'Jo-Anne Daniels', written in a cursive style.

<b>8. What will we do next?</b>	<b>93</b>

# 1. Introduction

This is the first well-being assessment published by us, the Vale Public Services Board (PSB) 'Our Vale' and it brings together a wealth of information about life in the Vale of Glamorgan. The purpose of the assessment is to enable us all to better understand the state of well-being in the area, this includes, social, economic, environmental and cultural well-being. This will in turn help inform our well-being objectives and Well-being Plan which will shape how we provide our services.

## 1.1 Why do we need a Well-being Assessment?

The Well-being of Future Generations (Wales) Act came into effect in April 2016 with the primary aim of ensuring public bodies improve the economic, social, environmental and cultural well-being of Wales. This must be done in accordance with the sustainable development principle, seeking to ensure that the needs of the present are met without compromising the ability of future generations to meet their own needs. The well-being assessment is a vital tool to help us achieve this and ensure we have a better understanding of the communities we serve.

## 1.2 Who is responsible for the Well-being Assessment?

The Well-being of Future Generations (Wales) Act established Public Services Boards (PSBs) in each local authority area. The purpose of the PSB is to 'improve the economic, social, environmental and cultural well-being of the area by contributing to the achievement of the well-being goals. 'Our Vale', the Vale of Glamorgan PSB is comprised of senior representatives from the following organisations who have all been involved in developing this assessment which is a statutory requirement of the PSB:

- Cardiff and the Vale University Health Board (UHB)
- Cardiff and Vale College
- Community Rehabilitation Company
- Glamorgan Voluntary Services (GVS)
- National Probation Service
- Natural Resources Wales
- South Wales Fire and Rescue Service
- South Wales Police
- South Wales Police and Crime Commissioner's Office
- Town and Community Councils Representation
- Vale of Glamorgan Council
- Wales Ambulance Service
- Welsh Government

### 1.3 What are the national well-being goals?

The Act sets out seven national well-being goals for Wales and the PSB must maximise its contribution to these goals – the well-being assessment and plan will help ensure that the PSB is able to do this and that we can be held to account for our progress. The seven national well-being goals for Wales are set out in the following diagram.

Goal	Description of the goal
<b>A prosperous Wales</b>	An innovative, productive and low carbon society which recognises the limits of the global environment and therefore uses resources efficiently and proportionately (including acting on climate change); and which develops a skilled and well-educated population in an economy which generates wealth and provides employment opportunities, allowing people to take advantage of the wealth generated through securing decent work.
<b>A resilient Wales</b>	A nation which maintains and enhances a biodiverse natural environment with healthy functioning ecosystems that support social, economic and ecological resilience and the capacity to adapt to change (for example climate change).
<b>A healthier Wales</b>	A society in which people's physical and mental well-being is maximised and in which choices and behaviours that benefit future health are understood.
<b>A more equal Wales</b>	A society that enables people to fulfil their potential no matter what their background or circumstances (including their socio economic background and circumstances).
<b>A Wales of cohesive communities</b>	Attractive, viable, safe and well-connected communities.
<b>A Wales of vibrant culture and thriving Welsh language</b>	A society that promotes and protects culture, heritage and the Welsh language, and which encourages people to participate in the arts, and sports and recreation.
<b>A globally responsible Wales</b>	A nation which, when doing anything to improve the economic, social, environmental and cultural well-being of Wales, takes account of whether doing such a thing may make a positive contribution to global well-being.

## **1.4 What is included in our Well-being Assessment?**

The assessment considers the state of well-being (social, economic, environmental and cultural) across the whole of the area and within particular communities. The assessment also considers the well-being of particular groups of people within the area, predictions of likely future trends for the area and a set of national indicators which have been developed to measure Wales' progress towards achieving the national well-being goals.

A range of sources of evidence including statistical data, engagement information and academic research have been considered as part of the assessment which has provided an opportunity to capture the strengths and assets of the people and communities within the Vale of Glamorgan.

The well-being assessment is made up of a suite of documents and these will be further refined for publication in April 2017. This document provides an overview of our findings, bringing information together from a series of evidence reports and our engagement report.

It should be noted that this document is the focus of our consultation on the draft assessment and work will continue in terms of data and evidence analysis and engaging with our communities over the coming months before the assessment is published in April 2017.

The suite of documents which will make up our well-being assessment are detailed below and copies of the other draft documents are available on request:

- This overview document
- An executive summary
- Four detailed evidence reports – 'Having a Healthy and Active Future', 'Being Part of Safe and Inclusive Communities', 'Maximising Opportunities and Attainment' and 'Our Environment'.
- Community Area Profiles which will include key findings from the assessment for the Vale as a whole and each of the three community areas – Barry, Eastern Vale and Western Vale.
- Summary reports showing age group profiles and a series of 'pen portraits'
- A detailed report on the findings of the PSB 'Let's Talk' engagement campaign.
- A data directory providing details of where the evidence set out within the assessment can be accessed in more detail if required

## **1.5 How will the PSB determine its priorities?**

Work will continue to develop what is known as our 'response' analysis, responding to the initial findings regarding the state of well-being in the Vale of Glamorgan and developing the Vale PSB's Well-being Plan by April 2018. The next stage of this analysis will involve exploring a number of areas which have emerged from the assessment in more detail.

The well-being assessment will form a robust evidence base from which the PSB can develop its Well-being Plan, identifying collective and deliverable actions to contribute to the national well-being goals and maximise the well-being of communities in the Vale of Glamorgan.

By April 2018, the Vale PSB's Well-being Plan will be published clearly setting out the PSB's well-being objectives and priorities for action and how they have been determined.

Further details on the next phase of this work can be found in the next steps section of this document.

DRAFT

## **2. How did we do the assessment?**

In order to produce this well-being assessment a range of work has been undertaken as outlined below. It is important to note that the PSB recognises the well-being assessment as an ongoing process of continuously enhancing our evidence base and talking with our communities to ensure we have the best possible basis for well-being planning in the Vale of Glamorgan.

### **2.1 Gathering of data and evidence**

In order to provide a starting point for PSBs to undertake the assessment, Welsh Government commissioned the Local Government Data Unit (LGDU) to produce a common data set which consists of a range of indicators across the four aspects of well-being – social, economic, cultural and environmental. Members of the PSB and the PSB Business Intelligence Group (which brings together a range of data analysts, research and consultation officers from across partner organisations) considered the indicators included in the common dataset to identify any gaps and other sources of data, evidence and research that should be taken into account within the assessment in order to assess the state of well-being in the Vale of Glamorgan and consider any likely future trends.

From this exercise and engagement with a range of stakeholders a data directory was developed in order to identify the range of sources to take into account within the assessment, this included common data set indicators and the National Indicators. Analysis has been undertaken with regards to this information for the Vale of Glamorgan as a whole and where possible for different community areas and population groups.

The detailed findings of this analysis have been outlined within a series of comprehensive evidence reports, with this document providing an overview of the key findings emerging from the assessment. A range of additional resources will be produced as outlined previously to form the well-being assessment and the data directory will continue to be developed and provide links to where further in-depth information can be accessed.

### **2.2 Stakeholder engagement**

In order to ensure a wide range of stakeholders from across partner organisations have contributed to the assessment the PSB has held a range of sessions to provide opportunity to discuss emerging findings of the assessment.

An initial PSB and Business Intelligence Group workshop was held at the beginning of the process to discuss initial ideas with regards to the assessment and provided an opportunity to consider how we could ensure the assessment develops into a robust evidence base that is accessible to a range of users. An exercise also took place to consider and agree the community areas to be used within the assessment.

A series of Engagement sessions have been held with stakeholders and professionals throughout the process to test findings and understand any patterns and emerging trends identified through the data. Various networks/ meetings have also provided a useful opportunity to discuss the assessment with other partners and learn from good practice being undertaken by other PSBs e.g. discussions with the Arts Council Wales and attendance at the National Intelligence event.

Throughout the process officers have participated in the Cardiff and Vale of Glamorgan Population Needs Assessment Steering Group to ensure links between the well-being assessment and Population Needs Assessment as required by the Social Services and Well-being Act continue to be made. We also attended the Vale of Glamorgan DEWIS launch event as stallholders to gather the views of a range of professionals working across a range of sectors and organisations to improve well-being.

Most recently, a PSB workshop was held which included a 'stall' for each section of our assessment. PSB members visited each 'stall' in turn to consider the key findings before discussing as a group and considering a range of areas that should be explored in further detail during the next phase of the assessment.

### **2.3 Public engagement**

In recognition of the wide range of public engagement taking place through the Vale of Glamorgan Well-being Assessment, the Cardiff Well-being Assessment and the Cardiff and Vale Population Needs Assessment, the Vale PSB, Cardiff PSB and Integrated Health and Social Care partnership are collaborating to undertake a joint engagement campaign – Let's Talk.

We recognised that there would be a significant amount of engagement being undertaken

across the region and developed the joint brand to ensure a coordinated approach for members of the public participating in activities. The brand was then adapted for different events e.g. Let's Talk in Barry, Let's Talk Carers. A range of Let's Talk materials including pop-up banners were developed to again ensure a consistent brand was used across all engagement activities.

In the Vale of Glamorgan a well-being survey was developed and undertaken throughout July and August 2016. More than 800 responses were received with the survey being promoted by partners, online and in venues such as the Civic Offices, local libraries and Llandough Hospital. A series of joint questions were developed for the Vale survey and were integrated within Cardiff PSB's Ask Cardiff survey to allow for analysis of responses on a range of questions across the region.

In addition to the survey undertaken in the Vale, partners have attended a number of events including the Vale Show, Festivale (for social housing tenants in Barry), the Penarth Festival, St Athan Community Fun Day and a Flying Start Fun Day. Officers also spent a day at Barry Island based in one of the Beach Huts in order to speak to residents and visitors alike.

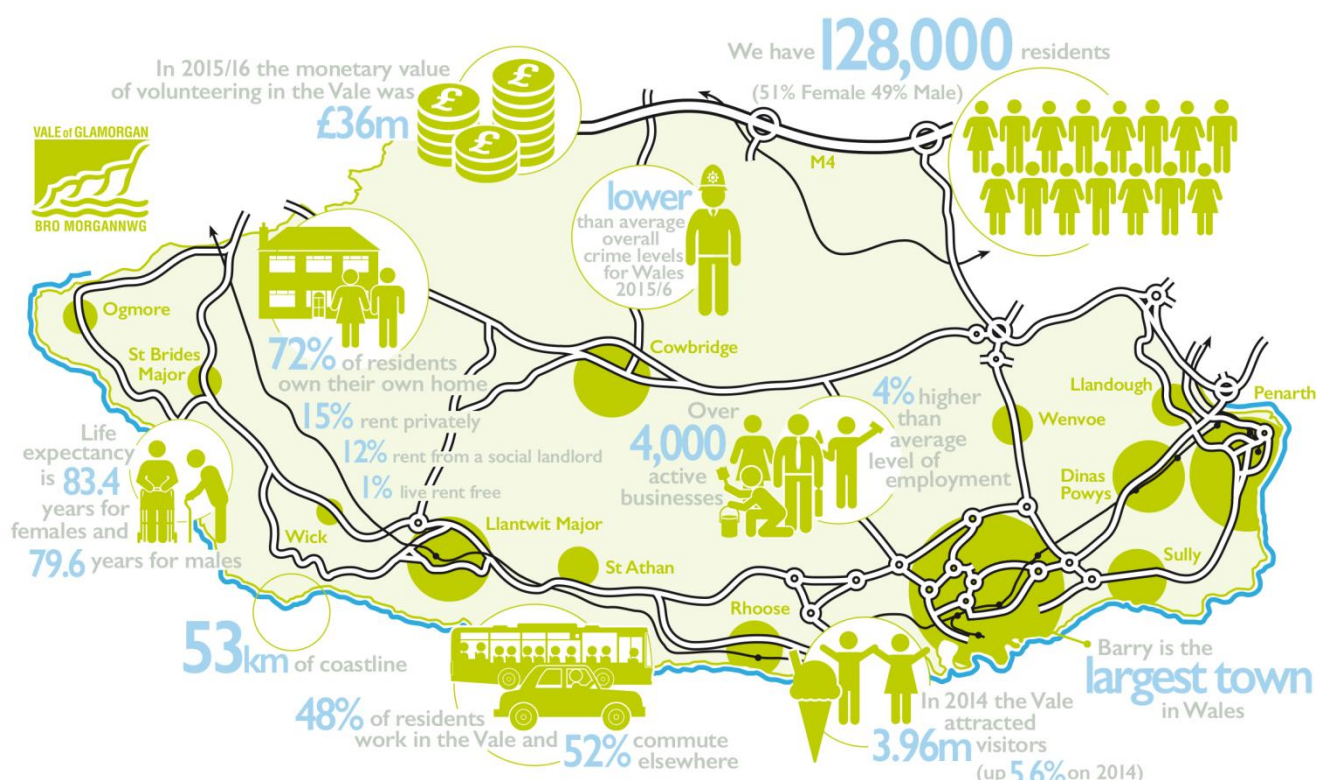

A series of Let's Talk Postcards were developed for use at these events and have also been utilised as part of the engagement for the PNA. The postcards asked residents three quick fire questions – what's good about where you live, what could be better, and what's important for your health and well-being. The postcards also asked for the respondent's age, gender and postcode to allow for analysis by demographics and by area. Let's Talk branded bubbles were also used at the various events attended to help engage with young families.

These postcards were also used to engage with a series of more formal groups such as the Vale's Youth Forum and the 50+ Strategy Forum.

More detailed information in regards to our engagement campaign is included in the full Let's Talk engagement report which will be published by April 2017. It will include detailed findings and results of the survey and other events. It will also include the findings of the engagement work that will continue to take place between January and April 2017. This will include drop in sessions in each of the community areas, a stakeholder workshop and utilising social media to have a conversation about the key findings of the assessment and whether we have identified the right priorities for moving forward. The overview document will also be available on-line and will be sent to a range of local stakeholder to enable people to consider the assessment in detail and provide feedback to the PSB.

### 3. About the Vale of Glamorgan

The Vale of Glamorgan is a diverse and beautiful part of Wales. The county is characterised by rolling countryside, coastal communities, busy towns and rural villages but also includes Cardiff Airport, a variety of industry and businesses and Barry, Wales's largest town. The area benefits from good road and rail links and is well placed within the region as an area for employment as a visitor destination and a place to live. The map below shows some key facts about the Vale of Glamorgan.

There are however areas of poverty and deprivation and the Council is working with local communities and other partners to ensure that the needs of different communities are understood and are met, so that all citizens can look forward to a bright future.

#### 3.1 Our population

The population of the Vale of Glamorgan as per 2015 mid-year estimates based on 2011 Census data was just under 128,000. Of these, approximately 51% are female and 49% male.

The Vale has a similar age profile of population as the Welsh average with 18.5% of the population aged 0-15, 61.1% aged 16-64 and 20.4% aged 65+. Population projections estimate that by 2036 the population aged 0-15 and aged 16-64 will decrease. The Vale has an ageing population with the number of people aged 65+ predicted to increase and be above the Welsh average by 2036 as shown in the following chart.

Projected % of people aged 65+ years

Source: Welsh Government (WG)

Daffodil Cymru projections estimate that by 2035, there will a 130% increase in the number of people in the Vale of Glamorgan aged 85+, with the number of males 85+ predicted to increase by 180% and the number of females by 104%. It is recognised that those aged 80+ have the most acute health and social care and support needs.

Currently, the percentage of the Vale's population reporting activity limitations due to a disability is one of the lowest in Wales.

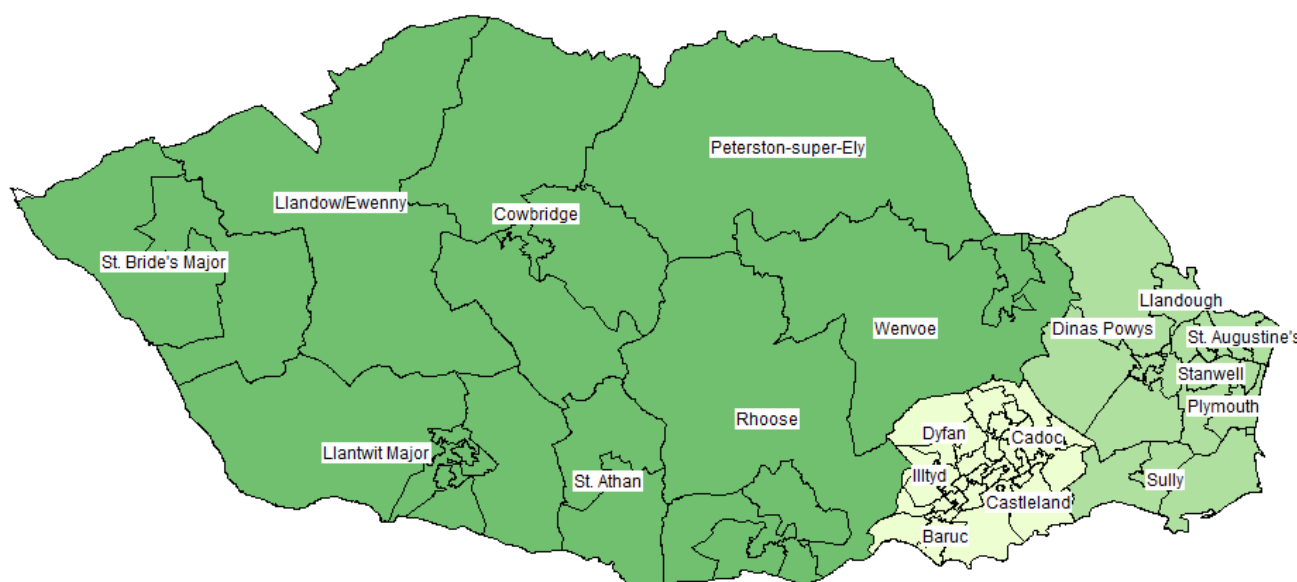

2.8% of the Vale's population reported being of a non-white background and 6% of the overall population reported being non-UK born. Of these, 33% arrived after 2004. With regards to the Vale's migrant population, 59% reported being non-EU born, 14% Accession Country born and 27% EU-14 born. The Vale had a negative internal migration balance in 2015, internal migration refers to people moving between UK countries. In the Vale more people moved to other UK countries than moved into the area from UK countries.

With regards to the Welsh language only 3% of residents report being able to speak Welsh fluently, with 87% not being able to speak any Welsh. The remaining 10% had varying degrees of Welsh language speaking ability. Of the small proportion of the population who can speak Welsh, 25% reported using Welsh on a daily basis.

### 3.2 Our Communities

For the purposes of this Well-being Assessment and to assist us to gain a better understanding of the well-being of our communities within the Vale of Glamorgan we have considered the area as a whole and also split the county in to three community areas – Barry, the Eastern Vale and the Western Vale. These areas reflect how services are currently planned and delivered by partner organisations within the PSB.

Throughout this assessment we have considered the differences that can be observed between these community areas and where possible differences that also exist within them. Local authority level data can often mask inequalities that exist between areas of the Vale of Glamorgan and where possible we have considered data either at ward or LSOA (Lower Super Output Area) level.

The below identifies the electoral wards within each of our community areas.

<u>Western Vale</u>	<u>Barry</u>	<u>Eastern Vale</u>
St. Bride's Major	Dyfan	Dinas Powys
Llandow/Ewenny	Gibbonsdown	Sully
Llantwit Major	Court	Llandough
Cowbridge	Cadoc	Cornerswell
Peterston-Super-Ely	Illtyd	St. Augustine's
St Athan	Buttrills	Stanwell
Rhoose	Baruc	Plymouth
Wenvoe	Castleland	

The estimated population of the Barry community area is approximately 52,200, the Western Vale area 38,500 and the Eastern Vale area 36,800.

The below map shows the percentage of population aged 65+ and is just one example that demonstrates the differences that exist across the Vale. As shown, the Barry area has a much younger population than parts of the Eastern and Western Vale, where in Cowbridge 1 38% of the population is aged 65+ and as highlighted previously the older population in the Vale of Glamorgan is predicted to increase significantly over the coming years. This can be compared to Castleland 2G in Barry where only 6.7% of the population is aged 65+.

#### Percentage of Population Aged 65+ - June 2015

Contains Ordnance Survey data © Crown Copyright. Licence number 100043376

Source: InfoBase Vale. Population estimates based on Census 2011 data

Throughout the assessment the St. Athan area can be identified as having very different characteristics to most other parts of the Western Vale and could be attributed to the RAF base that is found in the area resulting in a transient population. In St Athan 2 only 6% of the population are aged 65+ which is the lowest in the Vale of Glamorgan.

In 2015 the Local Government Data Unit were commissioned to produce an analysis report on poverty within the Vale of Glamorgan<sup>1</sup> and St. Athan was identified as somewhat of an anomaly. The Vale's Creative Rural Communities partnership undertook a detailed community asset mapping project in this area in order to better understand this community.

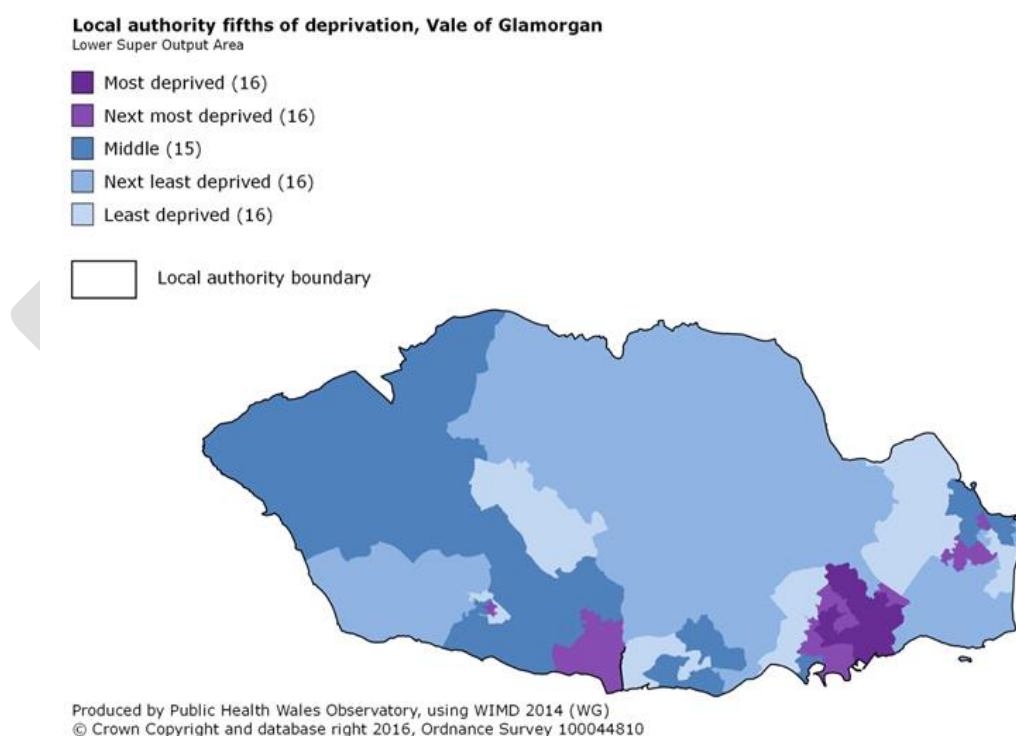

<sup>1</sup> [LGDU Vale of Glamorgan Tackling Poverty Analysis 2015](#)

A similar exercise is now being undertaken through community councils within other areas of the Vale.

A range of detailed demographic data within our communities is detailed within our community area reports. The Welsh Index of Multiple Deprivation 2014 has been used to help illustrate differences within our communities. The following map shows deprivation levels across the Vale of Glamorgan and highlights the differences that exist in the area. Four of the Vale's LSOAs – Gibbonsdown 2, Court 3, Cadoc 4 and Castleland 1 are ranked within the top 10% most deprived LSOAs in Wales and are all located in the Barry area. The inequalities that exist throughout the Vale in relation to a range of indicators are highlighted throughout this assessment and demonstrates the differences across our areas.

The following map shows levels of deprivation across the Vale of Glamorgan according to the Welsh Index of Multiple Deprivation 2014 (WIMD) by deprivation fifth. However it is important to note that an area itself is not deprived: it is the circumstances and lifestyles of the people living there that affect its deprivation rank and it is important to remember that not everyone living in a deprived area is deprived—and that not all deprived people live in deprived areas. This underpins a number of the key findings that have emerged from our assessment.

It is also important to note that the WIMD can be analysed by the different domains that comprise the index – Income, Employment, Health, Education, Access to Services, Community Safety, Physical Environment and Housing. This again shows differences across the Vale of Glamorgan. For example, when analysing the 'Access to Services' domain, four of the Vale's LSOAs are within Wales' top 10% most deprived and all are located in the

Western Vale, seven LSOAs are also within the top 11-20% most deprived in Wales and six of these are again located in the Western Vale demonstrating the rural nature of this community area.

Further analysis of the WIMD is included within our community profile reports, in addition to analysis of ONS area classifications<sup>2</sup> which paint a 'pen portrait' for the typical population demographic found within the area.

### **3.3 Our assets and facilities**

It is important to recognise the many assets we already have in the Vale of Glamorgan and how we can work with local communities to utilise and maximise what we have to improve individual and community well-being. The range of facilities, services and projects which contribute to our well-being include:

#### **Social**

- 16 GP practices across the Vale (some of which have more than one surgery) - although residents told us they want better access to appointments
- University Hospital Llandough and Barry Community Hospital which offer a variety of primary and secondary care services including a new adult mental health unit at Llandough.
- There are four Police stations in the Vale of Glamorgan, Penarth, Cowbridge, Barry and Llantwit Major but only the one in Barry is open to the public. The Safer Vale partnership team as well as probation officers and Victim Support are also based at the Barry Police station.
- Four fire stations in the area Barry, Penarth, Llantwit Major and Cowbridge
- 22 Council run community centres - residents have highlighted the importance of being able to take part in local activities and groups.
- Four Town Councils and twenty two community councils. These councils are responsible for specific services and facilities and are an important tier of local democracy and a link to the local community.
- Five food banks, of which two are located in Barry, one in Dinas Powys, one in Llantwit Major and one in St Athan.
- Volunteers play an important role in our communities. Glamorgan Voluntary Services (GVS) is an independent charity and has a flourishing membership of voluntary and community organisations.

---

<sup>2</sup> [ONS 2011 Area Classifications](#)

## **Economic**

- 57 Schools including 7 welsh medium schools
- Cardiff International Airport
- The Cardiff Airport and St Athan Enterprise Zone
- Cardiff and Vale College has two sites in the Vale of Glamorgan, Colcot Road in Barry which provides a wide range of courses and the International Centre for Aerospace Training (ICAT) in Rhoose.
- Four town centres, Barry, Cowbridge, Llantwit Major and Penarth. They all have a distinct character and provide local amenities and opportunities for socialising

## **Cultural**

- Five full time libraries and four part time libraries including three that are community run.
- Six Leisure and Sports Centres located in Barry, Penarth, Llantwit Major and Cowbridge - people of all ages highlighted the importance of local facilities and of physical activity for their health and well-being.
- A range of arts and entertainment venues that includes galleries, museums and theatres, including the HeARTh Gallery at University Hospital Llandough.
- Two Women's Trails which celebrate the lives of remarkable and significant women who lived in the area.
- The award winning Penarth Pier and Dyffryn House

## **Environmental**

- 27 sites of Special Scientific Interest (SSSIs), 1 Special Protection Area, 2 Special Areas of Conservation, 1 adjoining Special Protection Area (Kenfig National Nature Reserve) and 1 RAMSAR site.
- 740 listed buildings over 100 Scheduled Ancient Monuments, 39 Conservation Areas, 18 areas included in the Register of Landscapes of Historic Parks and Gardens and 2 areas on the Register of Landscapes of Historic Interest in Wales.
- Nineteen parks, seven of which have green flag status which is a mark of excellence, demonstrating good amenities and community involvement in parks.
- Two Country Parks, Porthkerry Park on the outskirts of Barry and Cosmeston Lakes on the outskirts of Penarth. The parks offer over 200 hectares of woodlands, meadows and beaches.
- 10 Council run allotment sites (8 in Barry and 2 in the Western Vale) these can be used to grow vegetables or flowers and even to keep hens.
- The Glamorgan Heritage Coast stretches for 14 miles, from Aberthaw to Porthcawl and provides opportunities for walkers, cyclists or anyone with a love of the countryside.

- The Vale is blessed with a diverse range of beaches including the resort of Barry Island which has recently undergone significant regeneration and the more rugged attractions of Southerndown. Two Vale beaches have blue flag status and four have received seaside awards.

Further information on life in the Vale including the range of services, projects and strategies that operate within the area is available through the more detailed community profile report. A report on each of the community areas is also available. These reports will continue to be developed as work on this assessment continues and once finalised will include a range of the key findings about the community area that have been gathered through this assessment.

### 3.4 Our Environment

One of the Vale's greatest assets is the natural environment and throughout our engagement campaign the importance of the natural environment to our residents' well-being was clear. The environment underpins all aspects of life and is essential to our residents and the area's well-being.

As outlined, in order to assess well-being within the Vale of Glamorgan we have divided the findings of our assessment into three key areas for well-being both now and in the future – Having a Healthy and Active Future, Being Part of Safe and Inclusive Communities and Maximising Opportunities and Attainment. The environment we live in is an essential part of all three of these aspects of well-being and throughout these sections of the assessment it is evident that links to the environment cannot be underestimated. It is therefore essential that we value and protect the environment in order to ensure the well-being of our future generations.

Detailed analysis of the Vale's environmental well-being is contained within our evidence report – 'Our Environment' and within the Natural Resources Wales Report on environmental information for the Vale of Glamorgan PSB (available on request). A number of the key findings are outlined below.

#### **Recognising our environmental assets and heritage**

The Vale benefits from a wide range of environmental resources, some recognised for their value by international and national designations such as the Severn Estuary and the Glamorgan Heritage Coast. There are a large number of national and locally important designated sites of nature conservation value which provide important habitats for local biodiversity including protected species. This includes 27 sites of Special Scientific Interest (SSSIs), 1 Special Protection Area, 2 Special Areas of Conservation, 1 adjoining Special Protection Area (Kenfig National Nature Reserve) and 1 RAMSAR site.

The Vale of Glamorgan Deposit Local Development Plan 2011 - 2026<sup>3</sup> sets out the vision, objectives, strategy and policies for managing growth and development in the Vale of Glamorgan whilst protecting and enhancing the environment.

In addition to helping protect our natural environment, conservation areas ensure residents have access to countryside and areas of green space which are proven to have a significant effect on mental health and overall well-being.

---

<sup>3</sup> <http://www.valeofglamorgan.gov.uk/Documents/Living/Planning/Policy/LDP-2013/01-LDP-Deposit-Plan-Written-Statement-2013.pdf>

## Climate Change

The UK Climate Change Risk Assessment 2017 Evidence Report Summary for Wales highlights a number of key risks for Wales arising from climate change. A number of these risks and the implications for the Vale of Glamorgan have also been identified throughout our assessment. Key risks for Wales include:

- Changes in soil conditions, biodiversity and landscape due to warmer, drier summers
- Reductions in river flows and water availability during the summer, affecting water supplies and the natural environment
- Increases in flooding on the coast and inland, affecting people, property and infrastructure
- Changes in coastal evolution including erosion and coastal squeeze affecting beaches, intertidal areas and other coastline features
- Changes in species including a decline in native species, changes in migration patterns and increases in invasive species
- Increases in the risk of pests and diseases affecting agriculture and forestry. The risk to livestock was a particular concern.

It may be suggested that although the impacts of climate changes pose a number of risks to the Vale of Glamorgan and to Wales as a whole, there are some opportunities that may also arise. For example through the assessment we have highlighted that likely warmer temperatures present an opportunity to promote outdoor recreation and increase physical activity levels. The threat to food markets from climate change also presents an opportunity to promote a fresh and local food environment.

In the well-being survey the responses indicate that Vale residents have concerns regarding climate change and believe that it is our collective responsibility to protect the environment, that is that all public, private and voluntary sector organisations have a part to play in addition to the government and the public themselves. Of the 748 respondents who answered the question about concerns with climate change, 510 were either vary/fairly concerned about climate change.

CO<sup>2</sup> emissions can have a significant impact on the environment and the future of climate change. Emissions in the Vale of Glamorgan increased from 1,250.6 kilotonnes in 2009 to 1,283.6 kilotonnes in 2013. The average CO<sub>2</sub> tonnes per resident in 2013 was 10.1 tonnes compared to 9.6 for Wales. This could be reflected by the higher than average levels of car ownership in the Vale of Glamorgan, in addition more residents commute to work via car than in other areas. The availability of public transport as an alternative was also highlighted throughout our engagement campaign particularly in rural areas of the Western Vale.

## **Managing our waters, seas and coast**

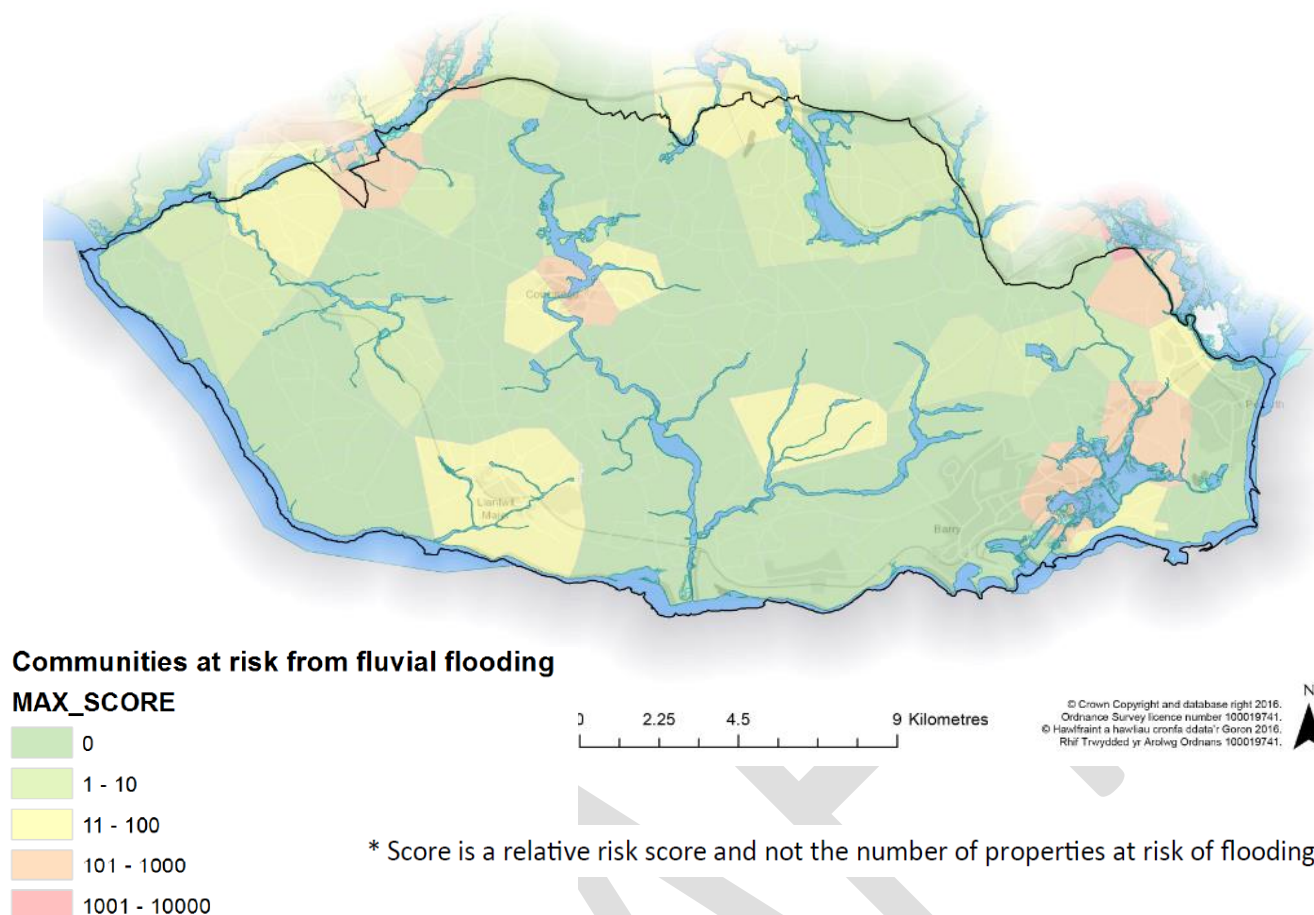

Coasts and seas provide jobs, food and opportunities for recreation which can bring a range of health benefits, energy generation and enjoyment of wildlife, landscape and cultural heritage. In addition, the 2015 GB Tourism Survey found that spending associated with an overnight visit to the Welsh coast amounted to around £800 million, around 41% of total tourism spending in Wales.

Part of the Vale's western coastline is designated as part of the Glamorgan Heritage Coast, the aim is to conserve, protect and enhance undeveloped coastline. The heritage coast also acts as a tourist attraction in addition to being an asset for Vale residents.

Our rivers, lakes, estuaries, coastline and beaches provide us with important natural benefits, many of which contribute to the well-being of local communities and the wider population. Natural benefits include access to drinking water, clean rivers and seas for recreation and relaxation, income generation from business and industry, tourism, green energy production and angling. In the Vale there are four bathing beaches which all pass the EC bathing waters classification. Other beaches and coastal waters are under pressure from a combination of diffuse rural pressures and urban pollution from sewage/misconnections in the developed areas.

Potential rises in sea levels as a result of climate change may pose a threat to our coastal environment as well as towns and villages situated on the coast. The Vale's Shoreline Management Plan paints a picture of erosion and cliff falls causing some small scale recession along the coastline. There is a need for limited long term intervention to prevent erosion in key areas such as Barry. The remainder of the coastline is subject to non-intrusive management to prevent further erosion.

Flooding is the most frequent type of natural disaster affecting homes, business and whole communities with financial consequences and a significant impact on physical and mental well-being. Due to climate change, winter rainfall in Wales is projected to increase by an average of about 14% by the 2050s. Flooding will therefore continue to be a threat to many communities. The communities at highest risk from flooding in the Vale of Glamorgan are Cowbridge, Dinas Powys and parts of Barry. Llantwit Major is also at risk as shown in the following map.

Source: Natural Resources Wales

Increased resilience, the natural environment and well planned developments can help provide resilience to flooding. In 2014 the percentage of properties in the Vale with a high risk of flooding was 0.6 % (Wales 1.1%). Properties with a medium risk were 1.4% (Wales 2%).

### Resilience of Ecosystems

Animals, plants and other organisms and their habitats play many functional roles in ecosystems and the processes which underpin food production, clean water and pollination.

There are a wide variety of habitats in the Vale. There are several nationally important grassland SSSI within the Vale and areas of high biological diversity. The Vale is home to a number of rare and threatened arable weeds and is one of the most important areas for butterflies in Wales as well as containing blocks of nationally important ancient woodland.

Protected sites make a vital contribution to our economic prosperity and are places for scientific research and study. It has been estimated that protected sites contribute £128m annually to the Welsh economy.

## **Greenspaces, Forests, Woods and Trees**

Sustainable use of the natural environment can support social resilience by providing opportunities for interaction and engagement. Green space and trees can contribute to physical and mental wellbeing but are not always located close to the people who need them most. Tree cover in deprived areas tends to be lower and less diverse and this is a pattern that is reflected within the Vale of Glamorgan.

Woodland and trees help regulate our climate, provide income and jobs, store carbon, contribute to reducing flood and low river flow risk, safeguard soils, improve air quality, reduce noise and regulate pests and diseases. They play a major role in pollination, soil formation, nutrient cycling, water cycling and oxygen production which are crucial to support well-being. Woodlands cover only 8.2% of the county which is below the Wales average of 14%. Nationally woodlands are often in poor condition and fragmented.

Studies have shown that there are significant positive associations between mental and physical wellbeing and increased trees and green space in urban areas. For most people social interaction is significant in using local green space. There is also significant community interest in involvement in decision making about local green spaces.

The Let's Talk Well-being Survey asked a range of questions in relation to environmental well-being. Of the answers given to the question of satisfaction with environmental well-being, the highest proportion of answers for being very satisfied was for "access to open space" 416 (55.5%) respondents gave this answer. 386 (53.6%) of respondents answered that they were fairly satisfied with the "quality of the local environment".

Engagement undertaken at events has highlighted that the local environment is important to residents who value proximity to and access to the countryside/seaside and green spaces.

## **Soils and Agriculture**

The environmental benefits of peat in the Vale are not being realised and appropriate management is needed to secure its carbon store, reduce carbon emissions, and restore its characteristic biodiversity in a part of Wales where this resource is very scarce.

Peatland habitats regulate our climate and the water cycle. Deep peat soils are important for mitigating climate change as they take up and store atmospheric carbon.

## **Air Quality**

According to the 2016 Air Quality Progress Report, overall air quality across the Vale of Glamorgan complies with regulations to protect human health and meets the relevant air quality objectives. Evidence shows that Nitrogen Dioxide levels have seen a noticeable

decrease or have remained stable during the 2015 monitoring period. Full details of the ratified data for the Air Quality Monitoring exercise undertaken in 2015 are available.<sup>4</sup>

## **Waste and Cleanliness**

Engagement undertaken at events highlighted that for many people litter/cleanliness and dog mess are issues in the Vale.

The percentage of municipal waste sent for reuse/recycling/composting in the Vale of Glamorgan in 2015/16 was one of the highest rates in Wales and represents a significant improvement on previous year's figures.

In terms of the cleanliness index the figure for the Vale is 70% for 2015/16. The cleanliness index denotes the overall standard of cleanliness of adopted highways and relevant land within a local authority.

The number of fly tipping incidents in the Vale in 2014/15 was 906 which was an improvement on the 2013/14 figure of 1,048. Despite this improvement, fly tipping and littering was the issue that many residents felt was a problem in their area compared to a range of other issues associated with anti-social behaviour.

## **Recreation, Access and Tourism**

There are 544 km of public rights of way including 61 km of the Wales Coast Path. 2% of the Vale's area is access land where people can walk anywhere instead of having to keep to linear paths.

Outdoor recreation can make a significant contribution to physical health and mental well-being and many activities can be free and improve social inclusion. Equitable access to the countryside, water and green space close to where people live is increasingly important, providing health, economic and social benefits and is an essential aspect of having a healthy and active future.

Through the Let's Talk survey respondents were asked to identify why they spend time outside, 571 respondents selected "to enjoy the weather/scenery and wildlife" as the primary reason for spending time outside. Further popular answers selected were; "for health/exercise", 494 respondents selected this answer and "to relax and unwind", 486 respondents selected this answer.

## **Diversity of Landscapes**

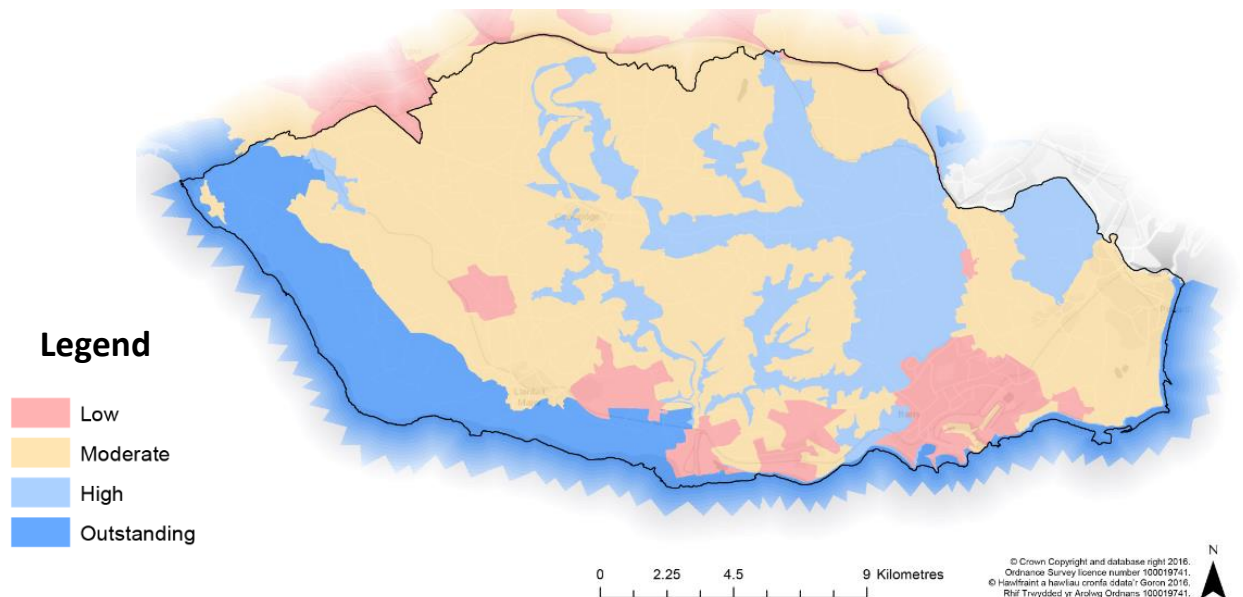

Landscapes are defined by the interrelationships between people, place and resources and reflect the complex diversity, nature and state of a range of natural resources, human

influences, preferences and land use decisions. LANDMAP is an all-Wales landscape information resource where key landscape characteristics, qualities and influences of the landscape are recorded and evaluated. The map below shows the Vale of Glamorgan through this perspective and the quality of the Vale's landscapes.

Source: Natural Resources Wales

### Addressing some of our challenges

Nine of the Vale's LSOAs are within the 10% of most deprived LSOAs within the physical environment domain of the Welsh Index of Multiple Deprivation. This is the domain where the Vale has the most LSOAs in the 10% most deprived LSOAs in Wales.

In response to the survey question regarding environmental well-being in 5 years' time, few respondents, 73 (9.7%) answered that they thought that environmental well-being would improve over the next 5 years. The highest proportion of respondents, 257 (34.2%) answered that they did not know whether environmental well-being would change over the next 5 years

Climate change in addition to increasing mean/average temperatures also increases the frequency and likelihood of extreme weather events. The implications here are that we need to design schemes and ways of living that are able to cope with a wide range of conditions and not simply the projected "average" or "typical". It is important than PSBs work together nationally to address these issues and the next challenge for all partners is rather than consider what the future might look like with regards to the state of the environment, to consider how we might deal with these challenges and protect our natural and built environment given that changes to our climate are almost inevitable at some stage

in the future. It can be suggested that this is the biggest challenge to the PSB in relation to changing the types of questions we ask and consider in relation to our future environment.

More detailed information in relation to the Vale's environment is contained within our detailed evidence report and areas where we need to increase our knowledge and evidence base to improve our well-being assessment are also identified, for example the links between the Vale's natural environment and our agricultural and farming economy.

The information included above helps set the context of the natural environment within which the PSB currently works, how our environment may look in the future, the implications for the well-being of our future generations and how it is essential as a part of our culture and to the three aspects of our well-being assessment – Having a Healthy and Active Future, Being Part of Safe and Inclusive Communities and Maximising Opportunities and Attainment.

## 4. Having a Healthy and Active Future

This section of the assessment focuses on having a healthy start in life, healthy behaviours and care and support.

### 4.1 Headlines

#### What has the data told us?

- Although life expectancy in the Vale of Glamorgan is high overall, differences can be observed between the most and least deprived areas particularly when considering healthy life expectancy. Females in some areas of Barry will experience on average 23 years less life in good health than females in areas of the rural, Western Vale.
- In general, young children across the Vale of Glamorgan show good levels of development in relation to health behaviours when compared to their peers across Wales.
- The percentage of reception age children in the Vale of Glamorgan who are overweight or obese has reduced in recent years and is the lowest rate in Wales, significantly lower than average.
- Levels of obesity for adults is also decreasing although this is still too high with over half the adult population reported as being overweight or obese.
- The percentage of adults who report consuming five or more portions of fruit and vegetables daily in the Vale of Glamorgan is broadly in line with the Welsh average (1% below) and has increased in recent years. The lowest levels of consumption are found in areas of Barry where the highest levels of obesity are also found.
- Consumption of fizzy and sugary drinks by children in Cardiff and the Vale of Glamorgan is higher than in other areas.
- The Vale has an active population with a higher than average percentage of adults 'hooked on sport' and participating more than three times a week.
- Consumption of alcohol is high in the Vale of Glamorgan with the highest levels of binge and heavy drinking amongst adults found in more affluent areas of the rural, Western Vale. However the highest rates of alcohol-specific hospital admissions and mortality rates are found in the more deprived areas in Barry.

## What have you told us?

- The natural environment was consistently highlighted as one of our most valuable assets and plays an important role in keeping Vale of Glamorgan residents active. This is particularly so in the Western Vale where adults are likely to use their natural environment to keep physically active as opposed to visiting a leisure centre or gym.
- Time is the biggest barrier to increased participation in sport for both adults and children.
- The most important factors residents said contributed to having good mental and physical well-being were the built environment and natural environment and access to health services.
- Good access to health care services and GP appointments was seen as one of the most important factors to keep fit and healthy with residents commenting that they would like better access to their GP. This was the case across all areas of the Vale.
- A number of social housing tenants in Barry commented on mental health services as being important in helping maintain good levels of well-being.
- Young people commented that food prices were high which can affect their ability to make healthy choices, older respondents did not raise this issue.
- Key findings from the Population Needs Assessment Engagement work to be included here.

## 4.2 Our Findings

### The State of Health

The factors that influence our health and well-being are wide ranging and best demonstrated through Dahlgren and Whitehead's model below which highlights a causal relationship between individual lifestyle 'choices', social networks, working and living conditions and economic, political and environmental factors, globally, nationally and locally.

The various factors included below can influence our health and well-being in both positive and negative ways and ultimately impact on our life expectancy.

Dahlgren and Whitehead, 1992

Overall life expectancy for residents in the Vale of Glamorgan is higher than average for both males (79.6) and females (83.4). Although differences are observed by gender the biggest variations can be observed by area. This is particularly so in relation to healthy life expectancy which is the average number of years an individual of a given age is expected to live in good health.

The following map shows levels of deprivation across the Vale of Glamorgan according to the Welsh Index of Multiple Deprivation 2014 (WIMD). However it is important to note that an area itself is not deprived: it is the circumstances and lifestyles of the people living there that affect its deprivation rank and it is important to remember that not everyone living in a deprived area is deprived—and that not all deprived people live in deprived areas.

#### Local authority fifths of deprivation, Vale of Glamorgan

Lower Super Output Area

Produced by Public Health Wales Observatory, using WIMD 2014 (WG)  
© Crown Copyright and database right 2016, Ordnance Survey 100044810

As shown above the most deprived areas in the Vale of Glamorgan are found around Barry, particularly in the eastern area of the town including the wards of Gibbonsdown, Castleland, Buttrills, Cadoc and Court. Pockets of high deprivation levels also found in parts of Penarth and in St. Athan.

In the Vale of Glamorgan, average life expectancy for males in the most deprived areas is 7.6 years less than those in the least deprived areas. Similarly, females in the most deprived areas live on average 9.5 years less than those in the least deprived areas.

Differences in healthy life expectancy are even starker and this inequality gap in healthy life expectancy is the largest in Wales for females and one of the largest for males.

Males in the least deprived areas of the Vale can expect to live on average for 20.9 more years in good health compared to those in the most deprived LSOAs. When compared to previous figures the inequality gap in healthy life expectancy for males has slightly narrowed in the Vale with further analysis by deprivation fifth suggesting that the narrowing inequality gap for males can be attributed to a reducing number of healthy years for those in the least deprived LSOAs as opposed to increasing healthy life expectancy in more deprived LSOAs.

The differences in healthy life expectancy between areas of the Vale are even starker for females, with those in the least deprived LSOAs experiencing 23.4 more years of life in good health compared to those in the most deprived LSOAs. This inequality gap in healthy life

expectancy for females in the 2010-14 period is the largest observed across Wales which is a cause for concern.

As opposed to males, the inequality gap for healthy life expectancy in females has considerably increased in 2010-2014 compared to the 2005-09 period which can be attributed to a decreasing number of years in good health in the most deprived LSOAs and an increasing number of years in good health in the least deprived LSOAs.

### Comparison of life expectancy and healthy life expectancy at birth, with Slope Index of Inequality (SII), Vale of Glamorgan, 2005-09 and 2010-14

Produced by Public Health Wales Observatory, using PHM & MYE (ONS), WHS & WIMD 2014 (WG)

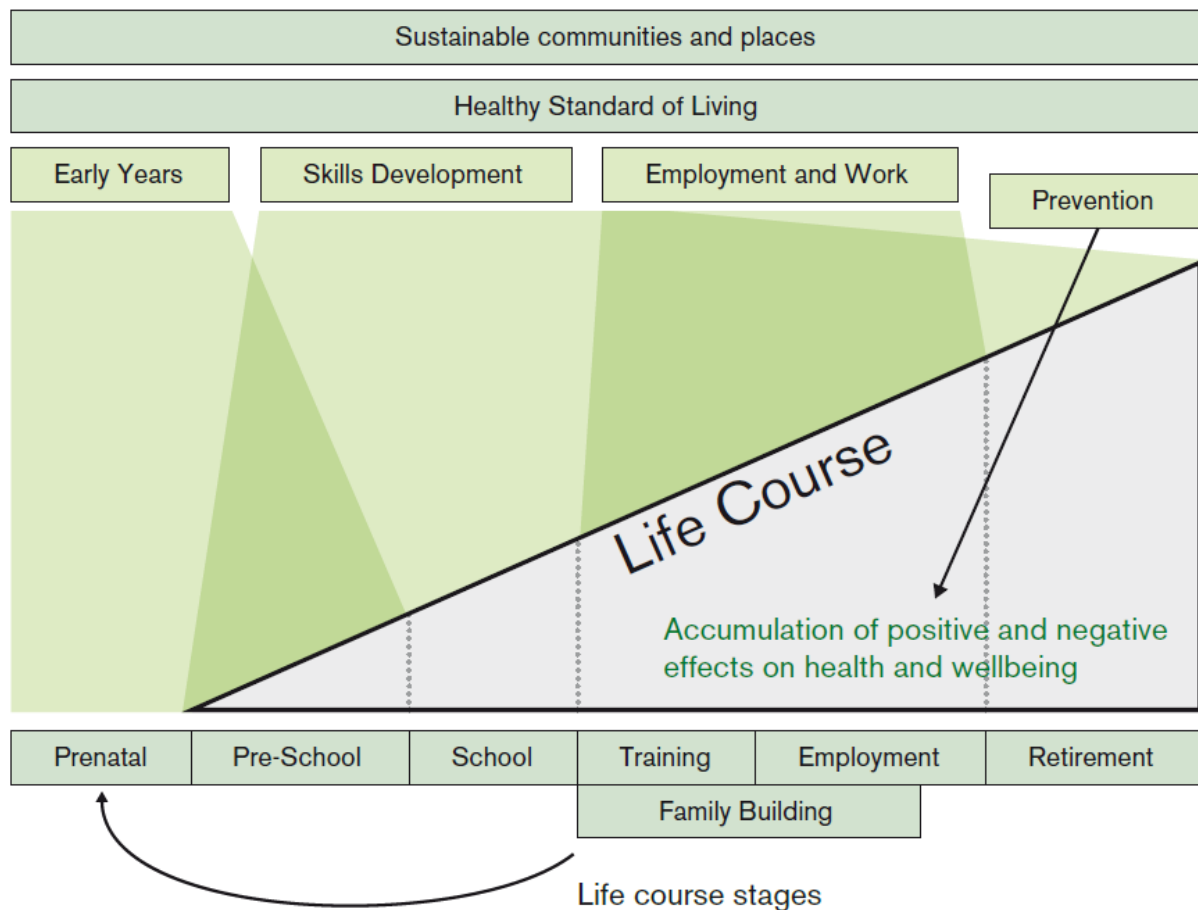

As demonstrated through Dahlgren and Whitehead's model, there is a wide range of determinants influencing our health and well-being which will affect the number of years we can expect to live in good health. Increasing healthy life expectancy and reducing health inequalities is therefore key in not only bringing about health benefits to the individual but a wide range of other benefits to increase well-being. For instance good health will allow an individual to continue to work improving both their own economic well-being but also contribute the local area's economy, in addition those in good health will place less economic demand on health services.

To reduce the stark inequalities observed between areas of the Vale of Glamorgan, the PSB has considered a wide range of information throughout this assessment including lifestyle behaviours in order to better understand the reasons for the large inequality gap observed.

## A Healthy Start

The Marmot Review highlighted that disadvantage starts “before birth and accumulates throughout life. Action to reduce health inequalities must start before birth and be followed through the life of the child. Only then can the close links between early disadvantage and poor outcomes throughout life be broken”<sup>5</sup>

In order to ensure children in the Vale of Glamorgan have the best start in life it is important to consider maternal health before, during and after pregnancy. A range of lifestyle behaviours have been considered including behaviours during pregnancy. In general, the Cardiff and Vale area observes a low percentage of women who engage in harmful behaviours such as drinking alcohol, smoking and using other substances whilst pregnant which can lead to babies being born with a low birth weight.

<sup>5</sup> Fair Society, Healthy Lives, the Marmot Review 2010.

<https://www.instituteofhealthequity.org/projects/fair-society-healthy-lives-the-marmot-review/fair-society-healthy-lives-executive-summary.pdf>.

Low birth weight is defined by the World Health Organisation as less than 2,500 grams and having a low birth weight can be linked to problems later in life including an increased risk of chronic disease. The Vale of Glamorgan observes a lower than Welsh average rate of low birth weight babies although area differences can be observed. LBW can be considered a key predictor of health inequalities and in the Vale of Glamorgan areas with lower healthy life expectancy observed earlier also have a higher rate of low birth weight babies than both the Vale and Welsh averages.

When considering a range of indicators relating to health in the early years other key findings for the Vale of Glamorgan include:

- The rate of teenage conceptions is consistently low for under 16s, under 18s and under 20 year olds.
- The percentage of all children up to date with immunisations by age four has fallen over recent years, this follows national trend. The Vale remains above the Welsh average. The percentage up to date with vaccinations at age 4 is slightly lower in areas covered by the Flying Start compared to the Vale as a whole.
- The percentage of children aged 4 – 5 overweight or obese has declined in recent years and is an area where we are ‘turning the curve’ when compared to the national trend which has remained steady. However, Public Health Wales highlight that this rate is still higher than it should be in order to protect the health of future generations.

Public Health Wales has launched its 10 Steps to a Healthy Weight initiative which provides key information on reducing obesity in children, addressing issues from pre-conceptual planning and breastfeeding to healthy eating advice and guidance on increasing physical activity and limiting screen time.

The Healthy and Sustainable Pre-School Scheme is aimed at all pre-school childcare provision, including nurseries, playgroups, child minders and family centres. The scheme aims to actively promote health in the following areas; nutrition and oral health, physical activity and active play, safety, hygiene, mental and emotional health, wellbeing and relationships, environment, workplace health

There are currently 20 pre-school settings in the Vale that are either working through or have completed, the Nutrition and Oral Health module.

- There are also differences observed within the Vale of Glamorgan as shown below. Areas to the east of Barry display the highest levels of reception aged children who are obese.

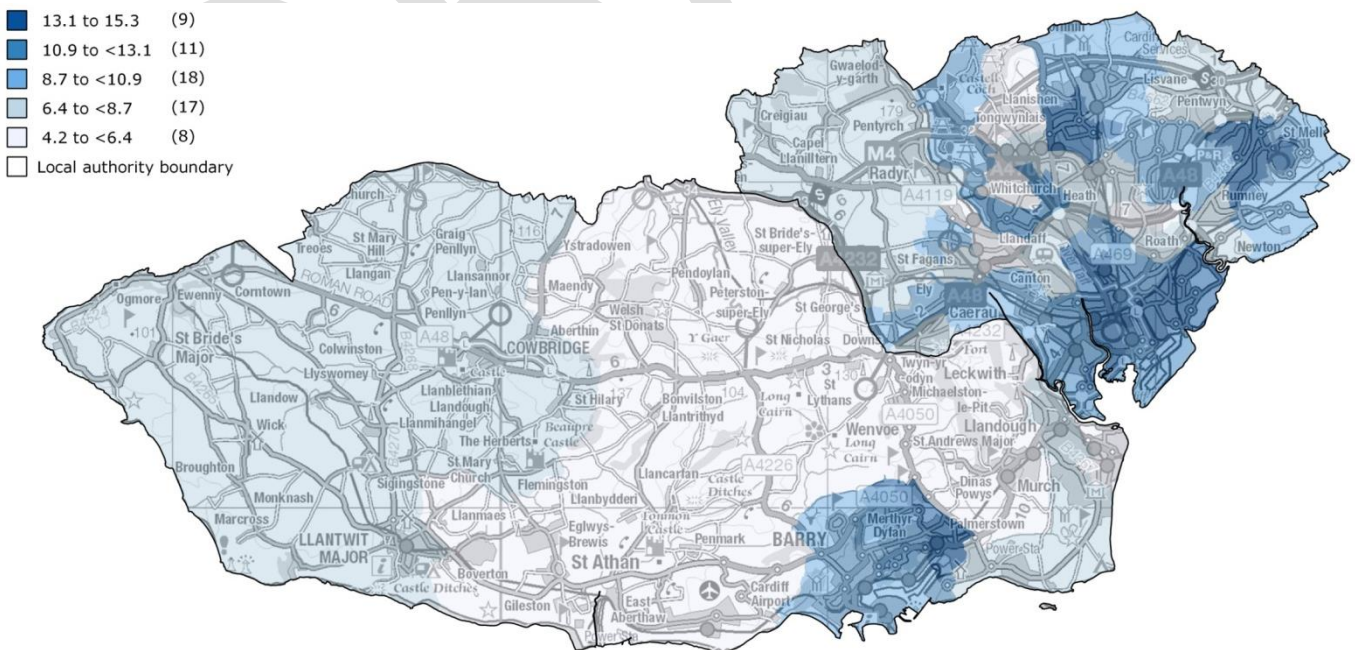

% of children aged 4 - 5 who are overweight or obese

	The Vale of Glamorgan	Wales
AY 11-12	25.3	28.2
AY 12-13	22.1	26.2
AY 13-14	21.0	26.5
AY 14-15	17.0	26.2

Source: Public Health Wales

### Percentage of children aged 4 to 5 years who are obese, Cardiff and Vale UHB MSOAs, Child Measurement Programme for Wales, 2012/13-2014/15

Due to smaller sample sizes at MSOA level, caution should be taken when making comparisons between areas.

Produced by Public Health Wales Observatory using CMP data (NWIS)  
© Crown Copyright and database right 2015. Ordnance Survey 100044810

- The most recent data available in relation to the average number of decayed, missing or filled teeth in children aged 5 years for 2014-15 showed the Vale of Glamorgan to have the lowest rate in Wales of 0.7. This has reduced in recent years with an average of 0.92 observed in 2007-08 and 0.91 observed in 2011-12. The Vale is therefore significantly below the Welsh average of 1.29.

**Decayed, missing or filled teeth (dmft), average, children aged 5 years, Wales and local authorities, 2014-2015**

Please consult the technical guide for full details on how this indicator is calculated. Produced by Public Health Wales Observatory, using Welsh Dental Survey (WOHIU)

- However differences can be observed within the Vale and the average number of children aged 5 with decayed, missing or filled teeth was higher in the Barry area than the Eastern or Western Vale.
- In 2015/16 in the Vale of Glamorgan the percentage of Foundation Phase children reaching the expected development outcome or above across all areas of development was the highest across the Central South Education Consortium Area and was the 2<sup>nd</sup> highest in Wales behind Monmouthshire. The Vale performed particularly well in relation to Maths, where the Vale ranked first in Wales. However the difference in performance between those children entitled to Free School Meals and those not entitled at the Foundation Phase has been highlighted as an area for improvement.

Generally young children in the Vale have a good level of well-being, however, as is often the case, Vale of Glamorgan level data often masks inequalities within the county and this is true for a range of indicators in relation to young children's health and development.

In addition to evidence relating to young children themselves, it is important to consider the wide range of social, economic, cultural and environmental factors which influence life chances, or the 'wider determinants of health and well-being' as discussed earlier. Experiences at a young age not only affect the life chances of our current future generation but the generations they will go on to bear themselves.

The wide range of data considered within our assessment can all be linked to affecting young children's experiences and opportunities both for now and into the future.

The Public Health Welsh Adverse Childhood Experiences (ACEs) Study<sup>6</sup> highlights that "children who experience stressful and poor quality childhoods are more likely to adopt health-harming behaviours during adolescence which can themselves lead to mental health illnesses and diseases such as cancer, heart disease and diabetes later in life. Adverse Childhood Experiences are not just a concern for health. Experiencing ACEs means individuals are more likely to perform poorly in school, more likely to be involved in crime and ultimately less likely to be a productive member of society."

Adverse childhood experiences are defined as stressful experiences occurring during childhood that directly harm a child (e.g. sexual or physical abuse) or affect the environment in which they live (e.g. growing up in a house with domestic violence, alcohol abuse, drug use etc.).

The study of the Welsh adult population highlights that those who experienced 4 or more ACEs, when compared to those who didn't experience ACEs are more likely to undertake health harming behaviours.

Compared with people with no ACEs, those with 4+ ACEs are:	
4	times more likely to be a high-risk drinker
6	times more likely to have had or caused unintended teenage pregnancy
6	times more likely to smoke e-cigarettes or tobacco
6	times more likely to have had sex under the age of 16 years
11	times more likely to have smoked cannabis
14	times more likely to have been a victim of violence over the last 12 months
15	times more likely to have committed violence against another person in the last 12 months
16	times more likely to have used crack cocaine or heroin
20	times more likely to have been incarcerated at any point in their lifetime

<sup>6</sup> <http://www.cph.org.uk/wp-content/uploads/2016/01/ACE-Report-FINAL-E.pdf>

Therefore reducing ACEs in future generations could significantly improve the health and well-being of our population. The PSB has therefore considered a range of indicators relating to healthy behaviours.

## **Healthy Behaviours**

### **Smoking**

The percentage of adults who report being a smoker in the Vale of Glamorgan is one of the lowest rates in Wales and the rate of adults smoking in the Vale has been below the Welsh average for a number of years. However the most recent data available for 2014-15 shows that the percentage for the Vale of Glamorgan has reached a plateau.

The Public Health Wales Observatory has produced a number of projections for a range of indicators in order to shift attention from describing the past to considering the future.

This includes projections for the estimated percentage of adults reported to be current smokers up until 2025. However when considering these projections it must be considered that health is a complex composite of many individual elements. Although we cannot rely on predictions to tell us what the future will be, we can use the past patterns to describe what might happen if in the future we continue down the same path.

Cardiff and Vale UHB level projections show that although the percentage of female smokers aged 45-64 has been consistently below Welsh average until the 2013-2015 period, the percentage of female smokers in this age group are increasing and set to remain higher than the Welsh average in 2025 unless current trends are changed.

Although the percentage of children aged 11-16 who reported as being a smoker in the Cardiff and Vale area is lower than in other parts of Wales, there are marked differences between sexes with girls more likely to report smoking than boys. However in relation to children and young people who report being a smoker, the Welsh Government 'Understanding Wales' Future' Report highlights that although the percentage who smoke tobacco is falling, Welsh 15 year olds generally compare poorly with 15 year olds in other European countries in terms of healthy lifestyles. It is important therefore to consider that although the Cardiff and Vale UHB level figures may compare favourably to the Welsh average, this national level average may not be a good indication of whether low smoking rates for children in the Vale can truly be considered successful.

Data collected by research into behavioural insights of young people and smoking carried out by Cardiff Metropolitan University in 2015 has shown that the strongest predictive factor of taking up smoking is whether the mother smokes. The next influencing factors are whether their friends smoke or vape and whether they reside in lower socioeconomic areas. There was no association between education on smoking and smoking behaviour and the

perception of harm. The findings also highlighted that young people who had not smoked previously were using e-cigarettes.

The use of e-cigarettes is high in the Cardiff and Vale UHB area for both adults and children aged 11-16 with the research conducted by Cardiff Metropolitan University suggesting that young people are confused by the mixed messages around e-cigarettes as Government messages imply they are less harmful than tobacco and are easily accessible.

### **Drinking Alcohol**

Harmful levels of alcohol consumption are associated with both short and long term health and social effects on individuals, families and communities. A binge drinking culture is often associated with anti-social behaviour - theft, abuse, violence and unwanted pregnancy as much as it is with ill-health. It is potentially a significant issue for the well-being of individuals and communities. The costs and social consequences are therefore multiplied.

Alcohol consumption across the Vale of Glamorgan and Cardiff and Vale UHB area for adults is higher than levels observed elsewhere in Wales. Analysis by age group and sex shows that the percentage of males and females aged 16-24 who drink above guidelines, binge and heavy drink are in line with each other. For all age bands over 25, consumption in males is higher than females.

This information is recorded through the Welsh Health Survey and it is therefore likely that some respondents will underestimate the amount of alcohol consumed. As highlighted by the Public Health Wales Observatory, survey data on alcohol consumption is known to be underestimated and likely to only capture about 60% of actual consumption.

Area based analysis shows that levels of binge and very heavy drinking amongst adults are highest in the more affluent areas of the Vale particularly rural areas in the Western Vale. According to a recent study undertaken by the NHS Information Service, people in executive professions are more likely to drink alcohol daily above recommended unit guidelines. In 2012, "17% of the adult population working in managerial and professional households had an alcoholic drink on five or more days in the past week, in comparison to 11% of adults in routine and manual households". It is now being recognised that professional or middle class drink problems exist with often greater quantities consumed 'behind closed doors' and this pattern is evident within the Vale of Glamorgan.

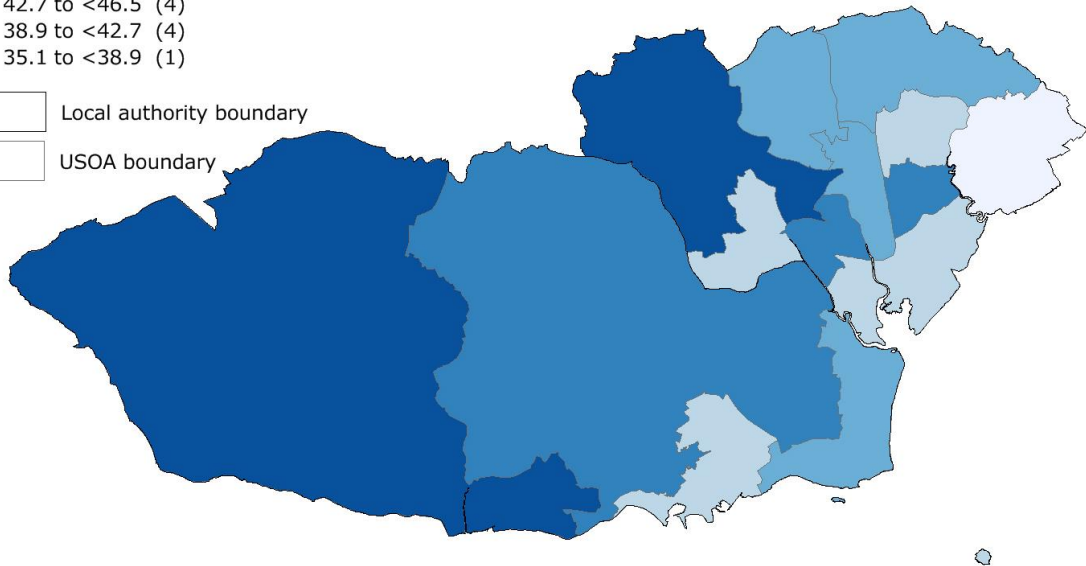

**Percentage of adults reporting drinking above guidelines (males over 4 units, females over 3 units) on the heaviest drinking day in the past week, Cardiff and Vale UHB, 2008-12**

USOA, age-standardised percentage\*

- 50.3 to 53.9 (2)
- 46.5 to <50.3 (3)
- 42.7 to <46.5 (4)

© Crown Copyright and database right 2014. Ordnance Survey 100044810

*(Note: These figures refer to pre-2016 guidelines which were that males should not drink more than 3-4 units per day, and females not more than 2-3 units per day. New weekly guidelines were issued by the Department of Health in January 2016.)*

However, the Marmot Review highlights that “while people with lower socioeconomic status are more likely to abstain altogether, if they do consume alcohol, they are more likely to have problematic drinking patterns and dependence than people higher up the scale.” This can be evidenced in the Vale of Glamorgan in relation to alcohol-specific hospital admissions and alcohol-specific mortality rates which show a higher rate around the more deprived areas within Barry.

Data from the Health Behaviour in School-Aged Children study shows that the percentage of children aged 11-16 using alcohol at least once a week is the joint lowest in Wales in the Cardiff and Vale UHB area. This is also true when considering this data by gender although there is a higher percentage of boys who report using alcohol than girls across Cardiff and the Vale.

A report by the Wallich in 2014 ‘Alcohol and Older People’ researching the use of alcohol by older people across Cardiff and the Vale of Glamorgan revealed that there are a significant number of older people (aged 60+) demonstrating potentially hazardous alcohol use (17.7% of the sample group, which is approximately 16,902 people when extrapolated). Of these,

3,342 people could be drinking at a level which would suggest that they should engage with a treatment service.

### **Substance Misuse**

The top 3 most prevalent substances used in Cardiff and the Vale of Glamorgan continue to be alcohol, cannabis and heroin with alcohol by far the most prevalent substance.

Recent data shows that drug related deaths have increased in the Vale of Glamorgan and tackling this is a key responsibility of the Area Planning Board (APB). The APB has a Commissioning Strategy and Action Plan in place to address these findings.

The APB has recognised a number of factors to take into account when planning future services including an increasingly older population, a larger population due to new developments planned through the Local Development Plan and the need to consider new innovative technology and social media to help promote and deliver some services.

### **Immunisations**

Vaccination is a safe and effective way to prevent life-threatening and disabling illnesses. For many diseases, when around 95% of a population is fully immunised, the spread of disease can be significantly reduced. This is the so called 'herd immunity'. Targets for the uptake of many childhood immunisations are therefore set at 95% and are part of the Tier 1 target for the NHS in Wales.

To protect future health it is important that all babies, children and young people are immunised against vaccine preventable diseases. In the Vale of Glamorgan the percentage of all children up to date with immunisations by age four has fallen over recent years from 91.6% in 2010-11 to 88.1 in 2014-15. This follows the same trend that has been observed nationally where the percentage has decreased slightly in recent years although the Vale remains above the Welsh average.

Data for 'children in need', that is children who receive social services from their local authorities, including children looked after by local authorities and those on the Child Protection Register, shows that for 2015, of the 480 children immunisation data was available for, 430 were up to date with the immunisations they should have received based on their age group.

In addition to vaccinations for children and young people, influenza vaccinations are offered on an annual basis to adults over 65, those considered to be in 'at risk' groups and health and social care professionals. Data for 2015-16 shows that uptake rates for flu vaccinations in the Vale of Glamorgan for over 65 year olds are slightly above the average rate for the Cardiff and Vale UHB area and the Welsh average.

However uptake rates for Vale of Glamorgan patients aged under-65 in 'at-risk' groups are in line with the Welsh average and remain considerably below target levels. The rate in the Vale of Glamorgan for 2015-16 of 46.8% has decreased from uptake rates observed in previous years with a rate of 49.2% being recorded in 2014-15 and 53.4% being recorded in 2013-14. The falling uptake rates in this group are a concern at a national level and particularly in the Vale of Glamorgan.

Uptake rates for both adult and childhood vaccinations vary significantly within the Vale of Glamorgan with consistently lower uptake rates observed in the Western Vale. Increasing rates in this area has been identified as a priority through GP Cluster Plans.

### **Obesity**

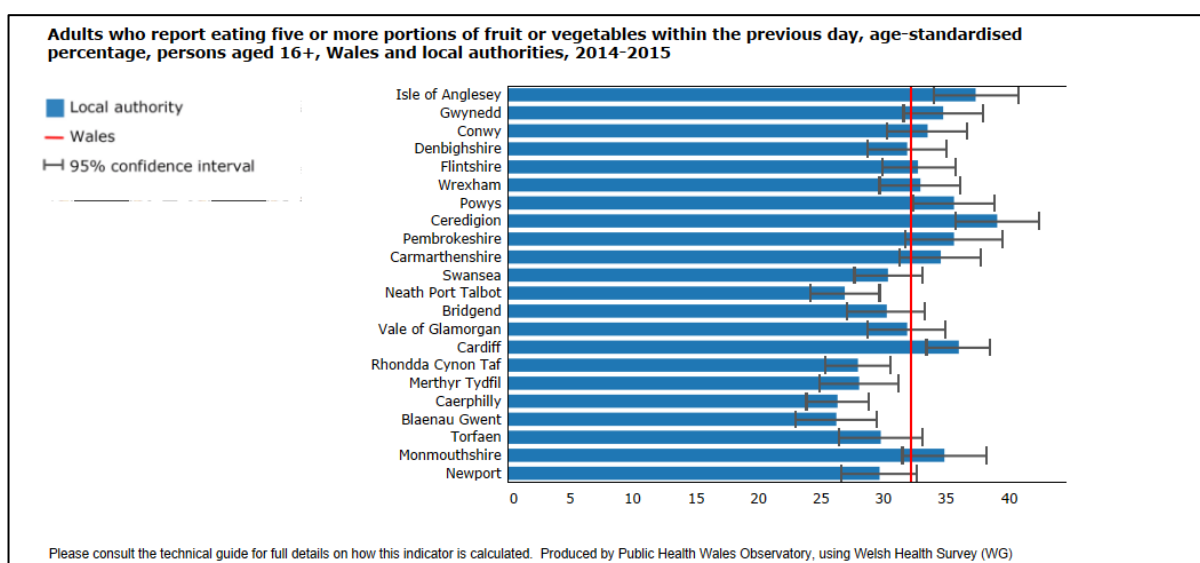

Obesity, in addition to causing obvious physical changes, can lead to a number of serious and potentially life-threatening conditions such as type 2 diabetes, heart disease, cancer and stroke. Obesity can also affect quality of life and lead to psychological problems such as depression and low self-esteem. It is therefore clear that becoming overweight/ obese can have huge implications for a person's well-being.

Overall the level of obesity in the Vale of Glamorgan is decreasing for both adults and children and is below the Welsh average, despite this in 2014/15 just over half (52%) of adults in the Vale were still classed as overweight or obese. Inequalities can also be observed within the Vale of Glamorgan with the more deprived LSOAs within Barry displaying a higher number of adults who are overweight or obese.

### **Healthy Eating**

In order to maintain a healthy weight eating a balanced diet is essential. Although not the only contributory factor to having a healthy diet, eating 5 or more portions of fruit and vegetables daily is key to achieving a healthy balanced diet. The World Health Organisation recommends eating a minimum of 400g of fruit and vegetables a day to lower the risk of serious health problems, such as heart disease, stroke and some cancers.

Welsh Health Survey results for 2014-15 show that in the Vale of Glamorgan 31.9% of adults reported eating five or more portions of fruit and vegetables on the previous day. This is in line the Welsh average of 32.2. The Vale ranks 12<sup>th</sup> in Wales with the highest levels of consumption observed in Ceredigion (39.1) although the percentage for the Vale has increased in recent years as shown in the following charts.

The lowest levels of consumption are found in Barry and this corresponds to the same LSOAs that are the most deprived as according to WIMD 2014, these areas also correspond to those where the highest levels of obesity are found.

The Marmot Report highlights how “low income and area deprivation are both barriers to purchasing fresh or unfamiliar foods, while lower income households are the harder hit by food price fluctuations.” In order to try and address these issues the Cardiff and Vale Eating Well Action Plan identifies the key partnership actions required to support the population to eat a varied and balanced diet to improve their health and well-being. The aim of the plan is to develop and deliver actions that support more deprived communities to eat more healthily, therefore increasing the number of children and adults who are within the normal weight range, thus contributing to reducing inequalities in health.

Consumption of fizzy and sugary drinks by children in Cardiff and the Vale of Glamorgan is higher than in other areas, with approximately 1 in 5 children aged 11-16 drinking sugary drinks such as Coke at least once a day. Similarly the percentage eating sweets once or more a day is also above the Welsh average.

The findings from the Health Behaviours in School-aged Children survey results for consumption of sugary drinks across the Cardiff and Vale UHB area are also backed up at a local level by the School Survey that was undertaken in the Vale of Glamorgan in 2013. Results from this survey shows that from various categories of 'junk food', fizzy drinks are the item children are most likely to report consuming 5 or more times a day.

Our detailed evidence report sets out a range of initiatives in place in order to help create a healthier food environment in the Vale of Glamorgan which can be seen as essential in helping to improve our residents' well-being. For example the Vale of Glamorgan Local Development Plan Health Impact Assessment 2013 identifies the positive health effects that come from protecting allotments. In relation to considering healthy eating in the future, the Health Impact Assessment also takes into account and recognises the potentially negative effects from change of use proposals which would involve the creation of hot food takeaways in retail centres.

The UK Climate Change Risk Assessment (CCRA) 2017 Evidence Report – Summary for Wales<sup>7</sup> identifies a number of risks for Wales that may arise from climate change. A number of risks in relation to Wales' food environment are identified as follows:

- Risks from weather-related shocks to international food production and trade
- Imported food safety risks
- Risks and opportunities from long-term, climate-related changes in global food production

The CCRA identifies that "food security encompasses availability, price and access to a healthy diet. The key issue surrounding food security in Wales, as it is for the rest of the UK, is not an absence of food, but issues related to price."

Our evidence shows that those in the more deprived areas of the Vale of Glamorgan eat less fruit and vegetables than those in the least deprived areas. It may be suggested that the consumption of fresh fruit and vegetables in these areas is affected by the affordability of such products compared to cheaper convenience foods. In addition data shows that those in the most deprived areas are less likely to own a car and be able to travel to purchase such products, this can therefore leave no option but to rely to more expensive 'corner shops' where availability of fresh produce can be limited.

---

<sup>7</sup> <https://www.theccc.org.uk/wp-content/uploads/2016/07/UK-CCRA-2017-Wales-National-Summary.pdf>

Therefore price rises relating to climate change pose a further risk to the Vale's food environment but present an opportunity to champion a 'fresh and local' agenda. The Cardiff and Vale Public Health team has recently established a Vale Food Network and an action plan is being drafted. The network will work towards achieving a 'Sustainable Food Cities Award' and will refresh a previously undertaken exercise to map good food assets that exist in the Vale. For example the Food Co-op run by residents of the Ty Iolo Hostel in Barry, where individuals can buy reduced price fresh fruit and veg from a local supplier.

## **Physical Activity**

In addition to healthy eating being physically active can have a large impact on levels of obesity along with bringing a wide range of other health benefits and contributing to a person's well-being

The percentage of adults meeting physical activity guidelines in the Vale of Glamorgan is slightly below average. However in relation to participation in sport the Vale has an active population with a higher than average percentage of adults 'hooked on sport' which is defined as participating three or more times a week. Males are more likely to participate than females and Welsh speakers are also much more likely to participate in sport than non-Welsh speakers. When asked whether they had participated in sport in the last 4 weeks, 93.8% of respondents to the Sport Wales Active Adults Survey 2014 from Cardiff and the Vale who were Welsh speakers responded that they had compared to 78.8% of respondents who don't speak Welsh. A similar trend is observed across other areas of Wales.

Boys are also more likely to be active than girls. However it is pleasing that girls in the Vale are less likely to become disengaged with sport as they grow older with the percentage of girls 'hooked on sport' in the Vale remaining the same for both primary and secondary school pupils. This decreases for girls in secondary schools in other areas.

The natural environment plays an important role in keeping Vale residents active particularly in relation to the Western Vale where adults are likely to use their natural environment to keep physically active as opposed to visiting a leisure centre or gym. More children in the Vale have participated in water based activities compared to the Welsh average which highlights how our natural environment can be used to promote a healthy and active lifestyle so long as this is done in a sustainable manner.

The Vale of Glamorgan has a wealth of natural assets including the sea, beaches, country parks, lakes, woodland areas and includes seven green flag parks which can enhance well-being. The Marmot Report highlights how "numerous studies point to the direct benefits of green space to both physical and mental well-being. Green spaces have been associated

with a decrease in health complaints ...improved mental health and reduced stress levels, perceived better general health and the ability to face problems.”

This is reflected in the findings of the Active Adults Survey 2014 which found that across Wales those with a physical or mental condition were more likely to have visited the countryside or the seaside/ coast than taken part in any other type of physical activity. This again emphasises the importance of utilising the Vale’s natural assets in a sustainable manner to improve well-being. During our engagement campaign, many residents commented on the Vale’s parks and beaches as being important to both their mental and physical well-being and how things such as walking the dog on the beach were so important in keeping them active.

The use of the natural environment to promote physical activity is recognised in the CCRA Summary for Wales with increased opportunities for outdoor activities arising from warmer temperatures. The CCRA states “Climate change is increasingly recognised as a factor that may influence the recreational use of outdoor environments. The effects of climate change on outdoor recreation have only recently been studied in detail, and very little evidence is available for the UK. Climate change would have differing impacts depending on the activity. For example, the number of people partaking in certain outdoor recreational activities-such as boating, golfing and beach recreation is estimated, under medium emissions scenarios, to increase by 14 to 36% in the next few decades.” However as stated, evidence at a UK level is limited at present and other associated risks of climate change on our natural environment and its use as an asset should not be ignored.

Our engagement showed that time is the biggest barrier to increased participation in sport for both adults and children.

The Natural Resources Wales Welsh Outdoor Recreation Survey 2014<sup>8</sup> highlights how demographics have a greater impact on participation in physical activity than deprivation does. This is reflected in the Vale of Glamorgan where there is a less clear link between deprivation and lower levels of physical activity whereas there is a much stronger link for other poor health behaviours such as higher levels of obesity, smoking and lower levels of consumption of fruit and vegetables in more deprived areas. The most deprived areas of the Vale are found around Barry where there is the highest concentration of sports clubs and facilities to allow for participation. However, ill health being a barrier to participation in sport is more common in the more deprived LSOAs within Barry which is a likely result of other unhealthy lifestyle behaviours.

Levels of physical activity were also found to be lowest in parts of the Eastern and Western Vale where there is an older population who are less likely to be physically active,

---

<sup>8</sup> <https://naturalresources.wales/media/4757/wales-outdoor-recreation-survey-2014-final-report.pdf>

supporting the above that demographic factors have more influence on activity levels than deprivation.

## Play

Article 31 of the United Nations Convention on the Rights of the Child, states that “Children have the right to relax and play, and to join in a wide range of cultural, artistic and other recreational activities.”

Play is the means by which children explore their environment, their world, their roles and relationships; supporting positive mental health in our future generations.

Play can have a big effect on a child’s development including on a range of other healthy lifestyle behaviours and is particularly linked to physical activity in keeping children healthy and active. In order to assess play within the Vale of Glamorgan, in 2016 the Vale of Glamorgan Council undertook a Play Sufficiency Assessment (PSA).

The Vale of Glamorgan Play Sufficiency Assessment 2016 found that there has been a decline in the number of structured play activities offered in the Vale of Glamorgan due to increasing funding pressures. The use of natural assets and increasing our communities understanding of areas where people perceive children can play and what ‘play’ really means is seen as essential in future planning of provision.

Sustainable use of natural assets to facilitate play is essential to future planning of play activities across the Vale. Similarly more involvement from local individuals and community groups can be seen as a solution to increasing budget pressures. An example of this already happening is in St. Athan where an extensive asset mapping project to identify the services in the area was undertaken by the Creative Rural Communities partnership. The project considered not only physical assets but the community networks in the area which could prove invaluable in helping to identify alternative ways of delivering non-statutory services and through detailed engagement with residents identified that better play areas were one of the services most residents felt was needed in St. Athan. The Friends of St Athan Play Areas community group was established and are working in partnership with the Council’s Play Development Officer to increase their knowledge around the delivery of play activities and the volunteers are receiving informal mentoring to assist them with developing play provision in the area.

There are already a range of examples of activities being promoted in the Vale utilising the natural assets found in the area. Llantwit Major Town Council, Penarth Town Council and Wick Community Council have funded Play Ranger sessions in their respective areas which encouraged children, young people and their families to utilise the outdoor space in their communities for outdoor play. It is hoped this type of provision will encourage them to continue to use the fantastic natural resources the Vale has to offer to undertake play

without the support of play staff. Low cost initiatives are also being undertaken in more built up areas of the Vale in order to promote play and develop more sustainable, free or low cost provision such as the Wheelie Bin project.

## **General Health and Social Care**

The Cardiff and Vale Integrated Health and Social Care partnership (IHSCP) is currently undertaking a Population Needs Assessment (PNA) as required by the Social Services and Well-being Act 2014 to understand the care and support needs of the local population. This assessment will be published in April 2017 and will complement the information in the well-being assessment.

The Population Needs Assessment is a statutory requirement and must consider the care and support needs of the following population groups.

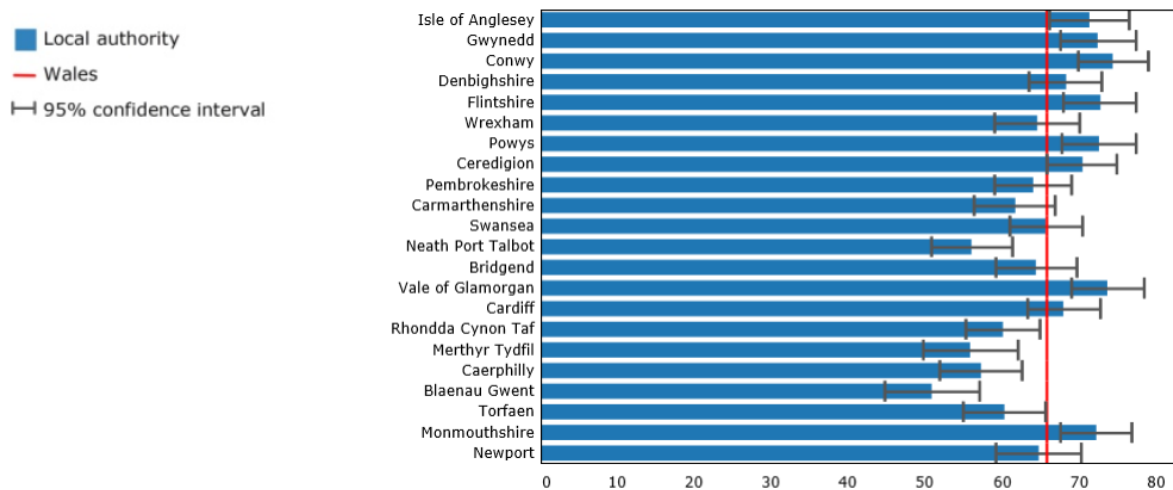

- Children and Young People
- Older People
- Carers
- Mental Health
- Violence against women, domestic abuse and sexual violence
- Sensory Impairment
- Health and Physical Disability
- Learning Disability and Autism

In addition the assessment will consider the needs of veterans, offenders and asylum seekers and refugees recognising that there are a diverse range of needs across our communities.

As part of the assessment extensive engagement has been undertaken and a wide range of data considered and together this will provide a detailed picture of need within the area and the assets that we can build on. As this work is still in progress it has not been possible at this stage to integrate the key findings in to the well-being assessment. However it is likely that some of the emerging issues around engagement and inequalities will be common themes in both assessments. The PSB and the IHSP will work together to delivering agreed priorities and support partnership activities as appropriate. It is envisaged that prior to the publication of the well-being assessment in April 2017 that the PSB will have had the opportunity to consider the key findings of the PNA in detail and incorporate them in to the well-being assessment and it's forward planning.

In general older people in the Vale report being in relatively good health as shown below, however as has been the case throughout this section, there are area differences that can be observed.

**Older people who reported being in good, very good or excellent health, age-standardised percentage, persons aged 65+, Wales and local authorities, 2014-2015**

Please consult the technical guide for full details on how this indicator is calculated. Produced by Public Health Wales Observatory, using Welsh Health Survey (WG)

As explored earlier, overall life expectancy when considered at a local authority level is relatively high. The Vale of Glamorgan has a statistically significantly lower mortality rate than the Welsh average. This is the case when considering mortality rates across all ages and in under 75s only.

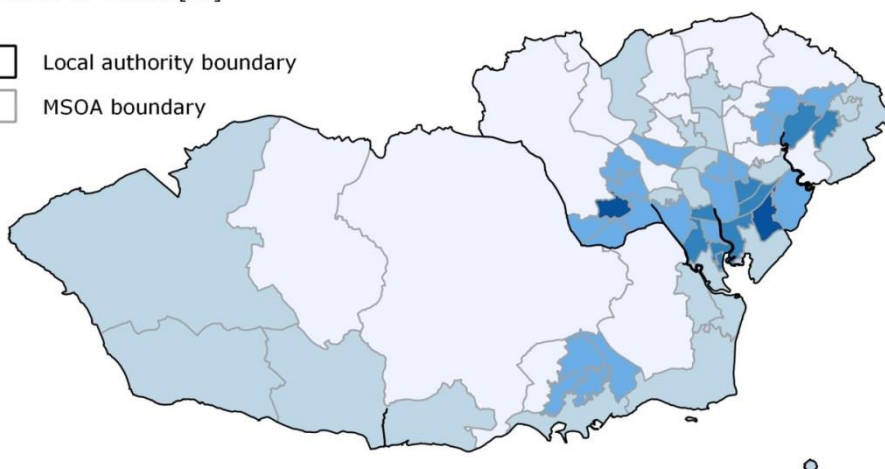

The following map showing all-cause mortality rates in persons under 75 again shows a higher rate concentrated within the eastern areas of Barry. This may be linked to poorer health caused by the various lifestyle factors considered above.

**All-cause mortality, persons, under 75, Cardiff and Vale UHB, 2012-2014**

MSOA, European age-standardised rate per 100,000

© Crown Copyright and database right 2016, Ordnance Survey 100044810

GP cluster level data is available in relation to the prevalence of seven chronic conditions identified by Welsh Government as having a high impact on services - chronic obstructive pulmonary disease, asthma, coronary heart disease, heart failure, hypertension, epilepsy and diabetes. The Central Vale GP Cluster area which includes surgeries located within the most deprived areas of Barry generally shows a higher prevalence of chronic diseases when compared to the Eastern and Western Vale GP cluster areas. This may be attributed to the higher rates of unhealthy lifestyle behaviours observed in this area as considered earlier demonstrating the importance of improving healthy lifestyle behaviours to improve health in these areas and reduce inequalities in life expectancy.

GP cluster profiles also show that travel times to GP surgeries differ by area with a higher percentage of the population having to travel more than 15 minutes to reach their GP surgery being found in the Western Vale. The importance of good access to GPs was raised as an issue by residents across all areas of the Vale throughout our engagement campaign although comments related more to appointment availability and seeing the same GP consistently rather than travel times and transport issues.

### 4.3 Summary

When considered at a local authority level, it can be considered that the Vale has a relatively healthy and active population. However detailed analysis shows that differences between areas and population groups can be observed.

The inequality gap in healthy life expectancy is a cause for concern for the PSB, and areas with the lowest healthy life expectancy correlate to those that are most deprived as identified through WIMD 2014 and are predominantly located in areas within the eastern part of Barry such as Gibbonsdown, Castleland and Buttrills. These areas also have higher levels of obesity, higher smoking levels and higher alcohol-specific mortality rates.

Our detailed evidence report shows that in general young children in the Vale have a good level of well-being although even at a young age, outcomes for children in these same areas of Barry are less desirable than those of their peers demonstrating the importance of experiences in the early years and of the health and well-being of the mother both before, during and after pregnancy.

Alcohol consumption among older drinkers in the less deprived rural Western Vale can also be considered an issue in the Vale, however it has been recognised that the Area Planning Board has a detailed commissioning strategy in place and are working to tackle this. Alcohol consumption was also highlighted as an area for action through GP Cluster Plans for 2015/16 in the Vale of Glamorgan, highlighting the need to improve alcohol awareness through practices undertaking Alcohol Brief Intervention training.

Information within this section of the assessment relates to our position in relation to achieving the following national well-being goals: a More Equal Wales, a Healthier Wales and a Resilient Wales.

#### 4.4 Where we need to increase our evidence base?

The well-being assessment must be seen as an ongoing process of better understanding our communities in order to improve our residents' well-being and contribute to achieving the national well-being goals. The PSB will consider how it can ensure our evidence base can be kept 'live' and become a dynamic resource for everyone.

We will also continue to enhance the findings presented in this section of the assessment and recognise that further information is needed in relation to the following, either because robust data is unavailable at the present time or because analysis is still ongoing.

- More data and insight is needed in relation to substance misuse in the LGBT community.
- The full findings from the Population Needs Assessment (as required by the Social Services and Well-being Act 2014) currently being undertaken will further enhance our knowledge of current and future care and support needs of our residents including the differing issues for various population groups
- Targeted engagement in particular areas of Barry would help us to better understand the reasons for the concentration of various unhealthy behaviours in these areas.
- Data in relation to transport is included later in this assessment, although more information relating to active travel and the health benefits this can bring would enhance our evidence base.
- The Vale's Children and Young People's Partnership are currently undertaking a survey across all schools in the Vale to capture the views of pupils across a number of topics. A number of the questions asked to adults as part of the Let's Talk campaign have been included in this survey and the findings, available in early 2017, will be incorporated within our assessment to ensure the views of children and young people are also captured.
- Predicted future trends in relation to the prevalence of a number of chronic conditions linked to the health behaviours currently being observed in the Vale.

## 5. Being Part of Safe and Inclusive Communities

This section of the assessment focuses on housing, community safety, volunteering and resilient communities.

### 5.1 Headlines

#### What has the data told us?

- The Vale of Glamorgan has a relatively engaged population, with higher than average voter turn-out rates and good volunteering levels. However the level of political engagement varies markedly within the Vale of Glamorgan and suggests that there are geographical communities within the Vale of Glamorgan that are less engaged than others. Figures suggest that those in the most deprived LSOAs within the Vale of Glamorgan, are less likely to be engaged in the political process than those in the least deprived areas.
- Loneliness and isolation are cross-cutting issues that seriously impact on the health and wellbeing of people of all ages in Wales. A significantly higher number of females aged 65+ are predicted to be living alone than males. By 2035 it is predicted that approximately double the number of females aged 65+ will be living alone in the Vale of Glamorgan compared to males. However it is recognised that isolation is not only limited to older people.
- 73% of Vale residents agreed people from different backgrounds got on well together, below the 79.6% Welsh average and the 3<sup>rd</sup> lowest in Wales.
- The overall rate of criminal offences in the Vale has consistently been below the Welsh average.
- The LSOA Castleland 2G in the Barry area observed the highest rates of crime within the Vale across a number of indicators including rates of violent crime, criminal damage and ASB. This LSOA ranked the 29<sup>th</sup> most deprived LSOA in Wales for the WIMD 2014 Community Safety Domain. This area includes Holton Road and is the location of many shops, cafes, Barry leisure centre, the Council Civic Offices and areas of open space.
- The rate of violence against the person offences has increased in recent years in the Vale although a similar trend is also observed in other areas of Wales. Large increases have particularly been observed in areas of Barry such as Dyfan (a 72% increase in 2014/15 compared to 2013/14). In addition there has also been an

increase in possession of weapons offences in this area and some other parts of Barry, although overall numbers remain small.

- According to the Welsh Government Children in Need Census, the percentage of children in need where domestic abuse is a parenting factor in the Vale of Glamorgan was the highest in Wales (51%) at March 2015. Further research would be needed to understand the reasons for this figure.
- Hate crime incidents have been increasing in recent years with the conversion rate between incidents and those that are classified as crimes also increasing.
- The average house price in the Vale of Glamorgan is one of the highest in Wales. The average price of a two bedroom house in the Castleland ward in Barry costs on average £108,742 compared to a two bedroom house in Cowbridge in the Western Vale which costs on average £273,143.
- The 2011 Census showed that for the first time in 30 years the private rented sector has grown larger than the social rented sector in the Vale of Glamorgan. This may be explained by an increasing number of younger people who cannot afford to buy and rent privately instead. The Council are also now able to discharge their homelessness duty to the private rented sector.
- In the Vale of Glamorgan, the percentage of overcrowded households is 3.86%, which is lower than Wales at 5.53%. However, across the Vale of Glamorgan there is a wide range between the lowest (0.0% in 'Illtyd 1') and the highest (12.2% in 'Gibbonsdown 2') LSOAs.
- The rate of households presenting and determined to be eligible, unintentionally homeless and in priority need has increased in the Vale of Glamorgan in recent years as opposed to the decreasing national trend. However the Vale of Glamorgan has a higher than average percentage of cases where homelessness has been prevented due to positive action.

## What have you told us?

- Official survey data showed that the percentage of Vale of Glamorgan residents who rated their life satisfaction as 7 out of 10 or above was slightly lower than the Welsh and UK average. However throughout our engagement campaign residents were generally very positive about their life satisfaction and with the area as a place to live.
- Having a say in decisions is very important, although the number of people believing they can actually influence decisions is low. It could be suggested that we need to get better at communicating to our residents how we have taken feedback on board.
- In general residents of the Vale of Glamorgan reported that they felt safe in everyday life although as might be expected people felt less safe after dark.
- A lack of crime was highlighted as one of the most positive things about living in the Vale of Glamorgan. However, older people in particular felt anti-social behaviour was an issue within their area.
- The findings of the Let's Talk Survey showed that the majority of respondents were either "very" or "fairly" satisfied with the quality of their homes. Housing was not an issue which featured significantly throughout our engagement campaign.
- Many people highlighted their friends and neighbours as the best thing about where they lived, especially those in the Barry area compared to other parts of the Vale. A sense of community in these areas was apparent with people commenting that these networks were vital in maintaining their health and well-being. Community and group interaction through various means, ranging from formal groups to social gatherings was seen as very important to well-being.

## 5.2 Our Findings

In 2014/15 77.4% of Vale residents rated their life satisfaction as 7 or above, below the UK average of 80% and slightly below Welsh average of 78.36%. In addition, data from the National Survey for Wales 2014/15 highlighted that 81% of Vale residents felt a sense of belonging to the local area compared to the Welsh average of 83%.

Despite these findings, through our engagement campaign, residents were generally very positive about life in the Vale and about their life satisfaction in general. Many people highlighted their friends and neighbours as the best thing about where they lived, especially those in the Barry area compared to other parts of the Vale. A sense of community in these areas was apparent with people commenting that these networks were vital for their well-being.

The PSB therefore recognises the importance of ensuring our residents are engaged with and feel part of safe and inclusive communities in order to increase their sense of belonging to the local area and satisfaction with life in general.

Increased community resilience is often shown at times of crisis and the PSB recognises the need to build resilient communities which can adapt to future events. For instance, the impacts of climate change pose a risk to our communities and working to build inclusive, resilient and adaptable communities now will ensure that our communities are ready to respond at times of need in the future.

As above, throughout our engagement campaign friends and neighbours within the immediate community was often highlighted as one of the best things about living in the Vale, with people commenting that they have good networks in place and people to rely on should things go wrong. However it was noticeable that many people who made such comments were from the more urban areas particularly Barry compared to the Western Vale.

Climate change and adverse weather events pose a risk to all of our communities and it could be suggested that those in more rural areas are at greater risk when such events occur. For example flooding can cut off transport networks, electricity and other infrastructure as well as damaging homes. The effects of such an event can be devastating for a person but having a strong community network who 'rally around' can make a big difference in such situations. Areas of Dinas Powys and Barry, in addition to Cowbridge and Llantwit Major in the rural Vale are areas that are most at risk of flooding in the Vale.

## Participation in community life

Our findings show that in general people in the Vale of Glamorgan are relatively involved in community life.

According to research conducted by the Welsh Council for Voluntary Action (WCVA), the percentage of people who report volunteering formally in the Vale of Glamorgan is broadly in line with the Welsh average. However, when considering those who report volunteering informally the Vale showed one of the highest percentages across Wales.

The most common types of help given are doing errands, caring for children, keeping in touch with a housebound person, providing transport and giving advice. At least half a million people in Wales do one of these activities in a year.

The WCVA report on volunteering in Wales 2015<sup>9</sup> highlights that “the overall level of informal volunteering should reflect general changes in the needs of people in communities in Wales. It might be expected that as the population ages that more people will be involved in helping their neighbours.” As the Vale has an ageing population this could explain why the Vale of Glamorgan has a much higher percentage of people who volunteer informally than formally.

### Percentage of population aged 16+ who volunteer informally

Source: WCVA Report – Volunteering in Wales 2015

The Vale of Glamorgan Public Opinion Survey 2014 asked respondents about volunteering and found little differences observed between age and gender in relation to whether a

<sup>9</sup> [http://www.wcva.org.uk/media/3504589/final\\_volunteering\\_in\\_wales\\_2015\\_-\\_english\\_july\\_2016.pdf](http://www.wcva.org.uk/media/3504589/final_volunteering_in_wales_2015_-_english_july_2016.pdf)

person volunteered. However the biggest differences were observed between area and social grade.

Residents in the Western Vale were more likely to volunteer followed by the Eastern Vale. Those from Barry were much less likely to undertake voluntary or community work. It could be suggested that those in more rural areas have less services readily accessible compare to Barry and could be more likely to undertake community work. Those in managerial and professional occupations were also more likely to volunteer than those in unskilled or manual jobs.

The importance of volunteering should not be underestimated with figures from Glamorgan Voluntary Service estimating that the monetary value of volunteering in the Vale of Glamorgan for 2015/16 was £36,903,499 and demonstrates the significant contribution that volunteers make to their local communities. It is also important to consider that this figure only captures volunteer hours undertaken through more formal channels and does not capture the vast amount of informal volunteering undertaken in the Vale as shown earlier.

The effects of volunteering on a person's well-being cannot be underestimated in terms of improving mental well-being and providing a sense of purpose. In addition volunteering can help provide people with a huge variety of skills which can enhance career prospects. The PSB therefore recognise an opportunity with regards to increasing volunteering in the more deprived areas of Barry and promoting volunteering as a gateway to employment in areas where a higher proportion of the population are not in work. The PSB have also posed the question of how we as employers can help our staff become more involved within their own communities as volunteers.

If we can improve how we engage with our communities through more innovative methods we may be able to have a greater influence in improving the well-being of our residents and reducing the inequalities we have found throughout our assessment. The PSB has also recognised that communities do not only exist in a geographical sense and 'digital communities' now exist in online spaces. Being able to tap into these networks could help reach some of those who have traditionally been disengaged.

Voter turnout rates can be used to demonstrate the variations in involvement within the Vale of Glamorgan. The turnout in the 2012 local government election in the Cadoc ward in Barry was 30.05% and in the St Athan ward it was just 29.92%, both approximately 10% below the Vale of Glamorgan average of 39.26%. Conversely the turnout within the Dinas Powys ward was 51.76%.

The Let's Talk Survey asked Vale residents how important a range of topics were to them. In terms of what was very important to our residents 'having a say in decisions that affect me' was the most important aspect to people in the Vale, however more people strongly

disagreed they could influence decisions than tended to agree suggesting we need to improve how we engage with our communities.

The PSB recognises that ensuring people from a wide cross sector of our society are actively involved in community life can help in the redesign and delivery of services. A good example of this is changes to the Council's library services. Through the Council's Reshaping Services Programme, three libraries across the Vale have already been transferred to community ownership ensuring not only that the service remains available to these communities but that they deliver what the community wants from them. The new management committees for these libraries also receive on-going support from the Council in the form of IT access, book stock, other library resources and professional advice.

There is a risk of certain sections of the community becoming socially isolated which can have a significant effect on an individual's well-being.

Through our 'Let's Talk' survey it was highlighted that a high proportion of residents rarely or never felt lonely, however it must be recognised that those residents who are likely to participate in the survey are likely to be more actively involved in community life. A high proportion of respondents to the survey were received online, and again it is recognised that new digital communities now exist and could act to prevent people who could be geographically isolated or have limited mobility from feeling lonely.

Although social isolation is not only limited to older people, the PSB recognises that the Vale has an ageing population particularly in rural areas who may be more at risk of becoming isolated and feeling lonely. It has been recognised that further evidence is needed to better understand this in relation to the Vale of Glamorgan and how issues regarding social isolation are not only limited to older people.

The Older People's Commissioner highlights that:

"loneliness and isolation are cross-cutting issues that seriously impact on the health and wellbeing of people in Wales. It is imperative that loneliness is measured and that the social capital of relationships and connectivity are understood and addressed in terms of building a resilient Wales and a community of cohesive communities.

Loneliness and isolation have been shown to damage health, are the basis for social exclusion and are a significant and pressing problem in Wales that crosses all boundaries of social class, race, gender identification, sexual orientation, financial status and geography.

Research demonstrates that loneliness has an effect on mortality that is similar in size to smoking 15 cigarettes a day. It is associated with poor mental health and conditions such as cardiovascular disease, hypertension and dementia. Loneliness also has a much wider public health impact too, as it is associated with a number of negative health outcomes including mortality, morbidity, depression and suicide as well as health service use.

Loneliness can be felt by people of all ages, but as we get older, risk factors that might lead to loneliness begin to increase and converge. Such risk factors include poor health, lack of public transport, sensory loss, bereavement, fear of crime, retirement and technological changes.

Statistics show that loneliness and isolation impact many older people across Wales; however, in rural areas, a unique set of circumstances exacerbate the social isolation of older residents further, leading to poor health, loss of independence and lower quality of life.”

The Vale of Glamorgan has a relatively high percentage of people aged 65+ living alone, with Census 2011 data showing that 13.2% of households in the Vale were comprised of one person aged 65+. Social isolation may be an issue in the Vale and a Wyn Campaign Equality Assessment found that one of the top 6 requirements residents felt they should gain from the campaign was not feeling lonely.

The graph below shows that the numbers of people aged 65+ living alone in the Vale are expected to increase by over a quarter from 10,520 in 2010 to 13,390 in 2020, and by over half to 16,400 in 2030.

*Source: Cardiff and Vale Public Health Team assessment of the future health and social care needs of older people in Cardiff and the Vale of Glamorgan 2010-2030.*

Differences can also be observed by gender with a significantly higher number of females aged 65+ predicted to be living alone than males. By 2035 it is predicted that approximately double the number of females aged 65+ will be living alone compared to males. This may be attributed to the differences observed between male and female life expectancy observed in the Vale with females living longer on average.

In 2014 the Friendly AdvantAGE project was established to reduce social isolation and loneliness and to increase confidence in older people. The volunteer project recruited 175 volunteers, who provided over 11,500 hours of volunteering to support older people, reducing loneliness and social isolation. The project was highly successful with 60% of beneficiaries agreeing that their social interaction or well-being had increased and 76% agreeing that their confidence had been positively affected. The project ended in March 2016 when funding ceased.

An evaluation report on the project by the Welsh Institute for Health and Social Care: University of South Wales showed that when participating in the project scores increased for people who agreed that they felt lonely less often than they used to and scores again increased when people were asked three months into the project showing that the project had been positive in reducing loneliness in the medium term. However scores had decreased three months after participation in the project had ended, for agreement with statements such as “I am confident dealing with others everyday” which may suggest that work needs to take place to tackle social isolation in the long term.

## **Safe and Cohesive Communities**

In order to improve the well-being of our residents and contribute to the national well-being goals it is important that our communities are both safe and cohesive for all residents.

The National Survey for Wales 2014/15 found that 73% of Vale residents agreed people from different backgrounds got on well together, below the 79.6% Welsh average with only Flintshire and Torfaen having a lower percentage of residents agreeing with the statement.

National level data shows that those in more deprived areas are less likely to agree, with 68% in the most deprived areas agreeing with this statement compared to 87% in the least deprived areas.

The survey also found that 82% of Vale residents agree people in the local area treat each other with respect and consideration, this is above the Welsh average of 80%.

The Equality and Human Rights Commission Report 'Healing a Divided Britain'<sup>10</sup> highlights that people from an ethnic minority background are more likely to experience discrimination, harassment or abuse in Britain than White people. In Scotland, they were four times more likely and in Wales almost three times more likely.

The report found that "in Wales, people from ethnic minorities were almost three times as likely as White people to report discrimination, harassment or abuse (19.5% compared with 6.8%). Those with a minority religion were more likely to report this compared with those with no religion (20.8% compared with 8.2%)."

However it is interesting to note that findings for the National Survey for Wales 2012 to 2015 combined results showed no significant differences in feeling of whether people in the local area treat each other with respect between those of White British or Irish ethnicity and all other ethnic groups.

It would be interesting to observe how answers to this question may change following the results of the EU referendum should data become available.

Within the Vale of Glamorgan the number of non-UK born residents was 5,000 in 2004, this increased to 7,000 in 2010 but had decreased again to 6,000 in 2014. As expected, the majority of non-born UK residents in Wales are found in cities – Cardiff, Swansea, Newport and Wrexham, followed by areas surrounding them such as the Vale of Glamorgan and Flintshire.

When considering the percentage of an authorities migrant population that arrived after 2004, the Vale has one of the lowest percentages in Wales, suggesting that the migrants who reside in the Vale tend to have been in the area longer than observed in other parts of Wales. This may explain the trends observed that show the Vale of Glamorgan as having the highest percentage of non-UK born residents who own their own house compared to other areas of Wales.

As above, the impact of events such as the EU referendum result on such issues is at present unknown although data shows that hate crime incidents have been increasing in recent years with the conversion rate between incidents and those that are classified as crimes also increasing.

---

<sup>10</sup> <https://www.equalityhumanrights.com/en/publication-download/healing-divided-britain-need-comprehensive-race-equality-strategy>

Throughout our engagement campaign, many people commented that a low crime rate was one of the most positive things about living in the Vale. This is supported by data that shows the overall rate of criminal offences in the Vale has consistently been below the Welsh average

Rate of all offences per 1,000 population

	The Vale of Glamorgan	Wales
FY 2010-11	56.11	66.79
FY 2011-12	50.87	62.49
FY 2012-13	50.34	57.35
FY 2013-14	49.03	56.18
FY 2014-15	51.16	58.95

Source: Office for National Statistics (ONS)

However as has been the case throughout our assessment, there are clear inequalities within the Vale of Glamorgan in relation to community safety. The WIMD 2014 community safety domain takes into account a range of underlying indicators including incidents of a number of different crime types. The following map shows the most deprived areas in relation to community safety are again located mostly in the Barry area.

## Community Safety, 2014

Source: LGDU Vale of Glamorgan Tackling Poverty Analysis. WIMD 2014 Data

The LSOA Castleland 2G in the Barry area observed the highest rates of crime within the Vale across a number of indicators including rates of violent crime and criminal damage in addition to Anti-Social Behaviour (ASB). This LSOA ranked the 29<sup>th</sup> most deprived LSOA in Wales for the WIMD 2014 Community Safety Domain. This area includes Holton Road and is the location of many shops, cafes, Barry leisure centre, the Council Civic Offices, Drug and Alcohol Services and areas of open space. There is also a concentration of CCTV cameras located here.

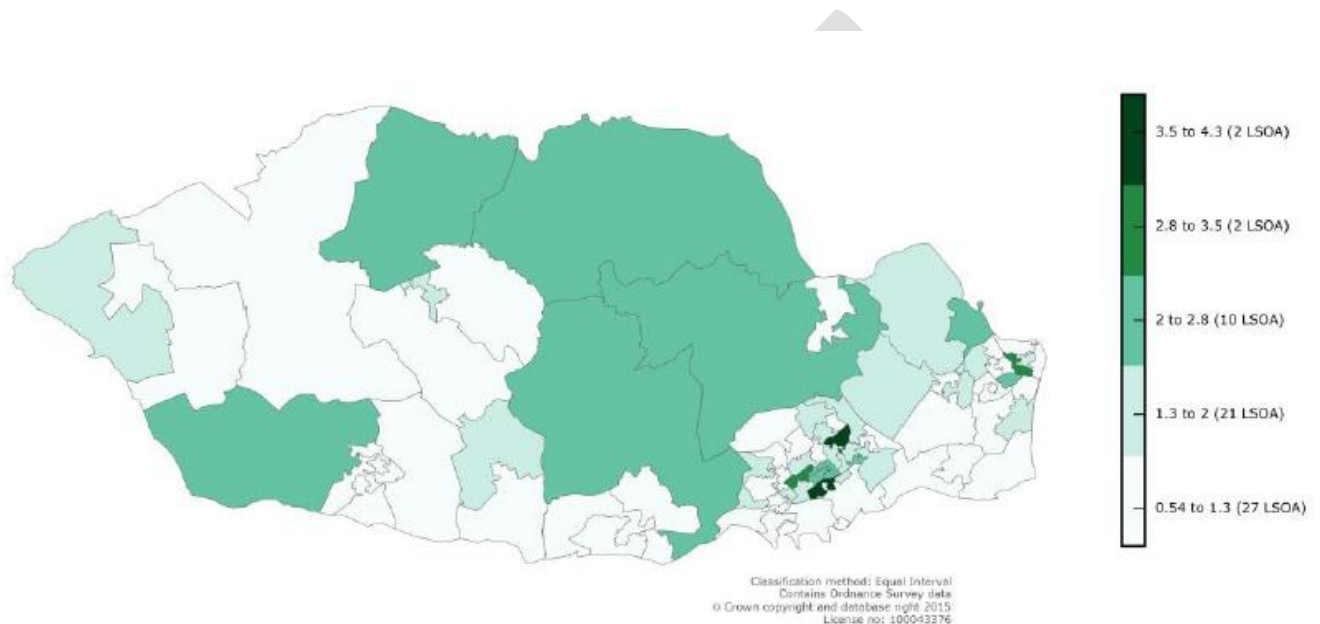

Although there is a concentration of higher crime rates around the Barry area, when considering types of offences differences can be observed across the Vale of Glamorgan. For example although rates of violent crime are highest within areas of Barry, a different pattern emerges when considering the rate of burglaries as shown below. This highlights how although less deprived areas of the Vale have low crime rates, people in this area may be targeted as victims of burglary due to their perceived affluence. Becoming a victim of crime can have a huge negative effect on a person's well-being, not only in an economic sense where valuable possessions may be taken but more so on mental well-being. It can also be suggested that despite low crime rates, when the small number of offences that do take place in less deprived areas, the effects on a person's mental well-being may be even greater than those who live in areas where crime is a more common occurrence.

Despite a higher rate of burglary and similar types of offences in the less deprived areas of the Vale when compared to offences such as violent crime or criminal damage, the map also

shows that some of the most deprived parts of Barry still have a high rate of burglary offences when compared to other parts of the Vale. The effects of this type of crime on people in deprived areas could be even more damaging as it could be suggested that victims are less likely to have insurance policies in place or the support and finances needed to rebuild.

### Rate of recorded burglaries per 100 dwellings and business addresses in the Vale of Glamorgan (2012-2014)

Source: WIMD 2014

Although the Vale of Glamorgan has relatively low crime rates, the rate of violence against the person offences has increased in recent years although a similar trend is also observed in other areas of Wales. Large increases have particularly been observed in areas of Barry such as Dyfan (a 72% increase in 2014/15 compared to 2013/14). In addition there has also been an increase in possession of weapons offences in this area and some other parts of Barry, although overall numbers remain very small.

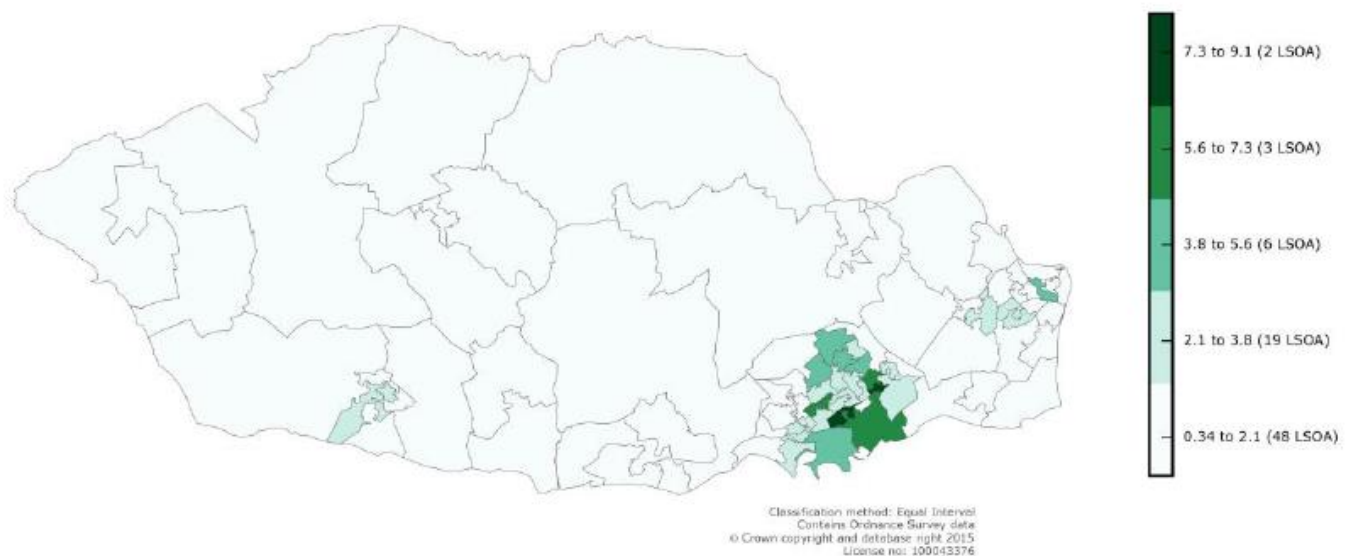

Through our Let's Talk Survey we asked residents to consider a range of issues and whether they were an issue in their area and whether they felt safe in the Vale of Glamorgan in a number of different situations. In general, people felt safe in a number of scenarios although, as would be expected, people felt less safe after dark. The situation where most people reported feeling very unsafe was when cycling both in daylight and even more so after dark. The health and environmental benefits of promoting active travel are clear and it

is therefore an area where more could be done to ensure people are confident to use cycling as a means of travel.

Perception of crime can often differ from reality although a perceived high level of crime, whether this is the case or not, can significantly impact on a person's well-being. The South Wales Police Community Perception and Satisfaction Survey asked a range of questions to gather information on public perception and experience of crime & anti-social behaviour, views on the local police, awareness and engagement. Results from the 2013/14 survey showed that in St. Augustine's in Penarth a high proportion of respondents said that there was more Anti-Social Behaviour in their local area when compared to the previous year. In reality force figures showed that ASB had dropped by approximately a third that calendar year in comparison to last calendar year.

Anti-Social Behaviour is an area where there is a clear concentration of higher incidents in the Barry area as illustrated below.

#### **Rate of recorded anti-social behaviour per 100 resident population in the Vale of Glamorgan (2012-2014)**

Source: WIMD 2014

This was reflected during our engagement campaign with Barry residents commenting on ASB being an issue where they lived. Those attending events in the Eastern and Western Vale did not raise this generally with the exception of a small number of older people. Our survey also asked residents to consider whether a range of issues including graffiti, people

using drugs, noisy neighbours, people being drunk in public, doorstep callers and littering/fly tipping were an issue where they lived. Although still small numbers, littering/ fly tipping was the issue most people reported as being a serious problem, with many saying other issues listed were not a problem or a very rare occurrence.

As discussed earlier within this assessment, ACEs are stressful experiences occurring during childhood that directly hurt a child (e.g. maltreatment) or affect them through the environment in which they live (e.g. growing up in a house with domestic violence). Being exposed to domestic violence or being a victim of domestic violence can have a serious impact on a child's future life chances, this is classed as an Adverse Childhood Experience.

The Public Health Wales Adverse Childhood Experiences Study<sup>11</sup> highlights that;

"ACEs can continue to harm the health of children throughout their life. Evidence demonstrates that chronic traumatic stress in early life alters how a child's brain develops and can fundamentally alter nervous, hormonal and immunological system development. This can result in individuals whose systems are 'locked' into a higher state of alertness; permanently prepared for further trauma. Such physiological changes increase the wear and tear (allostatic load) on their body; increasing risks of premature ill health such as cancer, heart disease and mental illness

During school years, the same individuals may display a heightened emotional state of anxiety (ready to fight or always prepared to run away) and consequently be distracted from educational pursuits, resulting in poor educational attainments. Children raised in environments where violence, assault and abuse are common are more likely to develop such traits themselves as these behaviours are seen as normal (i.e. normalised); leaving them more likely to both commit violent acts and/or be the victim of such acts in adulthood. Furthermore, the psychological problems associated with exposure to ACEs can leave individuals with feelings of low self-worth and a propensity for behaviours offering short-term relief at the expense of longer-term health. This combination leaves affected individuals prone to adopting harmful behaviours such as smoking, harmful alcohol consumption, poor diets and even early sexual activity.

The strong associations between exposure to ACEs and vulnerability to harms including substance use, unintended teenage pregnancy, violence, mental illness and physical health problems, mean the children of those affected by ACEs are at increased risk of exposing their own children to ACEs. This is often referred to as the 'cycle of violence'. Consequently, preventing ACEs in a single generation or reducing their impact on children can benefit not only those individuals but also future generations across Wales."

---

<sup>11</sup> <http://www.cph.org.uk/wp-content/uploads/2016/01/ACE-Report-FINAL-E.pdf>

Data shows that incidents of domestic abuse have remained fairly steady within the Vale of Glamorgan in recent years with the same trend observed for repeat offences. Measuring incidents of domestic violence can be difficult to interpret. It is important to remember that although Safer Vale, our Community Safety Partnership, would like to see an increase in victim's being confident to come forward and report incidents, the ultimate aim is to reduce domestic violence.

The percentage of children in need where domestic abuse is a parenting factor includes children looked after, children on the child protection register and other children in need (including unborn children) who may not be looked after or on the child protection register where domestic abuse is a contributory factor to that child being in need.

The Welsh Government Children in Need Census showed that the Vale of Glamorgan had the highest percentage of children in need where domestic abuse is a parenting factor in Wales (51%) at March 2015. Further research would be needed to understand the reasons for this figure.

## **Housing**

In order to further consider whether the communities in the Vale of Glamorgan are safe and inclusive we have considered a range of evidence in relation to housing. Housing is the bedrock of communities; it drives the demand for local services, shops and facilities. A good quality, affordable and suitable home can be the catalyst a household needs to prosper. Instability in accommodation can act as a barrier to securing work or training, make accessing key services, such as health or social care more difficult, disrupt education and negatively affect physical and mental health.

We considered a range of data and evidence in relation to housing within the Vale of Glamorgan with a number of key findings emerging.

The Vale has an estimated 53,505 dwellings. The majority of households, 72.5%, own their own home, 11.9% rent from a social landlord and 15.7% from a private landlord. The percentage of households who own their own home (with or without a mortgage) in the Vale is higher than the Welsh average, whilst the percentage of households living in the private rented and social rented sectors are lower than the Welsh average.

The average house price in the Vale of Glamorgan is one of the highest in Wales. However there are also significant differences between areas within the Vale, in particular between Barry, Penarth and rural communities in the Western Vale; for example the average price of a two bedroom house in Castleland in Barry costs on average £108,742 compared to a two bedroom house in Cowbridge which costs on average £273,143.

Tenure status varies by area with Barry having a lower percentage of Owner Occupiers than other areas and the largest percentage of social rented households. St. Athan, with an RAF base has the highest percentage of private rented households and the lowest percentage of owner occupied properties.

The 2011 Census showed that for the first time in 30 years the private rented sector has grown larger than the social rented sector in the Vale of Glamorgan.

In the Vale of Glamorgan, the percentage of overcrowded households is 3.86%, which is lower than Wales at 5.53%. However, across the Vale of Glamorgan there is a wide range between the lowest (0.0% in 'Illtyd 1') and the highest (12.2% in 'Gibbonsdown 2') LSOAs.

The findings of the Let's Talk Survey showed that the majority of respondents were either "very" or "fairly" satisfied with the quality of their homes.

Based upon the evidence presented in the Gypsy Traveller Accommodation Assessment study the estimated additional pitch provision needed for Gypsies and Travellers in the Vale of Glamorgan for the whole Development Plan period is 20 additional pitches. There is no additional need for the Vale of Glamorgan to consider for Travelling Showpeople.

In the Vale of Glamorgan, the number of households affected by the spare room subsidy has been steadily decreasing since the reforms were first introduced. However a data gap exists in terms of capturing the reasons why households are no longer being affected by the subsidy – whether this is due to households moving to smaller properties, due to evictions or whether for instance they have found employment and no longer claim housing benefit.

The rate of households decided to be eligible, unintentionally homeless and in priority need has increased in the Vale of Glamorgan in recent years as opposed to the decreasing national trend. However, the Vale of Glamorgan has a higher than average percentage of cases where homelessness has been prevented due to positive action.

In assessing the housing market as a whole, the 2015 Local Housing Market Assessment calculates the net need for affordable housing, including social rented housing and intermediate housing products, over the next five years. The headline annual net need for affordable housing in the Vale of Glamorgan is 559 units per annum.

### 5.3 Summary

Findings of our engagement campaign showed that people were generally very positive about life in the Vale and feel they have strong networks of friends and neighbours to rely on. In general people are engaged in community life although those in the most deprived areas, who it can be suggested we need to engage with more, were less likely to participate with lower levels of volunteering and voter turn out rates in these areas. People in the Vale were also less likely to agree that people from different backgrounds got on well together than the average across Wales. Hate crime incidents have steadily increased and the further impact on community cohesion from events such as the EU referendum result and resettlement of Syrian refugees are as yet unknown.

Communities no longer exist only geographically but digitally and we need to consider new ways of reaching these communities to ensure we engage with all sectors of our society to increase our evidence base. New innovative methods will also help avoid consultation fatigue.

Low crime rates were also seen as a positive aspect of life in the Vale although area differences can be observed with higher crime rates in more deprived areas. Although many areas of the Vale experience low crime rates, the effects when incidents do occur on the well-being of those in the area cannot be underestimated.

Members of the PSB were concerned with the affordability of housing and the need to ensure local people, especially young people, are not priced out of the communities within which they grew up. They recognised the potential of unsatisfactory/ overcrowded housing on a range of factors such as health and educational attainment.

The PSB has identified that the key question to reflect on is what will communities look like in the future and how do we act now to ensure they are resilient?

Information within this section of the assessment relates to our position in relation to achieving the following national well-being goals: a Prosperous Wales, a More Equal Wales, a Wales of Cohesive Communities, a Wales of Vibrant Culture and Thriving Welsh Language, a Healthier Wales and a Globally Responsible Wales.

### 5.4 Where we need to increase our evidence base?

The well-being assessment must be seen as an ongoing process of better understanding our communities in order to improve our resident's well-being and contribute to achieving the national well-being goals. The PSB will consider how it can ensure our evidence base can be kept 'live' and become a dynamic resource for everyone.

We will also continue to enhance the findings presented in this section of the assessment and recognise that further information is needed in relation to the following, either because robust data is unavailable at the present time or because analysis is still ongoing.

- Data in relation to incidents of hate crime and feeling within the community since the results of the EU referendum
- Evidence in relation to younger people who may be suffering from social isolation
- In order to engage with all of our community we recognise new 'digital communities' now exist which should be tapped into in order to reach those who are traditionally not engaged
- Data in relation to outcomes for those who are no longer affected by the spare room subsidy – whether this is attributed to gaining employment and no longer receiving Housing Benefit, due to downsizing the property or due to eviction.
- In depth analysis of commuter patterns – which are explored in the next section of this assessment – would help identify areas where a high proportion of the community may be commuting elsewhere during the day, thus leaving 'ghost towns' and areas where there is a low sense of community belonging.
- Data and evidence in relation to youth offending and reoffending rates in the Vale of Glamorgan
- Further evidence in relation to domestic violence

## 6. Maximising Opportunities and Attainment

This section of the assessment focuses on education, employment, business, culture and tourism.

### 6.1 Headlines

#### What has the data told us?

- The Foundation Phase Assessment for 4-5 year olds is made up of four Areas of Learning – Personal and Social Development; Language, Literacy and Communication; Mathematical Development; and Physical Development. In 2015/16 in the Vale of Glamorgan the percentage of children reaching the expected outcome or above across all of these areas of development combined was 91.2%. This was the highest across the Central South Education Consortium Area and was the 2<sup>nd</sup> highest in Wales behind Monmouthshire (91.7%).
- For the 2015/16 academic year 67.3% of pupils aged 15 in the Vale achieved the Level 2 threshold including a GCSE grade A\*-C in English/ Welsh First Language and Maths. The Welsh average was 57.95%. Although the Vale is well above average it is important to consider that we should be aiming to be on par with English authorities of similar socio-economic profiles.
- While overall the Vale of Glamorgan performs well at Level 2 when compared to others in Wales, levels of attainment varies greatly. Based on a three year average, 2010/11 to 2012/13, it ranges from 97% in the 'Plymouth (VoG) 3' LSOA to only 21% in the 'Gibbonsdown 4' LSOA.
- The percentage of year 11 pupils who become NEET (Not in Employment, Education or Training) continues to decrease year on year and remains below the Welsh average for 2015-16 across the year 11, year 12 and year 13 age groups.
- Qualification levels for those aged 16-64 in the Vale are above the Welsh average.
- Despite high average earnings overall, differences in income can be observed within the Vale of Glamorgan. Median household incomes in Barry are significantly lower than areas of the Eastern and Western Vale. Differences also still exist within these communities with households in Llantwit Major and St Athan having lower incomes than other parts of the Western Vale and Llandough, Cornerswell and Stanwell having lower median household incomes than other parts of the Eastern Vale.

- Of those who are economically active in the Vale 74% are in employment, slightly higher than the Welsh and UK average. 4% of the population are unemployed which is lower than the Welsh and UK averages.
- The Vale has a lower than Welsh average percentage of workless households and children living in workless households.
- The last full Childcare Sufficiency Assessment undertaken in 2013 found that the average cost of a nursery place or after-school club place in the Vale is lower than the British average although the cost of a child minder is higher than the British average.
- When considering business survival rates, the Vale had the highest rate of businesses reaching 5 years trading in Wales.
- When considering the projected change in jobs by industry in 2020 compared to 2014, the biggest losses are projected to be in public administration and defence, and the manufacture of plastics industries. The largest projected increases in jobs are predicted to be in the residential care and restaurants and mobile food service industries.
- The total number of visitors to the Vale of Glamorgan for tourism purposes continues to increase. Since the STEAM Tourism report was produced in 2004 to 2015, there has been an 18.5% increase in visitors to the area. In addition there has been a 64.8% increase in the economic impact of tourism in the Vale of Glamorgan during this time period and a 10.9% increase in total employment supported by the tourism industry.
- The Vale has a lower percentage of residents who can speak Welsh than the national average. The rate of Welsh speakers varies across the Vale with lowest rates being observed in areas of the Eastern Vale in addition to St Athan and Llantwit Major which may be attributed to the transient population in this area due to the RAF base.

## What have you told us?

- In response to a question on training opportunities in the Let's Talk survey, people raised concerns about costs, age restrictions and about a lack of opportunities for part time employees. However others quoted supportive employers and good support from Careers Wales.
- The Let's Talk survey results showed that the majority of respondents felt their economic well-being would decrease over the next 5 years with the EU Referendum result consistently highlighted as the reason for their answer.
- The Vale Public Opinion Survey undertaken in 2014 showed 80% of residents use the internet which had increased from 72% in the previous 2010 survey. The biggest difference was observed between age groups with 95% of those aged under 55 using the internet but only 54% of those aged 55+ doing so.
- The Let's Talk survey results showed that most respondents were either very or fairly satisfied with their job.
- Transport was often raised as a topic during the engagement undertaken for the assessment. Respondents wanted improvements to public transport in particular the frequency of buses and trains in rural areas although some felt there were good services. The condition of roads and pavements was also a frequently raised issue.
- In terms of the Let's Talk survey 31.9% of respondents reported being either concerned or fairly concerned about transport costs. 18% of respondents answered that they were fairly dissatisfied, or very dissatisfied, with their "access to public transport". Respondents in the Western Vale recorded a higher rate of dissatisfaction with "access to public transport" than the other areas of the Vale of Glamorgan.
- The natural environment was consistently highlighted by residents as what's good about living in the Vale during the Let's Talk Engagement Campaign with beaches and parks consistently being mentioned. The Vale's natural environment was recognised not only as an asset for residents but to attract visitors to the area aswell.
- The National Survey for Wales showed that when considering whether residents have participated in arts events, visited historic places or visited a museum in Wales, the Vale ranked highly compared to other areas in Wales across all three activities showing good participation rates in cultural activities.

- Let's Talk respondents were asked to consider how important a range of aspects were to them including religion, arts and culture, sport, Welsh language and Welsh culture and heritage. Welsh language was the issue that most respondents felt was not important at all and the issue that least respondents thought was fairly or very important. However Welsh culture and heritage was identified as being fairly or very important to a high number of respondents. It is interesting to note that the survey was live during Wales' Euro 2016 football campaign.

DRAFT

## 6.2 Our Findings

### Education

In order to ensure our population are given the best possible chance to maximise their opportunities having a good education is of up most importance. Education acts as the key foundation for the economic success of not only individuals but of the area aswell. It has been stated that “educational attainment has the largest impact on the likelihood of being in poverty and severely materially deprived as an adult...holding all else equal, in the UK, those with a low level of education attainment are almost five times as likely to be in poverty now and 11 times as likely to be severely materially deprived as those with a high level of education”.<sup>12</sup>

At a national level, the Welsh Government Understanding Wales’ Future<sup>13</sup> report highlights that Wales is under-performing internationally in educational attainment, which has implications for the economy, health and the general life chances of our people. Therefore, although our analysis of education attainment compares success in the Vale of Glamorgan to the Welsh average it is important to consider that the Welsh average may not be the best comparator. Our ambition is that education outcomes in the Vale of Glamorgan are the best in Wales and match those of the most successful authorities in England with similar socio-economic profiles.

We have already considered the importance of early years and the impact of education at a young age cannot be underestimated. Understanding Wales’ future highlights how international evidence suggests the biggest opportunities for changing life chances lie in the pre-school years with the factors that lead to educational under-attainment starting very early in childhood. The following chart demonstrates the links between level of cognitive skills and socio-economic background. The impact of a child’s socio-economic status on cognitive development and resulting life chances are clear and this demonstrates the importance of success in the early years, not only for the generation themselves but the impact this will have on the socio-economic circumstances their children’s generation.

<sup>12</sup> Intergenerational Transmission of Disadvantage in the UK and EU, ONS 2014

<sup>13</sup> <http://gov.wales/statistics-and-research/understanding-wales-future/?lang=en>

Source: Feinstein (2003 'Inequality in the Early Cognitive Development of British Children in the 1970 Cohort')

The Foundation Phase Assessment for 4-5 year olds is made up of four Areas of Learning – Personal and Social Development; Language, Literacy and Communication; Mathematical Development; and Physical Development. In 2015/16 in the Vale of Glamorgan the percentage of children reaching the expected outcome or above across all of these areas of development combined was 91.2%. This was the highest across the Central South Education Consortium Area and was the 2<sup>nd</sup> highest in Wales behind Monmouthshire (91.7%).

Children are also assessed at the end of the Foundation Phase (aged 7) and the following graph shows that the percentage reaching the expected level of development is again above average with the Vale of Glamorgan having the second highest percentage across Wales.

	The Vale of Glamorgan	Wales
AY 11-12	84.3	80.5
AY 12-13	88.8	83.0
AY 13-14	89.4	85.2
AY 14-15	91.5	86.8

Source: Welsh Government

The percentage of children in need reaching the expected outcome as the foundation phase assessment was also higher than the Welsh average.

Within the Vale of Glamorgan there are 45 local authority primary schools and 7 secondary schools. Class sizes in the Vale of Glamorgan are slightly larger than average and the percentage of pupils who are eligible for free school meal is below average. For the 2015-16 academic year, school attendance remained in the top quartile of performers in Wales for both secondary and primary schools.

For the 2015/16 academic year 67.3% of pupils aged 15 in the Vale achieved the Level 2 threshold, 5 GCSEs at grade A\*-C including a GCSE grade A\*-C in English/ Welsh First Language and Maths. The Welsh average was 57.95%. However, again inequalities exist within the Vale of Glamorgan with levels of attainment lowest in the most deprived areas of the Vale. This is further evidenced in the achievement gap between pupils in the Vale in receipt of free school meals and those who are not. One of the Council's 2015-16 improvement objectives was to reduce the achievement gap between pupils in receipt of free school meals and those who are not. The performance of pupils entitled to free school meals has improved since 2012, albeit not always at the same rate as their peers. The achievement gap at KS4 slightly narrowed for the 2015-16 academic year, however reducing this gap further remains a key focus for improvement and a priority for Council in the long term.

Previous analysis undertaken through the 2015 Vale of Glamorgan Tackling Poverty Report<sup>14</sup> found there was no link between travel to school times and pupil attendance rates. As stated school attendance rates in the Vale are amongst the highest in Wales with attendance at school influencing attainment levels. The analysis in relation to travel times to school having no influence over attendance levels is supported by analysis of achievement levels with areas in the Western Vale having some of the highest achievements levels despite pupils in these areas having some of the longest travel times to school due to the rural nature of the area.

Although overall the Vale of Glamorgan performs well above average across the key stages, it is important to consider that we should be aiming to be on par with English authorities of similar socio-economic profiles. Previous analysis undertaken by the Local Government Data Unit identified a 'family' of local authorities of similar socio-economic profile to the Vale of Glamorgan – Flintshire, East Sussex, Norfolk and Solihull. Previous analysis undertaken in 2013 showed that when considering teacher assessments at KS2 and KS3 the Vale performed either in line or above the authorities within this 'family'. However, at KS4 performance in the Vale of Glamorgan was below that of the English authorities within this group although care must be taken when comparing these figures due to differences in

---

<sup>14</sup> [LGDU Vale of Glamorgan Tackling Poverty Report 2015](#)

examination arrangements. Further work would be required to undertake this analysis using the most recently available data.

Our evidence report also considered a range of factors in relation to how pupils feel about school. The Understanding Wales' Future Report identified that pupils in Wales feel much more pressured by school work than 15 year olds in other countries with higher attainment. Pupils across the Cardiff and Vale Health Board area were in line with the Welsh average when asked whether they felt pressured by the school work they had to do. The percentage of pupils in the Cardiff and Vale region who reported liking school a lot was above Welsh average although only 26% of pupils reported doing so. The 2013 Vale of Glamorgan School Pupil Needs Assessment asked a range of questions in relation to how pupils felt about school and their preferred methods of learning the findings of which are detailed in our evidence report. A survey is currently being undertaken throughout schools in the Vale which asks a range of similar questions, the findings of which will be available in the Spring 2017.

Selfie (Social and Emotional Learning for Improvements elsewhere) is a unique web based system, developed through collaboration between the University of Sussex, the Vale of Glamorgan Council and the software developer Viewpoint.

A number of Vale schools are currently involved and each school can decide to survey the whole school or to pick individual year groups. The survey looks at two areas, 'my feelings' and 'my class'. The survey helps to gain an insight into the social and emotional climate of the school from the perspective of all members of the school community.

From the results staff can identify

- those pupils who need additional support and target interventions
- areas that the school is strong
- areas for development
- differences in the perceptions between staff and pupils

Since the introduction of SELFIE in October 2015, in excess of 9000 children in Vale schools have been surveyed. This has helped identify children with lower levels of well-being and helped target action plans to improve their well-being. It has been possible to identify whole school issues with bullying, worry, and social experience, and work with head teachers to explore this further.

Over the coming year an on-line assessment system will be used to help establish how pupils feel about themselves and others. The information will be used to help plan what schools can do to improve all pupils' well-being. This will include linking the pupils' responses with other information such as attainment, attendance, FSM status, SEN status, EAL status, ethnicity and first language. This will help identify if there are any patterns within schools which will help to improve pupils' well-being, learning and attendance and whether some pupils would benefit from extra support.

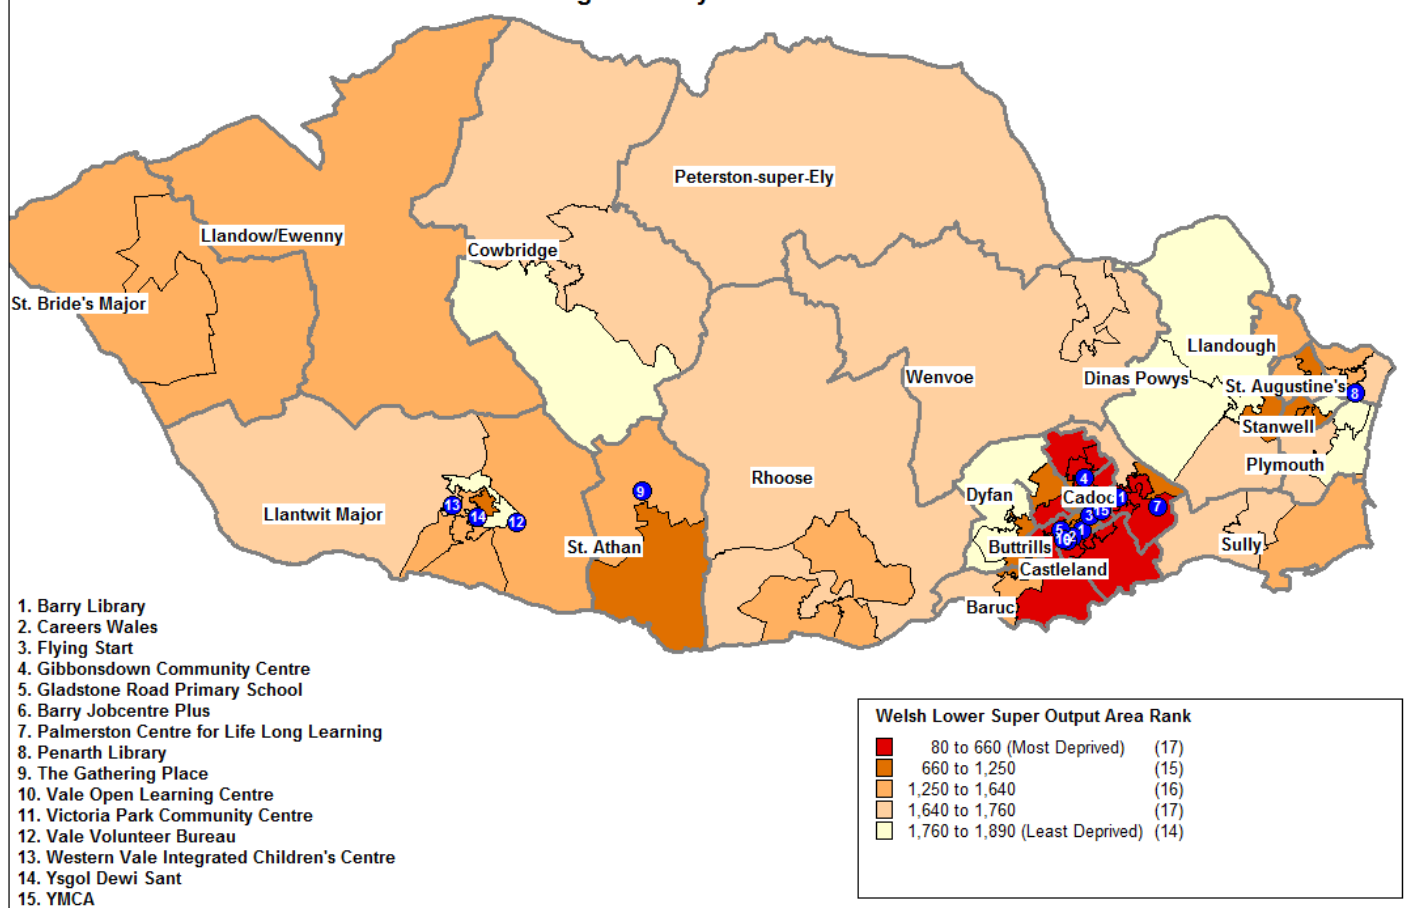

We have already highlighted that education is of crucial importance for social and economic outcomes and at a national level, Wales has relatively low post-16 staying on rates when compared to other countries. In the Vale of Glamorgan the percentage of year 11 pupils who become NEET continues to decrease year on year and remains below the Welsh average for 2015-16. The Vale has performed well at all age groups for 2015/16 with 1.5% of year 12 leavers NEET compared to the Welsh average 1.6% . At year 13, 2.92% of leavers were NEET in the Vale compared to the Welsh average of 3.76%. The Youth Engagement and Progression Framework has been implemented and provision brokered using intelligence from the early identification tool. This has resulted in targeted interventions being successful and young people 16-18 making successful transitions into EET.

Educational attainment can not only influence an individual's own opportunities but impacts on children's development and learning. National level data collected through the National Survey for Wales showed that parents qualified to NQF level 4 or above were 20% more confident in their own writing skills to help children with their writing than those without any qualifications. Similarly those qualified to NQF level 4 or above were 22% more confident in their maths ability to help children with their maths work than those without a qualification. The Vale has a lower than average percentage of the adult population with no qualifications and a higher than average percentage of the population qualified at NQF level 4 and above, either a degree or equivalent. When considered by gender the Vale had the highest percentage of males qualified to level 4+ in Wales and the 3<sup>rd</sup> highest percentage for females.

Again differences can be observed within the Vale of Glamorgan with Census 2011 data showing there are clear differences within the Vale with more adults in the Barry area (25.5%) having no qualifications than in the Eastern Vale (17.9%) and Western Vale (16.3%).

A range of programmes are in place in order to increase skills amongst adults including Adult and Community Learning courses. The following map shows the location of Welsh Government funded ACL skills and employability course venues from the 'Get Back on Track' programme in the Vale of Glamorgan. As demonstrated within the map, course venues are located in the most deprived areas of the Vale as according to WIMD 2014 with the aim of improving skills within our more deprived communities where levels of adult qualifications tend to be lower.

## Economy and Employment

Good educational attainment within the Vale of Glamorgan can be viewed as one of the area's strengths and a key component of good well-being. Good educational attainment needs to be matched with a thriving local economy offering good opportunities in order to ensure that people do not leave the area. The Vale's location next to Wales' capital city, Cardiff could therefore be viewed as one of its' greatest assets offering a range of economic and cultural opportunities afforded by a capital city whilst retaining a sense of local character and a rich natural environment.

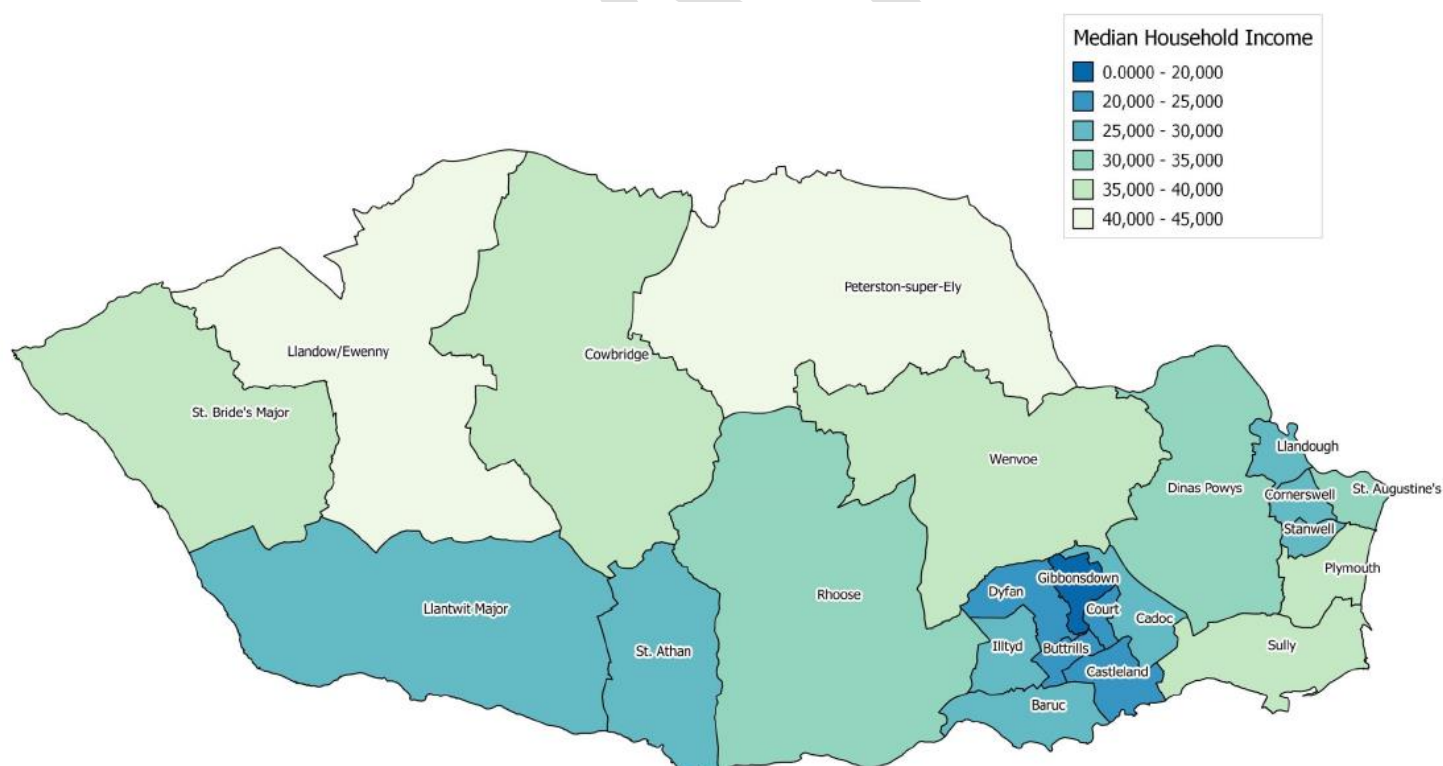

In relation to the Vale's economic environment, Gross Value Added is higher in the Cardiff and Vale region than other parts of Wales although this has fallen in recent years. Gross Disposable Household Income is also higher in the Cardiff and Vale Region than the Welsh average but lower than the UK average even when London and the South East are excluded.

Average weekly earnings in the Vale are higher than the Welsh and UK average with the latest data showing the average gross weekly pay for full time workers in the Vale to be £607 compared to the Welsh average of £498. Our findings show that gross average weekly pay is higher for male full-time workers than females in the Vale although hourly pay rates

show females earn slightly more per hour than their male counterparts, suggesting women in the Vale work fewer hours.

Despite high average earnings overall, differences in income can be observed within the Vale of Glamorgan. Median household incomes in Barry are significantly lower than areas of the Eastern and Western Vale. Differences also still exist within these communities with households in Llantwit Major and St Athan having lower incomes than other parts of the Western Vale and Llandough, Cornerswell and Stanwell having lower median household incomes than other parts of the Eastern Vale. Across Wales 17% of the population are experiencing income deprivation compared to 14% in the Vale. However analysis at LSOA level shows that Dinas Powys 1 had the lowest percentage of population experiencing income deprivation (4%), compared to Gibbonsdown 2 with the highest at 41% - more than double the Welsh average figure.

The following map shows the differences in median income across the Vale of Glamorgan with areas with the lowest incomes also being those with lowest educational attainment and poorer health and life expectancy rates as observed previously.

Through the Let's Talk Survey we asked residents whether they felt their economic well-being would increase, decrease or stay the same over the next 5 years. The majority of

respondents felt their economic well-being would decrease over the next 5 years with the EU referendum results consistently highlighted as the reason for their answer.

The latest ONS UK trade release provides the first estimate for a full quarter of data post the EU referendum. UK trade shows import and export activity and is a main contributor to the overall economic growth of the UK. In the first full quarter since the EU referendum there was a small reduction in the trade deficit, but so far there has been little evidence in the data to show the lower pound value feeding through into trade volume or prices.

As above, although overall income levels in the Vale of Glamorgan are high, differences can be observed when considering data below county level. The same patterns emerge when considering levels of employment.

Employment offers a high level of protection against poverty, and particularly against deep and persistent poverty (and also contributes directly to well-being). Of those who are economically active in the Vale 74% are in employment, slightly higher than the Welsh and UK average. 4% are unemployed which is lower than the Welsh and UK averages. Of those who are economically inactive, the highest percentages (25.4%) are looking after the family/home or are students (24.9%). Only 13.7% were economically inactive due to retirement compared to a Welsh average of 15%. 21% were economically inactive due to long-term sick compared to the Welsh average 28.5%. Of those who are economically inactive in the Vale 28.2% want a job, slightly higher than the Welsh and UK average presenting an opportunity in relation to those who are economically inactive being ready and willing to find employment.

Overall the Vale has a lower than Welsh average percentage of workless households and children living in workless households.

However the areas of the Vale which observed the lowest household incomes as identified earlier are also those with the lowest employment rates, and those with the lowest levels of educational attainment.

The percentage of working age people claiming Job Seekers Allowance (JSA) has increased recently in the Vale and is now in line with the Welsh average whereas it has previously been below. However this is attributed to the Welsh average falling rather than the rate in the Vale significantly increasing. The highest percentages of working age people claiming JSA can be found in Barry and in St. Athan in the Western Vale.

The percentage of JSA claimants who are aged 17-24 in the Vale has previously been in line with the Welsh average but began to increase above average in September 2015. An increase in September has also been observed in previous years which could be attributed to young people leaving education and claiming JSA. Given the overall low numbers of JSA claimants in the Vale the increase could therefore be more pronounced. The Vale also has lower than average NEET figures so further analysis would be required to understand this trend.

The same areas within the Vale of Glamorgan experience deeply entrenched norms of lower educational achievement, lower employment rates and lower incomes. As we have already explored the influence of socio-economic factors in the early years can be crucial in determining the life chances and opportunities of our future generations. A Public Policy Institute for Wales study<sup>15</sup> on what works in reducing intergenerational worklessness and fragile employment identified a range of factors that impact on employment. These include individual factors and circumstances, including health, job-seeking knowledge, skills and qualifications; local contextual factors – including the quantity and quality of local job opportunities, local cultural factors and local labour market operations and norms; and macro level factors – including the state of the macro economy, the welfare regime and policy in the labour market and related domains.

One of the major challenges is helping our residents not just obtain employment but sustaining that employment which leads to in-work progression helping to secure a better future. Long term unemployment data (12 months or more) shows a lower rate in the Vale than all other areas across Wales. However it is based on low responses and is not considered to be robust and is of low quality.

When considering types of employment, the highest percentage of Vale residents were employed in major group 1-3 positions which include managers, directors and senior officials, professional occupations or associate professional and technical. A higher proportion of Vale residents are employed in these occupations compared to the Welsh and UK averages. The Let's Talk survey results also showed that most respondents were either very or fairly satisfied with their job.

It must however be recognised that not only educational attainment but a range of other barriers exist that can influence an individual's ability to find and maintain good employment.

When considering the gap in those with long-term health conditions classed as employed compared to those without a condition and employed, the Vale had one of the smallest gaps in Wales and was significantly below the Welsh average.

Another barrier to work can be age and the percentage of working aged people aged 50+ in employment is higher in the Vale than the Welsh average.

Earlier analysis showed that although women in the Vale of Glamorgan earn more per hour on average than their male counterparts, overall weekly incomes for women are less than for males. This could be attributed to more women working part-time hours due to childcare commitments.

---

<sup>15</sup> <http://ppi.w.org.uk/files/2016/07/What-Works-in-Reducing-Intergenerational-Worklessness-and-Fragile-Employment.pdf>

The Welsh Government is currently developing its offer of 30 hours of free childcare for parents of 3-4 year olds for 48 weeks of the year. The new childcare offer is due to be tested in some local authority areas in Autumn 2017 before being rolled out.

The 2015-16 Vale of Glamorgan Childcare Sufficiency Assessment (CSA) update found that there are a total of 286 registered childcare providers in the Vale with all settings qualifying for people to be able to claim the childcare element of working tax credit. 2015-16 saw increases in the number of children who benefit from attending a pre-school childcare placement or an out of schools childcare placement. The last full CSA undertaken in 2013 found that the average cost of a nursery place or after-school club place in the Vale is lower than the British average although the cost of a child minder is higher than British average. The next full CSA will be published in March 2017 and will need to take account of issues such as the further housing developments planned in the Vale and the Aston Martin Plant.

## **Business and Industry**

There are clear links between a thriving local economy and our residents' well-being. A strong local economy will help attract people to reside in the area which further boosts the economy, this in turn provides more employment opportunities for residents who then have increased incomes to spend within the market.

The number of active business in the Vale of Glamorgan has increased in recent years although the rate of new active businesses has decreased but remains above the Welsh average. When considering business survival rates however, the Vale had the highest rate of businesses reaching 5 years trading in Wales.

The largest industries in the Vale are retail trade and the health and social care sector. When considering the projected change in jobs by industry in 2020 compared to 2014, the biggest losses are projected to be in public administration and defence, and the manufacture of plastics industries. The largest projected increases in jobs are predicted to be in the residential care and restaurants and mobile food service industries as identified through the Cardiff and Vale College Labour Market Intelligence Report Update 2015. The PSB has highlighted that these industries are often associated with part time, low paid work which could be cause for concern given the importance of securing good quality employment as highlighted earlier.

## Largest Industries

Industry	2014 Jobs	2020 Jobs	Change in Jobs (2014-2020)	% Change	2014 Earnings Per Worker
Residential care activities for learning disabilities, mental health and substance abuse	3,046	3,503	457	15%	£20,620
Retail sale in non-specialised stores with food, beverages or tobacco predominating	2,344	2,465	122	5%	£15,858
Primary education	1,867	1,718	-149	-8%	£21,403
Public administration and defence; compulsory social security	1,699	1,297	-402	-24%	£29,236
Restaurants and mobile food service activities	1,446	1,640	194	13%	£13,208
General secondary education	1,322	1,306	-16	-1%	£25,136
Beverage serving activities	1,173	1,068	-105	-9%	£14,838
Manufacture of plastics in primary forms	772	532	-240	-31%	£29,105
Repair and maintenance of aircraft and spacecraft	756	632	-124	-16%	£40,340
Retail sale of clothing in specialised stores	754	756	2	0%	£16,828

Source: CAVC LMI Update 2015

The Labour Market Intelligence Report is used for curriculum planning within the college and is discussed at the Vale PSB Improving Opportunities Board which brings together higher education providers, the Council's Education department and local employers. This has helped ensure Vale residents are equipped with the right skills for the job opportunities available, for example when a new large supermarket opened in Barry in 2015, the Barry Communities First Cluster worked with the employer to develop and then deliver targeted recruitment training, preparing residents living in the area for the supermarket's recruitment process.

The Vale has a number of town centres – Cowbridge, Llantwit Major, Penarth and two areas within Barry – Holton Road and High Street. The Town Centre's Framework<sup>16</sup> sets out a range of actions to ensure these town centres thrive and High Street in Barry has recently been identified as one of the top five locations in Britain for independent shops with figures released by the Local Data Company revealing that more than 91 per cent of shops in the town's western area are independently run.

<sup>16</sup> <http://www.valeofglamorgan.gov.uk/en/working/regeneration/Town-Centres/Town-Centres.aspx>

The Vale's location could be considered one of its greatest assets in maximising the economic well-being of our residents and the area. The Vale is part of the Capital City Region and five priorities have been identified for economic growth; connectivity, digital, innovation, skills, business support and regeneration. A number of infrastructure projects will help support economic growth in the Vale and wider region including, the Great Western mainline electrification, Cardiff Capital Region Metro and the Cardiff Airport and St Athan Enterprise Zone.

A comprehensive programme of regeneration is being implemented across the Vale including, the Rural Local Development Strategy, Town Centres Framework, Penarth Esplanade, Barry Waterfront including the Barry Island Link Road, Barry Island and links between Penarth Haven and the Town Centre, the Tourism Destination Management Plan, and delivery of the 'Tackling Poverty' strand of Welsh Governments' Vibrant & Viable Places' programme.

## **Infrastructure**

Again the Vale's location can be seen as one of its greatest assets with good transport links into Cardiff. The Vale is also home to Cardiff Airport and is part of the capital city region with the metro vision of a multi-modal rapid transit network integrating all transport modules offering the passenger a single ticket 'turn up and go' experience.

However the area's transport links may impact upon poor air quality that is observed in some areas of the Vale. Sustainable transport infrastructure and services can contribute to reducing negative impacts that cars have on the environment, reducing congestion, improving health and wellbeing, improving access to employment, health and education and other facilities and reducing the risk of road accidents. Objectives in the Vale's Local Transport Plan which complements the Local Development Plan include increasing the number of cycle trips, increasing the number of park and ride spaces and users, reducing congestion and improving air quality at strategic junctions and improving accessibility to bus services.

In rural locations where Active Travel Schemes cannot be achieved, community transport and bus service provision is promoted to support improvements in accessibility for the more vulnerable user groups and there are a number of community transport services in the Vale including Greenlinks.

However transport was often raised as a topic during our engagement exercise particularly in the rural Western Vale. Respondents wanted improvements to public transport in particular the frequency of buses and trains in rural areas although some felt there were good services. The condition of roads and pavements was also a frequently raised issue. This theme also emerged through the St. Athan Community Mapping Project where residents highlighted that bus service timetables to the nearest train station in Llantwit Major did not

align in order to allow users to commute into Cardiff during peak times without a 1 hour+ wait. Since the project was undertaken negotiations with transport providers have begun.

ICT infrastructure also has a significant impact on the area's economy in order to attract business and infrastructure. Residents and businesses in the Vale are amongst the first in Wales to benefit from the pioneering multimillion pound programme Superfast Cymru, bringing nationwide fibre broadband to Wales.

The use of IT also has the potential to contribute to reducing carbon emissions e.g. reducing the need to travel but has itself a carbon footprint second only to the aircraft industry.

At a national level take up of broadband by the public in Wales is lower than England, but this mainly reflects the demographic profile rather than limited access. The Vale Public Opinion Survey undertaken in 2014 showed 80% of residents use the internet which is an increase from the 72% in the 2010 survey. The biggest difference was by age with 95% of those aged under 55 using the internet but only 54% of those aged 55+ doing so. There are a range of projects being undertaken to improve digital skills and digital access across the Vale of Glamorgan, for example a number of members of the Vale's 50+ Strategy Forum are now trained digital champions who provide drop in IT sessions for older people.

ICT infrastructure is essential in attracting and enabling businesses to operate in the area but having access to the internet can also be important to an individual's well-being, both in an economic sense i.e. being able to access the best online deals etc. but by enabling people to remain socially included. This could be particularly important for older people in the Vale, particularly in the rural Western Vale where there is a risk of social isolation as identified earlier. Internet access and advancements in technology such as video calling would allow people at risk of social isolation to remain in touch with friends and family and be part of new digital communities.

## **Culture and Tourism**

The Understanding Wales' Future Report identifies that one of the most important factors in attracting people to help local businesses thrive is its attractiveness. Places that are attractive to the well-educated will tend to "win" and smaller urban centres will need to base their attractiveness on their overall quality of life.

Attractive places not only help attract residents but tourists and help to improve the area's economic well-being. The provision of tourist and other attractions will also contribute to the cultural well-being of an area.

The total number of visitors to the Vale of Glamorgan for tourism purposes continues to increase. Since the STEAM Tourism report was produced in 2004 to 2015, there has been an 18.5% increase in visitors to the area. In addition there has been a 64.8% increase in the

economic impact of tourism in the Vale of Glamorgan during this time period and a 10.9% increase in total employment supported by the tourism industry.

The Vale benefits from a wide range of natural assets that are valued by residents and visitors alike and our natural environment can be seen as one of biggest attractions to tourists through attractions such as the Heritage Coast and the abundance of blue flag beaches. These attractions also bring about a range of health benefits showing the environment's contribution towards the well-being of our residents.

The Vale's proximity to Cardiff is also important not only in attracting tourism but offering cultural opportunities for residents and visitors with the Vale's proximity to Cardiff and the cultural opportunities the capital city brings highlighted as an asset during the engagement campaign. Although recognised as an asset it should also be noted that this also provides competition.

The National Survey for Wales showed that when considering whether residents have participated in arts events, visited historic places or visited a museum in Wales, the Vale ranked highly compared to other areas in Wales across all three activities showing good participation rates in cultural activities. Analysis of this National Survey data has also shown that attendance rates were not influenced by whether a person lived in an urban or rural area.

The Let's Talk Survey asked respondents to consider how often they participated in activities such as sport, recreational activities and arts and cultural activities. Arts and cultural activities was the category respondents were least likely to say they participated in daily with most saying they participated once or twice a month. Time was highlighted as the biggest factor that stopped respondents participating more, followed by money. This was the case across all age groups with the exception of 18-24 year olds where money was the biggest barrier. A higher proportion of Let's Talk respondents identified arts and cultural activities as fairly or very important than those who said these activities were not important.

## Let's Talk Survey 2016 – How important are the following to you?

Source: Vale of Glamorgan PSB - Let's Talk Survey 2016

With regards to Welsh language and heritage, the Vale has a lower percentage of residents who can speak Welsh than the national average. The rate of Welsh speakers varies across the Vale with lowest rates being observed in areas of the Eastern Vale in addition to St Athan and Llantwit Major which may be attributed to the transient population in this area due to the RAF base. Let's Talk respondents were asked to consider how important a range of aspects were to them including religion, arts and culture, sport, Welsh language and Welsh culture and heritage. Welsh language was the issue that most respondents felt was not important at all and the issue that least respondents thought was fairly or very important. However Welsh culture and heritage was identified as being fairly or very important to a high number of respondents. It is interesting to note that the survey was live during Wales' Euro 2016 football campaign.

## 6.3 Summary

Overall the Vale of Glamorgan is an area with good levels of educational attainment with higher than average incomes and employment rates. However, as with a range of other indicators considered throughout this assessment there are clear areas particularly in the Eastern part of Barry where educational attainment is lower and this can be linked to lower incomes and levels of employment.

In order to ensure our population are given the best possible chance to maximise their opportunities having a good education is of upmost importance. Education acts as the key foundation for the economic success of not only individuals but of the area as well. Education acts as a foundation for employment which offers a high level of protection against poverty, and particularly against deep and persistent poverty (and also contributes directly to well-being). The same areas within the Vale of Glamorgan experience deeply entrenched norms of lower educational achievement, lower employment rates and lower incomes and the influence of socio-economic factors in the early years can be crucial in determining the life chances and opportunities of our future generations.

One of the major challenges is helping our residents not just obtain employment but sustaining that employment which leads to in-work progression helping to secure a better future. The Vale's location could be considered one of its greatest assets in maximising the economic well-being of our residents and the area. The Vale is part of the Capital City Region and five priorities have been identified for economic growth; connectivity, digital, innovation, skills, business support and regeneration. A number of infrastructure projects will help support economic growth in the Vale and wider region including, the Great Western mainline electrification, Cardiff Capital Region Metro and the Cardiff Airport and St Athan Enterprise Zone.

Transport was an issue raised during our engagement and the PSB is mindful of the need to have due regard to the capital region and the metro scheme when planning any activities.

Finally It could be suggested that the Vale is in a unique position to help residents maximise their opportunities. The Vale is an area with good transport links into Cardiff which provides a wealth of economic and cultural opportunities, but is also an area with a rich natural environment as one of its biggest assets. The natural environment attracts visitors further enhancing the area's economy but also provide a range of well-being benefits to residents.

Information within this section of the assessment relates to our position in relation to achieving the following national well-being goals: a Prosperous Wales, a More Equal Wales, a Wales of Cohesive Communities, a Wales of Vibrant Culture and Thriving Welsh Language, a Healthier Wales and a Resilient Wales.

## 6.4 Where we need to increase our evidence base?

The well-being assessment must be seen as an on-going process of better understanding our communities in order to improve our residents' well-being and contribute to achieving the national well-being goals. The PSB will consider how it can ensure our evidence base can be kept 'live' and become a dynamic resource for everyone.

We will also continue to enhance the findings presented in this section of the assessment and recognise that further information is needed in relation to the following, either because robust data is unavailable at the present time or because analysis is still on-going.

- We have identified that some areas experience lower levels of educational attainment, and lower incomes and employment levels. More evidence is being collected to understand the experiences of those who are experiencing financial exclusion such as food and fuel poverty and access to mainstream finance products.
- Digital skills and access is an area where relatively little evidence and data exists at a local level.
- The Childcare Sufficiency Assessment 2016 is currently being undertaken and the findings will be incorporated within this assessment to update against existing evidence from the previous version.
- Data and evidence on cultural well-being is currently focused on a more traditional definition of cultural well-being. We recognise that the meaning of culture can be very different to different population groups and more research would be needed to understand this. For example we recognise that for many young people video gaming is now a large part of their culture.
- Updated educational attainment comparisons to areas of England would help identify how the Vale is currently performing in relation to those areas of a similar socio-economic profile. Further research would also be needed to examine the trends we can expect to observe in the future when comparing to areas in other countries.

## 7. Our Conclusion: The State of Well-being in the Vale of Glamorgan

When the evidence presented within our assessment is considered at a local authority level, it can be considered that the Vale of Glamorgan and its residents have a good level of social, economic, cultural and environmental well-being. Overall the Vale of Glamorgan is comparatively wealthy and many residents enjoy a high standard of living in a safe and attractive environment. However there are areas in the Vale of Glamorgan which suffer from significant disadvantage, including high unemployment, reduced healthy life expectancy, low educational achievement and higher levels of crime. Across these various different factors it is consistently the same areas of the Vale, particularly in the eastern area of Barry, that suffer.

The inequality gap in healthy life expectancy is a cause for concern for the PSB, and areas with the lowest healthy life expectancy correlate to those that are most deprived as identified through WIMD 2014 and are predominantly located in areas within the eastern part of Barry such as Gibbonsdown, Castleland and Buttrills. These areas also have higher levels of obesity, higher smoking levels and higher alcohol-specific mortality rates.

Our detailed evidence report shows that in general young children in the Vale have a good level of well-being although even at a young age, outcomes for children in these same areas of Barry are less desirable than those of their peers demonstrating the importance of experiences in the early years and of the health and well-being of the mother both before, during and after pregnancy.

Low crime rates were seen as a positive aspect of life in the Vale although area differences can be observed with higher crime rates in more deprived areas. Although many areas of the Vale experience low crime rates, the effects when incidents do occur on the well-being of those in the area should not be underestimated.

Findings of our engagement campaign showed that people were generally very positive about life in the Vale and feel they have strong networks of friends and neighbours to rely on. In general people are engaged in community life although those in the most deprived areas, who it can be suggested we need to engage with more, were less likely to participate with lower levels of volunteering and voter turn out rates in these areas. People in the Vale were also less likely to agree that people from different backgrounds got on well together than the average across Wales. Hate crime incidents have steadily increased and the further impact on community cohesion from events such as the EU referendum result and resettlement of Syrian refugees are as yet unknown.

Members of the PSB were concerned with the affordability of housing and the need to ensure local people, especially young people, are not priced out of the communities within which they grew up. They recognised the potential of unsatisfactory/ overcrowded housing on a range of factors such as health and educational attainment.

Overall the Vale of Glamorgan is an area with good levels of educational attainment with higher than average incomes and employment rates. However, again there are clear areas particularly in the Eastern part of Barry where educational attainment is lower and this can be linked to lower incomes and levels of employment.

In order to ensure our population are given the best possible chance to maximise their opportunities having a good education is of upmost importance. Education acts as the key foundation for the economic success of not only individuals but of the area as well.

Education acts as a foundation for employment which offers a high level of protection against poverty, and particularly against deep and persistent poverty (and also contributes directly to well-being). The same areas within the Vale of Glamorgan experience deeply entrenched norms of lower educational achievement, lower employment rates and lower incomes and the influence of socio-economic factors in the early years can be crucial in determining the life chances and opportunities of our future generations.

One of the major challenges is helping our residents not just obtain employment but sustaining that employment which leads to in-work progression helping to secure a better future. The Vale's location could be considered one of its greatest assets in maximising the economic well-being of our residents and the area. The Vale is part of the Capital City Region and five priorities have been identified for economic growth; connectivity, digital, innovation, skills, business support and regeneration. A number of infrastructure projects will help support economic growth in the Vale and wider region including, the Great Western mainline electrification, Cardiff Capital Region Metro and the Cardiff Airport and St Athan Enterprise Zone.

It could be suggested that the Vale is in a unique position to help residents maximise their opportunities. The Vale is an area with good transport links into Cardiff which provides a wealth of economic and cultural opportunities, but is also an area with a rich natural environment as one of its biggest assets.

The natural environment attracts visitors further enhancing the area's economy but also provides a range of well-being benefits to residents. Throughout our engagement campaign the Vale's natural environment was consistently highlighted as one of our biggest assets with residents valuing the positive affect the environment has on their well-being. The sustainable use of our natural assets can be seen as essential in how we plan to improve the well-being of our future generations.

The following SWOT analysis identifies the relative Strengths, Weaknesses, Opportunities and Threats for the Vale of Glamorgan based upon the findings of this assessment.

## Strengths

- A diverse natural environment which is valued by residents and contributes to high levels of participation in sport in addition to other well-being benefits
- Young children have higher than average levels of development
- Decreasing levels of obesity for both adults and children although this is still too high to protect the health of our future generations
- Residents are generally very positive about the Vale as a place to live with the natural environment and good neighbours the most valued assets
- A relatively engaged population with higher than average voter turn-out rates and good volunteering levels
- Lower crime rates compared to other areas of Wales
- High levels of educational attainment which continue to increase including increasing attainment levels for pupils eligible for free school meals
- Low levels of school leavers who become NEET
- Higher than average incomes although large disparities do exist within the county
- Close proximity to Cardiff offering residents a range of cultural and economic opportunities
- Increasing levels of Tourism with a large economic impact in the Vale

## Weaknesses

- Clear inequalities between the 'haves' and the 'have nots' often masked by local authority level statistics
- A lower than average sense of belonging to the area
- The largest inequality gap in healthy life expectancy in Wales for females
- High levels of alcohol consumption particularly by older people in rural areas
- Although crime rates are low particularly in rural areas the impact on well-being may be greater when crime does occur
- Green spaces may not always found in the areas where they are needed most to have a positive impact on well-being
- Lower than average levels of woodland cover
- The environmental benefits of peat are not being realised and appropriate management is needed to secure its carbon store
- Engaging with harder to reach groups still proves challenging and new innovative ways to reach all of our population must be considered
- A risk of isolating those in rural areas who find it difficult to access services
- A lack of data in relation to a number of equality groups to better understand the needs and assets of all of our population

## Opportunities

- Building on success in relation to high levels of development in the early years to raise life-chances
- Regeneration projects continuing to increase levels of tourism and build the Vale brand
- Promote the sustainable use of natural assets particularly to increase play opportunities for children
- Of those who are economically inactive in the Vale, a higher than average level do want a job
- A range of infrastructure and regeneration projects will further support economic growth in the Vale and wider region such as the Capital City Region and the Cardiff Airport Enterprise Zone
- Residents are concerned about the effects of climate change, recognise it as a serious issue and a collective responsibility that we must all work together to minimise
- Residents are digitally active and new digital communities and networks exist that can be used to engage with those who have previously been harder to reach
- Continue work being undertaken through the Integrated Health and Social Care Partnership with regards to taking a 'locality' approach to provide health and social care services within the community

## Threats

- Long term economic impacts of the EU referendum result are unknown, residents of the Vale are concerned about this
- Climate change and the impact of natural disasters
- High house prices which may become unaffordable to local people and the impact this has on a feeling of belonging and community cohesion
- The impact of further welfare reforms increasing the divide between those in the most and least deprived areas
- An increased demand for services due to an ageing population at a time of financial austerity
- Linked to an ageing population particularly in rural areas an increased risk of social isolation due to concerns around transport links in rural communities
- The largest projected increases in jobs available in 2025 are in the residential care and restaurants/mobile food service industries which are traditionally associated as being lower paid jobs and often part time employment
- Threats from rising fuel prices and natural disasters associated with climate change on commuters, the highest proportion of residents commute via car and concerns have been raised over poor road conditions
- The impact of Adverse Childhood Experiences on life chances with high levels of harmful behaviours concentrated in the most deprived areas

## 8. What will we do next?

The PSB has identified a range of broad themes to consider in more detail as part of the next phase of undertaking this well-being assessment. Based on the evidence presented we have identified that in order to ensure the well-being of our future generations, we must work to

- Ensure young children have a good start in life and prevent Adverse Childhood Experiences
- Tackle inequalities linked to deprivation, focusing on a range of issues which are more acute in some of our more deprived communities. This provides an opportunity for a place based approach and builds on some of the PSB's existing work.
- Recognise the importance of and value the environment as one of our greatest assets and consider its contribution to well-being.
- Improve our engagement with our communities, utilising existing networks and being more innovative including the promotion of volunteering.

It is recognised that these are quite broad themes and we will need to consider the best way to approach the more detailed exploration of these topics as part of the next 'response' stage of our analysis and development of our Well-being Plan.

This will involve undertaking a more detailed analysis of programmes and projects already working in these areas, some of which have been touched upon in our more detailed evidence report. By better understanding the work that is already taking place the PSB can consider how we can collectively take action. As part of this work we want your views on whether these are the right areas of focus to move forward with.

Our immediate next steps will involve continuing to enhance and develop the range of products that will comprise our well-being assessment. This will include improving our knowledge base with the addition of a range of further evidence where available and these areas have been highlighted within each section of the assessment. We will also work to develop our 'response' analysis in the areas identified above which will include a more in-depth and evaluative approach to analysing the state of well-being in the Vale of Glamorgan.

We will work to develop a suite of products so that the assessment consists of a range of products including:

- A final version of this overview document
- Four detailed evidence reports – 'Having a Healthy and Active Future', 'Being Part of Safe and Inclusive Communities', 'Maximising Opportunities and Attainment' and 'Our Environment'.

- Community Area Profiles which will include key findings from the assessment for the Vale as a whole and each of the three community areas – Barry, Eastern Vale and Western Vale.
- Summary reports showing age group profiles and series of ‘pen portraits’
- A detailed report on the findings of the ‘Let’s Talk’ engagement campaign.
- A data directory providing details of where the evidence set out within the assessment can be accessed in more detail if required

It is hoped that the above range of products will ensure that the assessment is accessible to a range of audiences and that people are able to access the information in a format and at a level that is appropriate to their needs. Work will also be undertaken to present these products, including this overview document in a more engaging format. We will also need to consider how we ensure the well-being assessment is not a one-off exercise and remains an ongoing process with a dynamic resource available to ensure an up to date evidence base remains available.

We will also continue to engage with our population and ensure a continuous dialogue develops with our communities through the Let’s Talk campaign. We will consider more innovative ways in which we can do so in order to avoid consultation fatigue and reach a wider cross section of our population including those who have previously been considered harder to reach.

In doing so, the well-being assessment will form a robust evidence base from which the PSB can develop its Well-being Plan, identifying collective and deliverable actions to contribute to the national well-being goals and maximise the well-being of communities in the Vale of Glamorgan.

## **Vale of Glamorgan Public Services Board 15<sup>th</sup> December 2016**

### **Draft Wellbeing Assessment**

A number of documents relating to the Well-being Assessment have been circulated to the Board for discussion at today's meeting and these are part of the suite of documents which will form our assessment. In order to keep to our timetable and publish at the end of April the draft assessment needs to be consulted on in January and approved in March. The Suite of documents which form the assessment are detailed in the diagram below.

The documents which will be the focus of our consultation are:

- The Overview Document
- Community Profiles
- Executive Summary and Key Findings summaries
- Executive Summary

Copies of the other more detailed documents will be available on request.

The PSB are requested to:

- Approve the draft Well-being Assessment for consultation, comprising of.
  - ❖ Overview document (circulated 7/12/16)
  - ❖ Community profiles (circulated 12/12/16)
  - ❖ Key Findings Summaries (circulated 12/12/16)
  - ❖ Executive Summary
- Approve the proposed Engagement Plan detailed below.
- Assist with the engagement exercise in terms of promotion and attendance at events.
- Advise on internal arrangements for signing off the WBA post consultation and prior to the PSB on the 9<sup>th</sup> March.

### **Engagement Plan**

Consultation on the draft well-being assessment needs to be undertaken between 9<sup>th</sup> January and 5<sup>th</sup> February 2017 (4 weeks) to provide sufficient time for amendments, translation and approvals prior to publication. The following has been designed to take account of engagement already undertaken, time available and capacity.

<b>Proposed Method s</b>	<b>Suggested Dates</b>
<b>Attendance at Existing Forums</b>	
Vale 50+ Strategy Forum (signpost/community profiles and visuals)	19 <sup>th</sup> January 2017
Youth Forum (signpost/community profiles and visuals)	Awaiting confirmation of date
<b>Public Consultation</b>	
Draft Assessment and questions on line	To commence 9 <sup>th</sup> January – 5 <sup>th</sup> February (4 weeks)
Questions via Facebook over the 4 weeks to build a conversation	To commence 9 <sup>th</sup> January – 5 <sup>th</sup> February (4 weeks)
Drop in sessions and stalls in 3 libraries (signpost/community profiles and visuals)	Dates to be confirmed during 4 week period
<b>Stakeholder consultation</b>	
Two half day workshops (Similar to PSB workshop)	20 <sup>th</sup> Jan AM and 24 <sup>th</sup> Jan PM
Community Liaison Committee	31 <sup>st</sup> January 2017
PAG workshop (Flying Start, Families First, Communities First, Supporting People Boards)	10 <sup>th</sup> February 2017
Circulate draft assessment to list below	To commence 9 <sup>th</sup> January – 5 <sup>th</sup> February (4 weeks)
<b>Members</b>	
Member briefing	To be confirmed
Scrutiny	24 <sup>th</sup> January 2017
Cabinet	6 <sup>th</sup> March 2017

Youth Forum	✓	✓	
Trade Unions	✓		

## **Approving the Wellbeing Assessment**

Below is advice from Welsh Government regarding the approval of the Well-being Assessment.

‘Whilst the Well-being of Future Generations (Wales) Act 2015 requires each PSB to hold a meeting at which each member confirms its approval of the local well-being plan before publication; and sets out how this approval of the local well-being plan is to be carried out, it does not place express requirements on the procedure for how a PSB should seek approval of the Assessment of Local Well-being.

The Assessment can only be published with the approval of the duly authorised representatives of all members, since decisions on exercising the functions of a PSB are decisions for its members and must be unanimous. Each member must consider for itself what is required under its own governance arrangements in order for its representative on the PSB to be authorised to approve the PSB’s assessment of well-being and that is likely to mean taking legal advice.

Approval of the assessment of well-being is one of a PSB’s most significant responsibilities. It is for each PSB member to decide for itself whether to hold a meeting in order to authorise its representative to approve the PSB’s assessment of well-being, having taken full advice on those matters. Holding a meeting to consider whether to authorise its representative to the assessment would allow proper consideration and discussion of the factors bearing on whether or not to approve the assessment, including in particular responses to the consultation on the draft assessment and any other matters to which it is required to have regard, including, by way of example only, the public sector equality duty under section 149 of the Equality Act 2010 or any applicable Welsh Language Standards. Holding a meeting to consider this question would also help to demonstrate transparency, regularity and propriety. It is for each PSB member to take its own advice on these matters.’

It is intended that following consultation that the revised Well-being Assessment will be emailed to the Board on the 13<sup>th</sup> February to provide any comments by the 17<sup>th</sup> February. The revised assessment would then be sent out to all members by the 22<sup>nd</sup> February to approve prior to the PSB meeting on the 9<sup>th</sup> March.

We would expect to have ongoing dialogue with the PSB throughout the consultation period to discuss any significant changes and would also request that members of the PSB have discussions about the draft assessment during the consultation period to identify any concerns as early as possible.

## Key Findings – Being Part of Safe and Inclusive Communities

### Housing

- The majority of households, 72.5%, own their own home and the average house price is one of the highest in Wales. But how affordable is housing in the Vale for young people?
- The number of households renting privately has more than doubled from 4,033 households in 1991 to 8,379 in 2011.
- The percentage of overcrowded households is 3.86%, which is lower than Wales at 5.53%. There is a wide range between the lowest (0.0% in 'Illtyd 1') and the highest (12.2% in 'Gibbonsdown 2') LSOAs.
- The number of households affected by the spare room subsidy has been steadily decreasing since the 2012 welfare reforms were first introduced however more information is needed to understand the reasons for this.
- The findings of the Let's Talk survey showed that the majority of residents were either very or fairly satisfied with the quality of their homes.

### Community Involvement

- The Let's Talk survey showed that having a say in decisions is very important to Vale residents which may explain why voter turnout rates are high, despite this, few reported believing that they are actually able to influence decisions.
- Levels of political engagement varies markedly across the Vale of Glamorgan.
- People valued having good neighbours and opportunities to be involved in different groups.
- 73% of Vale residents agreed that people from different backgrounds got on well together, below the 79.6% Welsh average and the 3<sup>rd</sup> lowest in Wales.
- The percentage of people who report volunteering formally in the Vale of Glamorgan is broadly in line with the Welsh average. However, when considering those who report volunteering informally the Vale showed one of the highest percentages across Wales.
- Residents in the Western Vale are more likely to volunteer followed by the Eastern Vale.
- Age and social isolation were concerns raised regarding future social wellbeing in the survey responses and by 2035 it is predicted that approximately double the number of females aged 65+ will be living alone compared to males.

## Community Safety

- The percentage of children in need where domestic abuse is a parenting factor in the Vale of Glamorgan was the highest in Wales (51%) at March 2015 and further research would be needed to understand the reasons for this. (Children in Need Census, Welsh Govt.)
- The overall rate of offences in the Vale has consistently been below the Welsh average. A lack of crime was highlighted as one of the positives during the engagement although anti-social behaviour was raised as an issue.
- 7 LSOAs in the Vale of Glamorgan are in the top 10% most deprived LSOAs in Wales according to the WIMD 2014 Community Safety Domain.
- In the Barry area, Castleland 2G observed the highest rates of crime across a number of indicators including rates of violent crime, criminal damage and ASB. This area includes Holton Road and is the location of many shops, cafes, Barry leisure centre, the Council Civic Offices and areas of open space.
- The rate of violence against the person offences has increased in recent years in the Vale although a similar trend is also observed in other areas of Wales. Large increases have particularly been observed in areas of Barry such as Dyfan (a 72% increase in 2014/15 compared to 2013/14). In addition there has also been an increase in possession of weapons offences in this area and some other parts of Barry, although overall numbers remain small.
- Hate crime incidents have been increasing in recent years with the conversion rate between incidents and those that are classified as crimes also increasing.
- Total fire incidents slightly increased in the Vale between 2014/15 and 2015/16.
- Responses to the community safety questions in the well-being survey were overall very positive.

## What have you told us and how should we respond

- Having a say in decisions is very important but the number of people believing they can influence decisions is low.
- In general residents have reported that they feel safe in everyday life but as might be expected, people feel less safe after dark. A lack of crime was highlighted as one of the most positive things about living in the Vale of Glamorgan; however, older people in particular felt anti-social behaviour was an issue in their area.
- The percentage of residents who rated their life satisfaction as 7 out of 10 or above was slightly lower than the Welsh average but throughout the Let's Talk engagement campaign residents have been very positive.
- Community and group interaction and friends and neighbours are seen as important for well-being.
- What are the assets in our communities that we need to build on and how do we improve how we engage with our local communities?

## Key Findings – Having a Healthy and Active Future

### Life Expectancy and Mortality Rates

- Although the Vale ranks highly for overall life expectancy (4<sup>th</sup> highest in Wales for males and 5<sup>th</sup> highest for females), when considering healthy life expectancy the Vale does not rank as highly. For healthy life expectancy in males the Vale ranks 9<sup>th</sup> of 22 local authority areas, and in females the Vale ranks joint 8<sup>th</sup> for the 2010-14 period.
- When considering life expectancy, the biggest differences can be observed between deprivation fifths as opposed to gender particularly in relation to healthy life expectancy. Males in the least deprived LSOAs in the Vale experience 20.9 more years of life in good health compared to those in the most deprived LSOAs.
- The difference is even starker for females with those in the least deprived LSOAs experiencing 23.4 more years of life in good health compared to those in the most deprived LSOAs.
- This inequality gap in healthy life expectancy for females in the 2010-14 period is the largest observed across Wales which is a cause for concern and an area which requires further analysis.
- The Vale has a relatively healthy older population overall.
- The Vale has a statistically significantly lower mortality rate than the Welsh average for all ages.
- There is a higher mortality rate for under 75s in the Barry area compared to other areas of the Vale.

### A Healthy Start

- Young children across the Vale show good levels of development in relation to health behaviours.
- The percentage of women who report drinking alcohol and smoking during pregnancy across Cardiff and the Vale is low compared to other health board areas. Although the number of women who report using other substances during pregnancy is also low, the percentage who report to have stopped using these substances during pregnancy was 0% in 2014/15. Further analysis would be needed to determine whether this is attributed to data collection methods or not.
- In 2015/16 the percentage of Foundation Phase children reaching the expected development outcome or above across all areas of development was the highest across the Central South Education Consortium Area and was the 2<sup>nd</sup> highest in Wales behind Monmouthshire.

## Substance Misuse and Smoking

- Alcohol consumption across the Vale of Glamorgan and Cardiff and Vale UHB area for adults is higher than levels observed elsewhere in Wales. Levels of binge and very heavy drinking are highest in the more affluent areas of the Vale particularly rural areas in the Western Vale.
- The percentage of adults who report being a smoker in the Vale of Glamorgan is one of the lowest rates in Wales, however following a period of this percentage decreasing, latest data shows smoking rates have increased slightly in the Vale. Levels of smoking are far higher in the East of Barry than other areas of the Vale, these LSOAs correspond to those considered to be most deprived as according to WIMD 2014.
- The top 3 most prevalent substances used in Cardiff and the Vale of Glamorgan continue to be alcohol, cannabis and heroin with alcohol by far the most prevalent substance.
- The number of males referred to substance misuse services is consistently higher than the number of females.
- Drug related deaths have increased in the Vale of Glamorgan and tackling this is a key responsibility of the Area Planning Board (APB).

## Obesity/Healthy Eating

- Overall the level of obesity in the Vale of Glamorgan is decreasing for both adults and children.
- However inequalities can be observed within the Vale of Glamorgan with the more deprived LSOAs around Barry displaying a higher number of adults who are overweight or obese.
- Differences can also be observed across age groups and should the current status quo continue, by 2025 77% of males aged 45-64 in Cardiff and the Vale of Glamorgan will be overweight or obese.
- The percentage of adults consuming five or more portions of fruit and vegetables daily in the Vale of Glamorgan is slightly lower than the Welsh average but has increased in recent years.
- The percentage of reception age children (4 to 5 year olds) who are overweight or obese in the Vale of Glamorgan has decreased in recent years and is the lowest in Wales. Again there are also higher levels of children in the Barry area who are overweight or obese compared to other parts of the Vale.
- Consumption of fizzy and sugary drinks by children in Cardiff and the Vale of Glamorgan is higher than in other areas.
- Young people commented that food prices were high which can affect their ability to make healthy choices; older respondents did not raise this issue.

## Physical Activity and Play

- The Vale has an active population with a higher than average percentage of adults 'hooked on sport' and participating more than three times a week.
- Time is the biggest barrier to increased participation in sport for both adults and children.
- There is a less clear link between deprivation and lower levels of physical activity whereas there is a much stronger link for other health behaviours such as higher levels of obesity.
- The natural environment plays an important role in keeping Vale residents active, particularly in relation to the Western Vale where adults are likely to use their natural environment to keep physically active as opposed to visiting a leisure centre or gym.
- More children in the Vale have participated in water based activities compared to the Welsh average.
- The use of natural assets and increasing communities understanding of the need to widen the areas where people perceive children can play and what 'play' really means is seen as essential in future planning of provision.
- More facilities and activities for children and young people was a common issue during the engagement.

## What have you told us and how should we respond?

- The most important factor residents said contributed to having good mental and physical well-being were the built environment and natural environment and access to health services.
- A number of social housing tenants in Barry commented on mental health services being important in helping maintain good levels of well-being.
- Good access to health care services and GP appointments was seen as one of the most important factors to keep fit and healthy with residents commenting that they would like better access to their GP.
- How should members of the Public Services Board work together and with the community to address the many issues which contribute to us having a healthy and active future?
- Should we pay particular attention to a particular age group, community or area in the Vale of Glamorgan?

## **Key Findings – Maximising Opportunities and Attainment**

### **Education and Skills**

- International evidence suggests the biggest opportunities for changing life chances lie in the pre-school years, although action at every stage of a child's life is important. The percentage of 4-5 year olds reaching the expected outcome or above in the Foundation Phase was 91.2% in 2015/16, the second highest in Wales.
- Overall, standards have improved in all key education performance indicators and in nearly all cases the rate of improvement has been greater in the Vale than the Wales average. School attendance remains in the top quartile of performance in Wales for both secondary and primary schools.
- While overall the Vale of Glamorgan performs well for KS4 pupils achieving the Level 2 threshold when compared to others in Wales, levels of attainment vary greatly across the county.
- In the Vale of Glamorgan 11.8% of primary and secondary school pupils are eligible for free school meals.
- In all the main performance indicators across all phases, the performance of pupils entitled to free school meals has improved since 2012, albeit not always at the same rate as their peers.
- The percentage of year 11 pupils who become NEET continues to decrease year on year and remains below the Welsh average for 2015-16. The Vale has performed well at all age groups for 2015/16.
- The success rate for adult and community learning courses for priority learners in the Vale of Glamorgan was 86% in 2014/15.
- Qualification levels for those aged 16-64 in the Vale are above the Welsh average.
- There are a range of projects being undertaken to improve digital skills and digital access across the Vale of Glamorgan.

### **Financial Inclusion**

- Average weekly earnings in the Vale are higher than the Welsh and UK average but differences in income can be observed within the Vale of Glamorgan. Median household incomes in Barry are significantly lower than areas of the Eastern and Western Vale.
- Across Wales 17% of the population are experiencing income deprivation compared to 14% in the Vale. At LSOA level Dinas Powys 1 had the lowest percentage experiencing income deprivation (4%), compared to Gibbonsdown 2 with the highest at 41% - more than double the Wales figure.
- Areas of the Vale which observe the lowest household incomes are also those with the lowest employment rates.
- Of those who are economically active in the Vale 74% are in employment, slightly higher than the Welsh and UK average. 4% are unemployed which is lower than the Welsh and UK averages. Of those who are economically inactive in the Vale 28.2% want a job, slightly higher than the Welsh and UK average.
- The average cost of a nursery place or after school club is lower than the British average but childminder costs are higher.
- The Let's Talk survey results showed that the majority of respondents felt their economic well-being would decrease over the next 5 years.

## Economy and Employment

- A number of infrastructure and regeneration projects will help support economic growth in the Vale and wider region including the Cardiff Airport Enterprise Zone.
- The Vale is part of the Capital City Region and five priorities have been identified for economic growth: connectivity, digital, innovation, skills, business support and regeneration.
- When considering the projected change in jobs by industry in 2020 compared to 2014, the biggest losses are projected to be in public administration and defence, and the manufacture of plastics industries. The largest projected increases in jobs are predicted to be in the residential care and restaurants and mobile food service industries
- Attractiveness of places is recognised as one of the most important factors to help businesses thrive.
- The Vale of Glamorgan had the highest rate of businesses reaching 5 years trading in Wales.
- The percentage of working age people claiming Job Seekers Allowance has increased and is now in line with the Welsh average. This is attributed to the Welsh average falling rather than the rate in the Vale significantly increasing. The highest percentages of working age people claiming JSA can be found in Barry and in St. Athan in the Western Vale. The percentage of JSA claimants who are aged 17-24 in the Vale has previously been in line with the Welsh average but began to increase above average in September 2015.
- The Vale has a lower than Welsh average percentage of workless households and children living in workless households.
- The percentage of working aged people aged 50+ in employment is higher in the Vale than the Welsh average.

## Culture and Tourism

- A higher proportion of Let's Talk respondents identified arts and cultural activities as fairly or very important than those who said these activities were not important.
- The total number of visitors to the Vale of Glamorgan for tourism purposes continues to increase. Since the STEAM Tourism report was first produced in 2003 to 2014, there has been an 18.2% increase in visitors. In addition, there has been a 65.9% increase in the economic impact of tourism in the Vale of Glamorgan during this time period and a 17.5% increase in total employment supported by the tourism industry.
- Our engagement highlighted the Vale's proximity to Cardiff and the cultural opportunities the capital city brings as an asset.
- The National Survey for Wales showed that when considering whether residents have participated in arts events, visited historic places or visited a museum in Wales, the Vale ranked highly compared to other areas in Wales.
- The Vale has a lower percentage of residents who can speak Welsh than the national average.
- Let's Talk respondents were asked to consider how important a range of aspects were to them including religion, arts and culture, sport, Welsh language and Welsh culture and heritage. Welsh language was the issue that most respondents felt was not important at all and the issue that least respondents thought was fairly or very important. However Welsh culture and heritage was identified as being fairly or very important to a high number of respondents.

## Transport

- Objectives in the Vale's Local Transport Plan which complements the Local Development Plan include: increasing the number of cycle trips, increasing the number of park and ride spaces and users, reducing congestion and improving air quality at strategic junctions and improving accessibility to bus services.
- In response to the Active Travel (Wales) Act 2013 the Council is seeking to address the transport issues in areas of inactivity within the Communities First cluster area in Barry as well as other centres of population. In rural locations where Active Travel Schemes cannot be achieved, community transport and bus service provision will be promoted to support improvements in accessibility for the more vulnerable user groups.
- There are a number of community transport services in the Vale including the Greenlinks service.
- The metro vision for the capital region is for a multi-modal rapid transit network integrating all transport modules offering the passenger a single ticket 'turn up and go' experience. The metro project has been allocated £62 million for planning work and delivery of other improvements to public transport in the region.
- Transport was often raised as a topic during the engagement undertaken for the assessment. Respondents wanted improvements to public transport in particular the frequency of buses and trains in rural areas although some felt there were good services. The condition of roads and pavements was also a frequently raised issue.
- There are 58,800 working residents in the Vale of Glamorgan. 28,500 residents work in the area and 30,300 commute out of the area. 14,300 people commute into the area. The majority commuting out of the area work in Cardiff and much smaller numbers are commuting to Bridgend and Rhondda Cynon Taf.
- Most people (64.5%) travel to work by driving, this is slightly higher than the Welsh average (63.8%).

## What have you told us and how should we respond?

- The Let's Talk survey showed most respondents were satisfied with their job but there were differing experiences in terms of training opportunities.
- Access to, and costs of, public transport are a concern.
- The percentage of residents using the internet has increased but there are differences - 95% under 55 using the internet but only 54% of over 55s do.
- The natural environment is recognised as one of the Vale's most attractive features and greatest assets.
- Participation by residents in arts events, visits to historic places and museums ranks highly compared to other areas in Wales.
- How do we maximise opportunities for different age groups and communities?
- What is the role of culture and the environment in maximising opportunities?

## Key Findings – Our Environment

### Assets

- 27 sites of Special Scientific Interest (SSSIs), 1 Special Protection Area, 3 Special Areas of Conservation and 1 RAMSAR site. (2013)
- 740 listed buildings over 100 Scheduled Ancient Monuments, 39 Conservation Areas, 18 areas included in the Register of Landscapes of Historic Parks and Gardens and 2 areas on the Register of Landscapes of Historic Interest in Wales. (2013)
- Our rivers, lakes, estuaries, coastline and beaches provide us with important natural benefits, many of which contribute to the well-being of local communities and the wider population. Natural benefits include access to drinking water, clean rivers and seas for recreation and relaxation.
- There are a wide variety of habitats in the Vale and several nationally important grassland SSSI within the Vale and areas of high biological diversity.
- Greenspace and trees can contribute to physical and mental well-being but are not always located close to the people who need them most.
- Our experience and interaction with landscape can have a positive effect on health and wellbeing.
- The [Vale of Glamorgan Deposit Local Development Plan 2011 - 2026](#) sets out the vision, objectives, strategy and policies for managing growth and development in the Vale of Glamorgan whilst protecting and enhancing the environment.

### Challenges

- Nine of the Vale LSOAs are within the 10% of most deprived LSOAs within the environment domain of the Wales Index of Multiple Deprivation. This is the domain where the Vale has the most LSOAs in the 10% most deprived LSOAs in Wales.
- Carbon emissions increased from 2009 to 2013. The average Co2 tonnes per resident in 2013 was 10.1 tonnes compared to 9.6 for Wales.
- There is a need to reduce our ecological footprint per person and as organisations.
- Flooding is the most frequent type of natural disaster and the communities at highest risk from flooding are Cowbridge, Dinas Powys and parts of Barry. Llantwit Major is also at risk.
- The UK Climate Change Risk Assessment highlights a number of key risks for Wales that have implications for the Vale of Glamorgan. These include, reductions in river flows and water availability in summers but also increases in flooding. Other risks include changes in coastal evolution, increases in the risk of pests and diseases and changes in soil conditions and biodiversity.
- Potential rises in sea levels as a result of climate change may pose a threat to our coastal environment as well as towns and villages situated on the coast.
- Air quality complies with regulations to protect human health and meets the relevant air quality objectives but will continue to be monitored.

## A Provider of Services

- Coasts and seas provide jobs, food and opportunities for recreation, energy generation and enjoyment of wildlife, landscape and cultural heritage.
- Animals, plants and other organisms and their habitats play many functional roles in ecosystems and the processes which underpin food production, clean water and pollination.
- Woodland and trees help regulate our climate, provide income and jobs, store carbon, contribute to reducing flood and low river flow risk, safeguard soils, improve air quality, reduce noise and regulate pests and diseases. Woodlands cover only 8.2% of the county which is below the Wales average of 14%.
- Outdoor recreation can make a significant contribution to physical health and mental well-being.
- Access to countryside, water and green space close to where people live is increasingly important, providing health, economic and social benefits.

## What you told us and how should we respond?

- Engagement undertaken at events has highlighted that the local environment is important to residents who value proximity to and access to the countryside/seaside and greenspaces.
- According to the Let's Talk survey the majority of respondents do not believe their environmental well-being will improve over the next five years.
- Engagement also highlighted that for many people litter/cleanliness and dog mess are issues in the Vale.
- Our environment is an asset but how do we ensure that we recognise and respect its value and contribution to different services?
- Residents are concerned about climate change and believe it is the responsibility of organisations and individuals, how should the Public Services Board respond to risks associated with climate change?

## Community Profile – Barry

Note: Key findings from the assessment for this area will be added prior to final publication

For the purposes of the Well-being Assessment and to gain a better understanding of our communities in the Vale of Glamorgan we have divided the area in to three communities, Barry, Western Vale and Eastern Vale. These community profiles have been developed to complement the Vale of Glamorgan profile and we will continue to enhance these profiles as part of our ongoing engagement through the Public Services Board. The profile brings together a range of information about the area including population data, details of projects and assets within the community, it is not intended to be a directory of services but provides some key information about the area. This community profile focuses on the area of Barry as detailed in the map below and the area is made up of the following wards:

- Dyfan
- Gibbonsdown
- Court
- Cadoc
- Illtyd
- Buttrills
- Baruc
- Castleland

## **Population data and key statistics for the area**

Note – Data in the following table is based on 2011 Census figures unless otherwise stated. Therefore these figures could differ slightly from those published elsewhere.

The following table provides a comparison **between** our community areas for a range of key statistics.

	Barry	Eastern Vale	Western Vale	Vale of Glamorgan	Wales
<b>Demography and Dynamics</b>					
Resident Population (June 2015)	52,200	36,800	38,500	127,500	3,099,086
Area (Hectares)	1,845	3,542	27,699	33,095	2,073,511
Population Density (number of persons per hectare)	27.8	10.3	1.4	3.8	1.5
% Population Aged 0-15	20.5	17.4	18	18.9	18.2
% Population Aged 16-24	11.2	9.2	10.8	10.5	12.2
% Population Aged 16-64	64.3	61.4	62.4	62.9	63.5
% Population Aged 65+	15.2	21.2	19.6	18.3	18.4
% Population Aged 3+ Able to Speak Welsh	11.1	10.5	10.8	10.8	19
% Population Whose Day-to-Day Activities are Limited	22.4	20.1	17.7	20.3	22.7
<b>Employment</b>					
% JSA Claimants	3.6	1	1.4	2.2	2.8
% Population Employed in Professional Occupations	12	24.6	20.3	18.3	15.8
<b>Tenure (Percentages may not tally to 100% as other tenure options are available)</b>					
Number of Households	22,167	15,833	15,505	53,505	1,302,676
% Owned Outright	26.9	40.1	42.9	35.8	33.4

	Barry	Eastern Vale	Western Vale	Vale of Glamorgan	Wales
% Owned with Mortgage/Loan	36.9	36.2	37.3	36.8	32
% Social Rented - Local Authority	11.5	4.7	4.7	7.5	9.9
% Social Rented - Other	7.1	3.8	1	4.4	6.7
% Private Rented	14.8	12.2	10	12.7	12.7
<b>Household Composition</b>					
% Lone Pensioner Households	12.2	15.3	12.4	13.2	13.7
% Lone Parent Households	14.5	9.4	8.5	7.5	7.5
<b>Household Facilities</b>					
% Households No Access to a Car or Van	27	17.4	10.6	19.4	22.9
% Households with No Central Heating	1.9	2	1.1	1.7	2.3

In addition to differences between our communities, differences also exist **within** them. The Welsh Index of Multiple Deprivation 2014 can be used to demonstrate this. The following table shows the ranks of each LSOA that comprises the Barry Community area across all of the domains that comprise the index.

**Note: This data will be mapped prior to final publication in April 2017**

**WIMD 2014 -Rank of LSOA, where 1 is the Most Deprived LSOA, and 1909 is the Least Deprived LSOA.**

LSOA Name (Eng)	WIMD 2014	Income	Employment	Health	Education	Access to Services	Community Safety	Physical Environment	Housing

## **The local area**

Almost every area of the Vale of Glamorgan has its own community council, for Barry this is Barry Town Council. There are a range of community and cultural facilities in Barry including the Memo Arts Centre which is a vibrant and exciting multi-purpose arts venue with a cinema and Art Central Gallery which is located in Barry Town Hall.

There are also good rail links to Cardiff and the region with four stations located in the town and Barry Island. The regeneration of the town and Barry Island has significantly improved opportunities, housing and the local environment and has helped increase visitor numbers to the Island and attendance at the many events now held in the resort.

Barry also benefits from having a community hospital which provides a variety of primary and secondary care services, including: Outpatients, Minor Injuries, Radiology, Rehabilitation Wards, Mental Health Services for Older People (MHSOP) Wards, Therapies, Dental, GP and Out of Hours Services.

Cardiff and Vale College is one of the largest colleges in the country and has had a base in Barry for over 50 years – supporting individuals, employers and the community across the county. The campus at Colcot Road, includes teaching facilities for a huge range of courses, as well as facilities for the community.

Other facilities and amenities in the area include:

- 7 GP practices
- 1 Police Station
- 1 Fire Station
- 1 Library
- 12 Community Centres
- 8 Parks
- 21 schools
- 8 Allotment sites
- 2 foodbanks

## **Key Features/Projects in the area**

There are a number of projects being undertaken in partnership and with the local community which are Barry specific. These include:

**Communities First** is the Welsh Government's Community-Focussed 'Tackling Poverty' Programme. The programme supports the most disadvantaged people in the most deprived areas of Wales with the aim of contributing to alleviating persistent poverty. In Barry, it operates in parts of the following wards: Buttrills, Cadoc, Castleland, Court and Gibbonsdown. Funding for 2016/17 is £580,912.02 however the future of the programme is currently uncertain.

**Flying Start** is funded by Welsh Government and aims to make a decisive difference to the life chances of children aged under 4 in the areas which it runs. It includes four core elements –free quality childcare, parenting support, intensive health visitor support, and support for early literacy. The budget for 2016-17 is £2,562,000. The programme is targeted at families in specific post code areas of Barry in the following wards: Buttrills, Castleland, Cadoc, Court, Illtyd and Gibbonsdown.

**The Barry Regeneration Advisory Group** brings together knowledge and experience in the field of regeneration to promote good practice, equality and innovation and to provide independent advice and recommendations. Barry has undergone significant change in recent years as a result of regeneration activity ranging, amongst others, from improvements to Holton Road and the renewal of housing in Castleland to the on-going regeneration of Barry Island. Alongside this, the commencement of the next phase of redevelopment of the former Dock area which will bring with it a new school, housing, retailing and a connecting road to the island indicates a continued momentum.

**Vibrant and Viable Places Programme of Investment 2014 – 2017** is a Welsh Government programme which has invested £1 million in Barry over 3 years. Funding from the Tackling Poverty Fund has helped deliver regeneration projects in Barry. The following projects are being supported by public, private and third sector investment:

- Glamorgan Voluntary Services, Third Sector Hub
- [George Street Play Area Improvements](#)
- [Holton Road Grant Programme](#)
- Main Street Grant Programme

- Victoria Gardens Improvements
- Fuel Poverty Reduction Measures
- [Dryden Terrace and Meggitt Road Play Area Improvements](#)
- [Hatch Quarry Play Area Improvements](#)
- YMCA Barry, Third Sector Youth Partnership and Community Internet Café

### **What we learnt through our engagement**

Through our engagement we learnt that people are proud of Barry but would like to see improvements to public transport and cleanliness in the town. These were common themes across the Vale of Glamorgan. Overall people in Barry are also satisfied with where they live as can be seen below.

However, in Barry there was a higher proportion of people who disagreed that they belonged to their area, 30 (13.2%) “tend to disagree” and 14 (6.1%) “strongly disagree” than in the other areas of the Vale. A consistent theme which emerged through our engagement was that people in Barry felt a strong sense of community.

As part of our engagement we also asked people questions at a range of events and to complete postcards. 81 residents from Barry completed the postcards. In answer to the question ‘what is good about where you live?’ the most common responses were about transport and proximity to shops and facilities. Respondents also highlighted parks, quiet and amenities. This was also the area of the Vale which had the most responses where nothing was identified as being good about the area. We also asked people what could be better about the area and in the Barry area the most common issues raised were anti-social behaviour, parking and transport and cleanliness and litter.

The final question we asked was about what services are important for health and wellbeing and the most common answers from Barry residents were access to leisure facilities and GP appointments and health services. Many of the answers given to these questions were consistent across the Vale of Glamorgan and more information is available in the separate ‘Let’s Talk about the Vale’ Engagement report.

As we continue to engage with the local community as part of the development of our well-being objectives and plan we will be keen to explore in more detail what people value about their local area and what would improve their social, economic, environmental and cultural well-being.

## **Community Profile – Eastern Vale**

Note: Key findings from the assessment for this area will be added prior to final publication

### **Introduction**

For the purposes of the Well-being Assessment and to gain a better understanding of our communities in the Vale of Glamorgan we have divided the area in to three communities, Barry, Western Vale and Eastern Vale. These community profiles have been developed to complement the Vale of Glamorgan profile and we will continue to enhance these profiles as part of our ongoing engagement through the Public Services Board. The profile brings together a range of information about the area including population data, details of projects and assets within the community, it is not intended to be a directory of services but provides some key information about the area. This community profile focuses on the Eastern Vale as detailed in the map and the area is made up of the following wards:

The area is made up of the following wards

- Dinas Powys
- Sully
- Llandough
- Cornerswell
- St. Augustine's
- Stanwell
- Plymouth

## **Population data and key statistics for the area**

Note – Data in the following table is based on 2011 Census figures unless otherwise stated. Therefore these figures could differ slightly from those published elsewhere.

The following table provides a comparison **between** our community areas for a range of key statistics.

	Barry	Eastern Vale	Western Vale	Vale of Glamorgan	Wales
<b>Demography and Dynamics</b>

## **The local area**

Almost every area of the Vale of Glamorgan has its own community council and in the Eastern Vale there is one Town Council, Penarth and 4 Community Councils. There are a range of community and cultural facilities in the area including the Paget Rooms in the heart of Penarth which hosts a wide variety of theatre productions and concerts throughout the year and also the award winning Penarth Pier Pavilion which hosts exhibitions and a cinema. In addition there is Cosmeston Lakes Country Park and the picturesque sea front.

The area has good rail links to Cardiff and the region with four stations in the area.

The University Hospital Llandough is also located in the area and has undergone a major investment and expansion to services in recent years including the opening of a new Adult Mental Health Centre.

There are a wide range of community groups and support available in the area including a food bank, access to community transport and Dinas Powys Voluntary Concern which provides a service to individuals, groups and to many of the fifty or so voluntary organisations operating in Dinas Powys.

Other facilities and amenities in the area include:

- 6 GP practices
- 1 Fire Station
- 3 Libraries
- 4 Community Centres
- 6 Parks
- 16 schools

### **Key Features/Projects in the area**

***Creative Rural Communities (CRC)*** was established in 2004 and is a rural regeneration initiative which is funded through the Welsh Government Rural Communities – Rural Development Programme 2014-2020, the European Agricultural Fund for Rural Development and the Vale of Glamorgan Council. Work is undertaken in partnership with communities to develop innovative projects and ideas that will create long term social and economic benefits for the Vale of Glamorgan. The aim is to empower individuals to become actively involved in the future of their communities. The programme is overseen by a Local Action Group (LAG), membership of this group comes from the Private, Public, Voluntary and Community Sectors of the Vale. The programme covers Dinas Powys and Sully.

## What we learnt through our engagement

The graph below shows that respondents to the Let's Talk survey who live in the Eastern Vale tend to be very or fairly satisfied with the Vale of Glamorgan as a place to live.

The majority of respondents across the three areas of the Vale of Glamorgan are either “very” or “fairly” satisfied with the Vale of Glamorgan as a place to live. There is little disparity between the three areas of the Vale of Glamorgan in terms of satisfaction but the Eastern Vale is noted as the area in which respondents were most satisfied with as a place to live.

At the Penarth Festival which was the first event we attended as part of our engagement programme we trialled three questions speaking with 22 people, although these responses have provided us with some useful information the questions were found to be too complex and were replaced with a more straightforward approach.

The questions asked in Penarth and an indication of some of the responses are detailed below:

- **Please tell us what matters most to you about your health and well-being?**
  - ❖ Spending time with family and friends
  - ❖ Being fit
  - ❖ Keeping mobile and healthy
  - ❖ Healthy eating
  - ❖ Access to health services
  - ❖ Access to outdoor space
  
- **What would help you most to remain independent and prevent you needing care and support in the future?**
  - ❖ Keeping fit and active
  - ❖ Good health
  - ❖ Health services
  - ❖ Screening
  - ❖ Local support
  - ❖ Transport
  - ❖ Suitable older peoples accommodation
  
- **How should services (public, voluntary or private) change to help improve health and well-being?**
  - ❖ Local facilities
  - ❖ 'public services are good at the moment'
  - ❖ Better co-ordination of services Inc. health and public transport
  - ❖ Walk in centres for health and information

- ❖ Services open on Saturdays
- ❖ Support people to stay at home

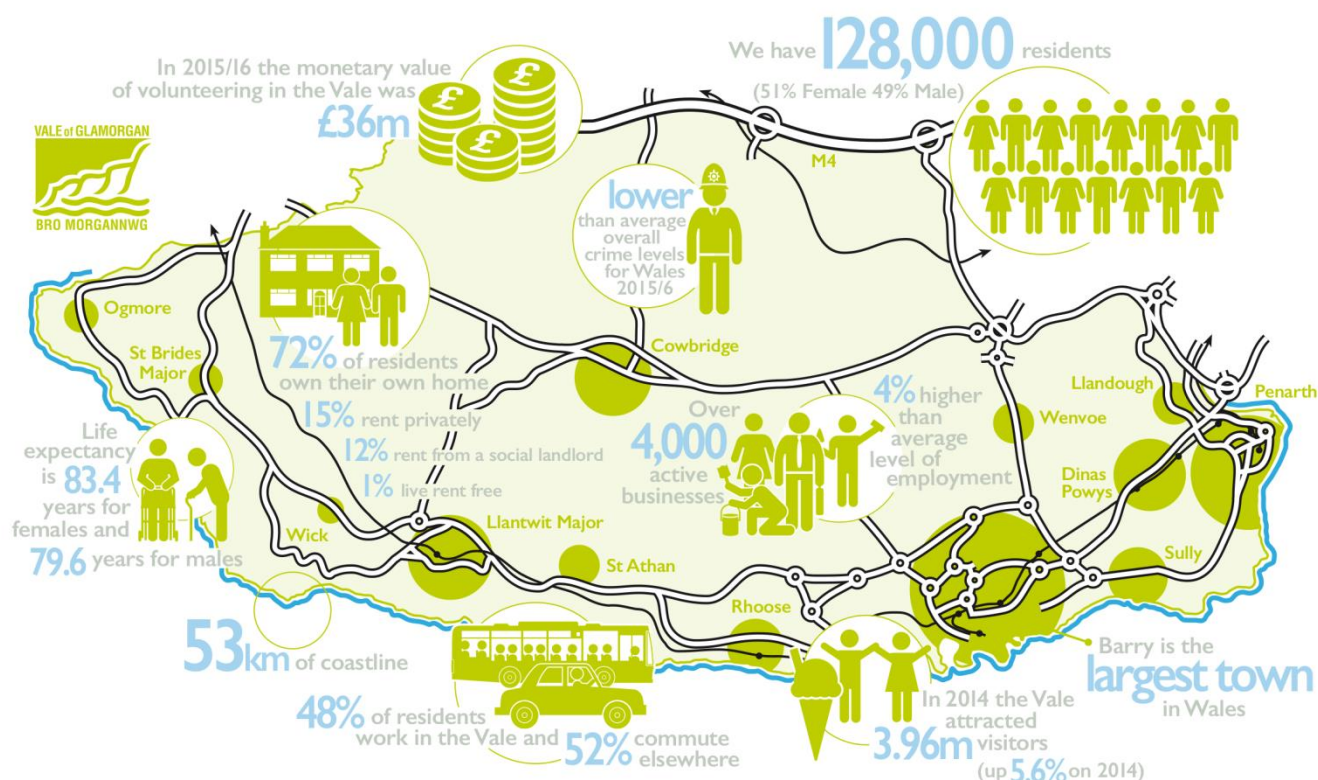

These questions were subsequently amended and the new questions used on postcards and at events. 32 postcards were completed by residents in the Eastern area which is only a small number. The most common response to the question what's good about where you live related to the area being quiet and having good neighbours and being part of the community. Good transport and access to the shops were common themes as was being close to the sea and countryside. In the Eastern Vale the most common issues raised in response to what could be better were, public transport, parking and the state of the roads. In response to the question what services are important for your health and well-being the most common responses related to access to leisure facilities, access to the GP for appointments and being part of the community e.g. through involvement in a local group. Many of the answers given to these questions were consistent across the Vale of Glamorgan and more information is available in the separate 'Let's Talk about the Vale' Engagement report.

As we continue to engage with the local community as part of the development of our well-being objectives and plan we will be keen to explore in more detail what people value about their local area and what would improve their social, economic, environmental and cultural well-being.

## A profile of the Vale of Glamorgan

The Vale of Glamorgan is a diverse and beautiful part of Wales. The county is characterised by rolling countryside, coastal communities, busy towns and rural villages but also includes Cardiff Airport, a variety of industry and businesses and Wales's largest town. The area benefits from good road and rail links and is well placed within the region as an area for employment as a visitor destination and a place to live. The map below shows some key facts about the Vale of Glamorgan.

There are however areas of poverty and deprivation and partners are working with local communities to ensure that the needs of different communities are understood and are met, so that all citizens can look forward to a bright future.

### Our population

The population of the Vale of Glamorgan as per 2015 mid-year estimates based on 2011 Census data was just under 128,000. Of these, approximately 51% are female and 49% male.

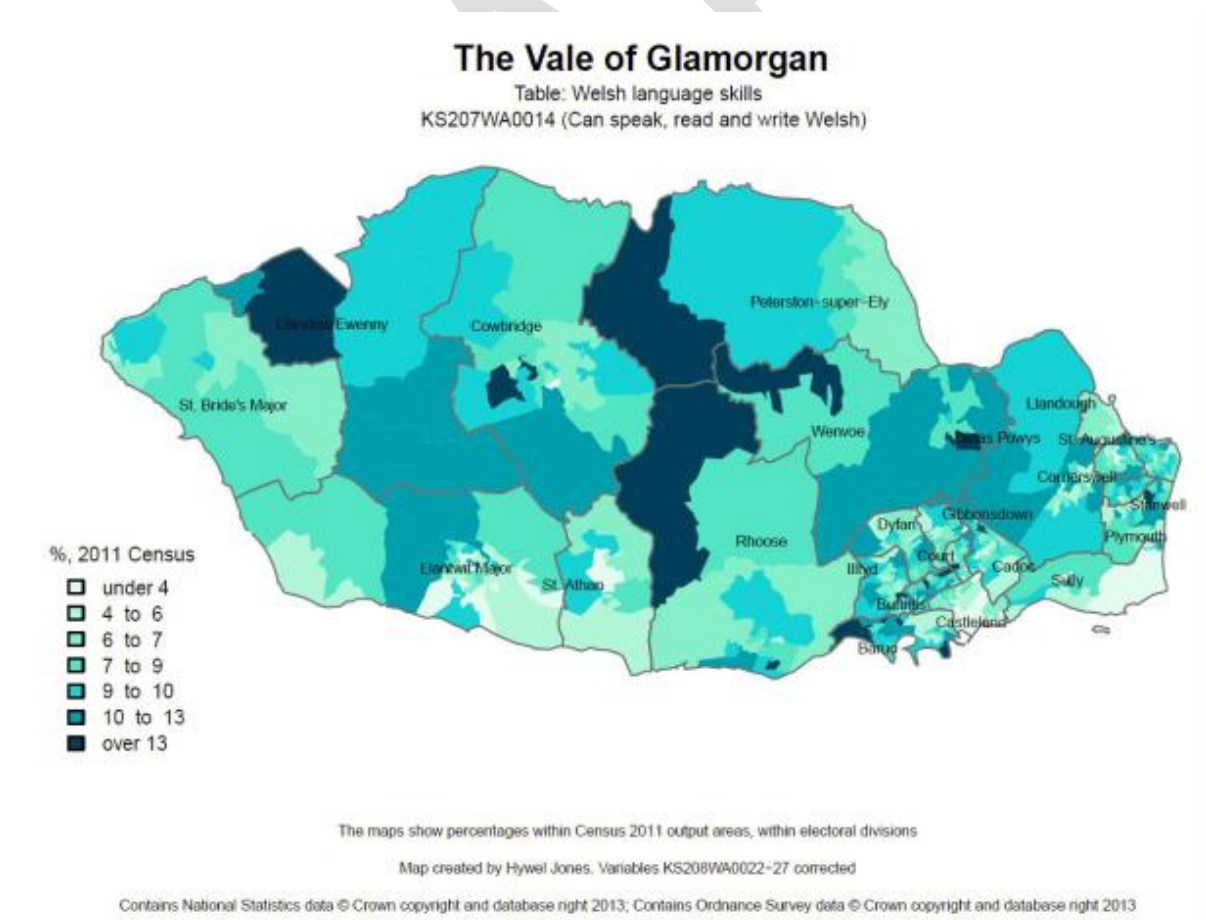

The Vale has a similar age profile of population as the Welsh average with 18.5% of the population aged 0-15, 61.1% aged 16-64 and 20.4% aged 65+. Population projections estimate that by 2036 the population aged 0-15 and aged 16-64 will decrease. The Vale also has an ageing population with the number of people aged 65+ is predicted to significantly increase and be above the Welsh average.

Currently, the percentage of the Vale's population reporting activity limitations due to a disability is one of the lowest in Wales.

2.8% of the Vale's population reported being of a non-white background and 6% of the overall population reported being non-UK born. Of these, 33% arrived after 2004. With regards to the Vale's migrant population, 59% reported being non-EU born, 14% Accession Country born and 27% EU-14 born. The Vale had a negative internal migration balance in 2015, internal migration refers to people moving between UK countries. In the Vale more people moved to other UK countries than moved into the area from UK countries.

With regards to the Welsh language only 3% of residents report being able to speak Welsh fluently, with 87% not being able to speak any Welsh. The remaining 10% had varying degrees of Welsh language speaking ability. Of the small proportion of the population who can speak Welsh, 25% reported using Welsh on a daily basis.

The map below shows how the level of Welsh language skills varies across the Vale of Glamorgan.

## **Inequalities**

Overall the Vale of Glamorgan is comparatively wealthy and many residents enjoy a high standard of living in a safe and attractive environment. However there are areas in the Vale of Glamorgan which suffer from significant disadvantage, including high unemployment, reduced healthy life expectancy, low educational achievement and higher levels of crime. In 2014 the then Vale Local Service Board which preceded the Public Services Board commissioned a report<sup>1</sup> from the Local Government Data Unit regarding poverty in the Vale. This report concluded that what stands out most is “the distinct geographic divide between the most deprived areas in the Vale of Glamorgan, such as those in the south east of the county, and the least deprived such as those in the north and west”. There are now five food bank centres in the Vale of Glamorgan, 2 in Barry, 1 in Dinas Powys, 1 in Llantwit Major and 1 in St Athan.

## **An Ageing Population**

Changing demographics in the Vale of Glamorgan will significantly affect the demand for public services. The trend of an ageing population across Wales is particularly challenging in the Vale of Glamorgan, where it is predicted that the number of over 65s will increase by 46% by 2035. It is also predicted that the number of over 85s in the Vale of Glamorgan will increase by 130% in the same period. This will clearly place further demand on social care services and other services such as housing. When coupled with a decrease in the population aged 18-64 by 6.7% over the same time period, this will place significant demands on public services and the funding available to deliver them.

## **Key Statistics**

A range of additional key statistics for the Vale of Glamorgan are outlined in the following table, a comparison of these statistics for each of our community areas is also available within the relevant community area profile. More information about these areas can be found in the next section.

Note – Data in the following table is based on 2011 Census figures unless otherwise stated. Therefore these figures could differ slightly from those published elsewhere.

% Households with No Central Heating	1.7	2.3

## **Our Communities**

For the purposes of this Well-being Assessment and to assist us to gain a better understanding of the well-being of communities in the Vale of Glamorgan we have considered the area as a whole and also split the county in to three areas.

The three areas are Barry, the Western Vale and the Eastern Vale and the parts of the Vale that have been included in the three different areas are shown below and are listed by electoral ward.

<b><u>Western Vale</u></b>	<b><u>Barry</u></b>	<b><u>Eastern Vale</u></b>
St. Bride's Major	Dyfan	Dinas Powys
Llandow/Ewenny	Gibbonsdown	Sully
Llantwit Major	Court	Llandough
Cowbridge	Cadoc	Cornerswell
Peterston-Super-Ely	Illtyd	St. Augustine's
St Athan	Buttrills	Stanwell
Rhooose	Baruc	Plymouth
Wenvoe	Castleland	

The areas reflect how services are currently planned and delivered by partner organisations within the PSB. Where information is available at a smaller geographical area then this will be included in the well-being assessment.

A wide range of regeneration and community projects across the Vale are helping to improve people's quality of life and to attract investment. This includes the regeneration of urban areas such as Barry and also Creative Rural Communities projects, which work to improve the sustainability of our rural communities and economy. These projects will contribute to the long term well-being of residents now and in the future. The Vale of Glamorgan has many assets in the form of its communities, an active third sector, businesses and the natural environment.

## **Community Area Characteristics**

Community profile reports will be produced for each area exploring the characteristics of the area in more detail and providing an overview of the assessment's key findings for that area. It is important to recognise the differences that exist within the Vale of Glamorgan and both between and within community areas.

A useful measure of variation in the characteristics of a population is the Census 2011 Output Area Classification dataset. This has been developed by the University College London (UCL) in partnership with the Office for National Statistics (ONS) and aims to group together geographic areas according to key characteristics common to the population in that grouping (called clusters) that are derived from Census 2011 data.

60 variables were used to construct the classifications under the headings of 'Demographic Structure', 'Household Composition', 'Housing', 'Socio-economic' and 'Employment'.

These classifications are produced on Output Area (OA) geographies, and therefore contained around 150 households on Census day (27 March 2011). These are broken down into eight 'supergroups', 26 'groups' and 76 'subgroups'.

The below map considers the eight main supergroups (Rural Residents, Cosmopolitans, Ethnicity Central, Multicultural Metropolitans, Urbanites, Suburbanites, Constrained City Dwellers and Hard-pressed Living) and these are mapped at LSOA level as below.

To demonstrate the disparity between the relatively dense areas of Barry, Penarth and Llantwit Major compared to the remainder of the Vale of Glamorgan the classification is limited to areas where there are buildings present.

### **Eastern Vale**

There is a clear north/south divide in Penarth between 'Constrained City Dwellers' and 'Suburbanites'. The former tending to have higher levels of unemployment, lower levels of qualification, and a higher proportion of people whose day-to-day activities are limited than nationally. The latter being more likely to have individuals with a higher-level of qualification than the national average and lower unemployment levels.

### **Barry**

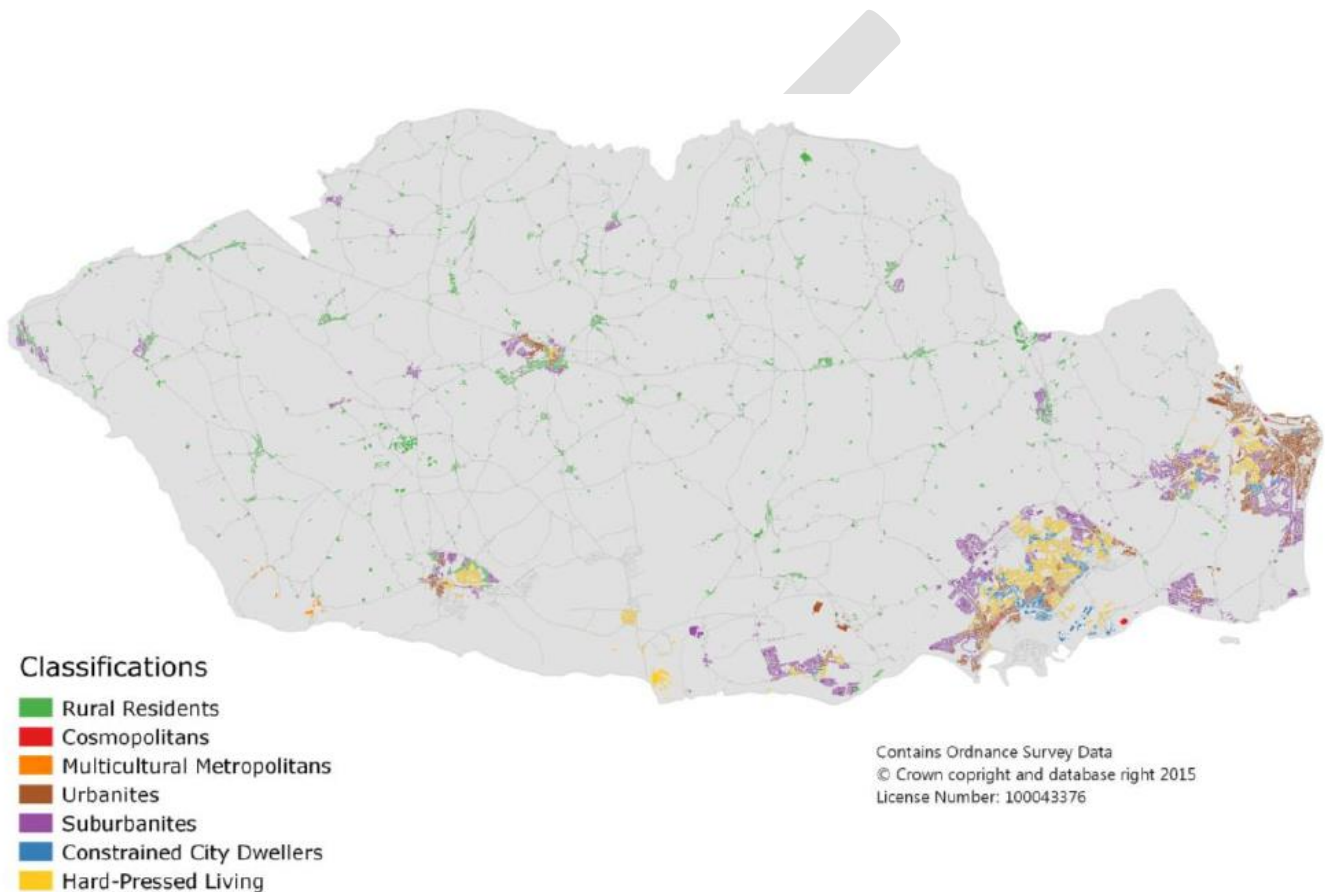

In Barry, there are a number of OAs classed as 'Hard-pressed Living'. Within this classification rates of unemployment are more likely to be above the national average; households are more likely to live in socially rented accommodation; and there is likely to be a smaller percentage of people with higher-level qualifications.

## Western Vale

Within the Western Vale, there are areas classed as 'Hard-pressed Living' located around St. Athan and Llantwit Major. Other areas in the Western Vale are generally either classed as 'Rural Residents' or 'Suburbanites'.

Pen portraits of each of the groups used within the classifications are available

The Welsh Index of Multiple Deprivation 2014 can also be used to help illustrate differences within our communities. The following map shows deprivation levels across the Vale of Glamorgan and highlights the differences that exist in the area. Four of the Vale's LSOAs – Gibbonsdown 2, Court 3, Cadoc 4 and Castleland 1 are ranked within the top 10% most deprived LSOAs in Wales and are all located in the Barry area. The inequalities that exist throughout the Vale in relation to a range of indicators are highlighted throughout this assessment and demonstrate the differences across our areas.

The following map shows levels of deprivation across the Vale of Glamorgan according to the Welsh Index of Multiple Deprivation 2014 (WIMD) by deprivation fifth. However it is important to note that an area itself is not deprived: it is the circumstances and lifestyles of the people living there that affect its deprivation rank and it is important to remember that not everyone living in a deprived area is deprived—and that not all deprived people live in deprived areas. This underpins a number of the key findings that have emerged from our assessment.

**Local authority fifths of deprivation, Vale of Glamorgan**  
Lower Super Output Area

Produced by Public Health Wales Observatory, using WIMD 2014 (WG)  
© Crown Copyright and database right 2016, Ordnance Survey 100044810

It is also important to note that the WIMD can be analysed by the different domains that comprise the index – Income, Employment, Health, Education, Access to Services, Community Safety, Physical Environment and Housing. This again shows differences across the Vale of Glamorgan. For example, when analysing the 'Access to Services' domain, four of the Vale's LSOAs are within Wales' top 10% most deprived and all are located in the Western Vale, seven LSOAs are also within the top 11-20% most deprived in Wales and six of these are again located in the Western Vale demonstrating the rural nature of this community area.

## **Life in the Vale**

As part of the development of the Well-being Assessment we have undertaken extensive engagement under the 'Let's Talk' banner and have also looked at previous engagement to gain a better understanding of the communities we serve.

Results of the 2014/15 Annual Population Survey showed that 77.4% of Vale residents rated their life satisfaction as 7 or above which is below the UK average of 80% and slightly below the Welsh average of 78.36.

The results of the National Survey 2014/15 showed that 81% of Vale residents felt a sense of belonging to their local area. This placed the Vale joint 16<sup>th</sup> from top so one of lowest in Wales and 2% below the Welsh average. There was also a stronger sense of belonging in rural areas than urban.

The Public Opinion Survey which was undertaken by the Council in 2014 showed that 9 in 10 residents agreed that they felt proud to live in the Vale. Older residents, aged 55+ also had a stronger feeling of pride in the area – 51% strongly agreeing that I am proud to live in the Vale of Glamorgan, compared with 36% among the under 55s.

The Let's Talk survey which was undertaken in 2016 showed that of the 784 answers to the question of satisfaction with the Vale of Glamorgan as a place to live, 325 (41.5%) of respondents answered that they were "very satisfied", while 392 (50%) of respondents answered that that they were "fairly satisfied" with the Vale of Glamorgan as a place to live. Only 26 (3.3%) respondents answered that they were "fairly dissatisfied" with the Vale of Glamorgan as a place to live and 11 (1.4%) that they were "very dissatisfied". Barry was the area where least respondents said they were very satisfied although there were no significant differences for other categories

As part of the Let's Talk engagement campaign undertaken over the summer of 2016 we asked residents three questions which have helped us to understand what people like about the Vale and what could be better.

When we asked what is good about the Vale many people gave multiple answers to the questions but highlighted the importance of the local environment and access to the beach, countryside, open space and parks. The local community and neighbours were also deemed important as well as access to services and transport. Other common themes included being close to friends, a good neighbourhood and the people/local community. There were also a number of positive comments regarding public transport and access to the shops and also the range of events and activities in the area.

There were a wide variety of responses to the question, what could be better but the most common responses related to:

- Parks and local facilities

- Health services in particular access to GPs
- Crime and anti-social behaviour
- Better street lighting, condition of the roads and road safety
- Improved public transport in particular frequency of trains and buses in rural areas and for elderly people
- Information about events and activities
- Litter/dog mess and cleanliness
- Activities and facilities for children and young people including opportunities for play and sport

### **What we learnt through our engagement**

Extensive engagement has been undertaken to inform the wellbeing assessment and more information is available in the Engagement Report which forms part of the assessment. In the Let's Talk survey there were 784 answers to the question of satisfaction with the Vale of Glamorgan as a place to live, of respondents answered that they were either "very" or "fairly satisfied" with the Vale. 325 (41.5%) of respondents answered that they were "very satisfied", while 392 (50%) of respondents answered that that they were "fairly satisfied" with the Vale of Glamorgan as a place to live. Only 26 (3.3%) respondents answered that they were "fairly dissatisfied" with the Vale of Glamorgan as a place to live and 11 (1.4%) that they were "very dissatisfied

When asked about their local area, respondents answered that they were either "fairly" or "very" satisfied. Of the 787 answers to this question, the highest proportion 451 (53.5%) of respondents answered that they were "fairly satisfied", while 268 (34.1%) that they were "very satisfied". In comparison, only 53 (6.7%) of respondents answered that they were "fairly dissatisfied" and 28 (3.6%) that they were "very dissatisfied" with their local area. 17 (2.2%) of respondents answered that they were neither satisfied or dissatisfied with their local area.

When asked the extent to which respondents belonged to their communities, of the 788 answers given, the highest proportion, 371 (47.1%) of respondents answered that they "tend to agree" that they belonged to their community. 175 (22.2%) of respondents answered that they "neither" belonged nor did not belong to their local communities. Of respondents, 76 (9.6%) answered that they "tend to disagree" that they belonged to their communities, and 16 (2%) answered that they "strongly disagree" that they belonged to their communities.

From the answers given to this question it can be suggested that a large proportion of the respondents to the survey were positive in their analysis of whether they belonged to their communities. Very few respondents noted that they disagreed that they belonged to their communities.

When divided by the three different areas of the Vale of Glamorgan there is very little disparity between the areas. Only in Barry was there a significant proportion who disagreed that they belonged to their area. In Barry, 30 (13.2%) “tend to disagree” and 14 (6.1%) “strongly disagree” that they belonged to their area.

We also engaged with people at a series of events and asked them what is good about the area where they live, what could be better and what services contribute to their health and wellbeing. The following illustrate the range of responses.

'more youth activities'  
 'scared to use park when adult and teens there'  
 'public transport'  
 'more shops and a cinema'  
 'safer cycling'  
 'better wi-fi'  
 'more local services'  
 'road and pavement maintenance'  
 'anti-social behaviour'  
 'more bins'  
 'police presence'  
 'dangerous roads'  
 'local facilities'  
 'parks'  
 'street lighting'  
 'better equipment for young people'  
 'somewhere for the children to play'  
 'parking'  
 'more for young people to do'  
 'noisy'

Question 2  
 What could be better?

## **Our assets and facilities**

It's important to recognise the many assets we already have in the Vale of Glamorgan and how we can work with local communities to utilise and maximise what we have to improve individual and community well-being. The range of facilities, services and projects which all help to make the Vale of Glamorgan a good place to live, work and visit and contribute to our well-being include:

### *Social*

- 16 GP practices across the Vale (some of which have more than one surgery) - although residents told us they want better access to appointments
- University Hospital Llandough and Barry Community Hospital which offer a variety of primary and secondary care services including a new adult mental health unit at Llandough.
- There are four Police stations in the Vale of Glamorgan, Penarth, Cowbridge, Barry and Llantwit Major but only the one in Barry is open to the public. The Safer Vale partnership team as well as probation officers and Victim Support are also based at the Barry Police station.
- Four fire stations in the area Barry, Penarth, Llantwit Major and Cowbridge
- 22 Council run community centres - residents have highlighted the importance of being able to take part in local activities and groups.
- Four Town Councils and twenty two community councils. These councils are responsible for specific services and facilities and are an important tier of local democracy and a link to the local community.
- Volunteers play an important role in our communities. Glamorgan Voluntary Services (GVS) is an independent charity and has a flourishing membership of voluntary and community organisations.

### *Economic*

- 57 Schools including 7 welsh medium schools
- Cardiff International Airport
- The Cardiff Airport and St Athan Enterprise Zone
- Cardiff and Vale College has two sites in the Vale of Glamorgan, Colcot Road in Barry which provides a wide range of courses and the International Centre for Aerospace Training (ICAT) in Rhoose.
- Four town centres, Barry, Cowbridge, Llantwit Major and Penarth. They all have a distinct character and provide local amenities and opportunities for socialising

### *Cultural*

- Five full time libraries and four part time libraries including three that are community run.
- Six Leisure and Sports Centres located in Barry, Penarth, Llantwit Major and Cowbridge - people of all ages highlighted the importance of local facilities and of physical activity for their health and well-being.
- A range of arts and entertainment venues that includes galleries, museums and theatres, including the HeARTh Gallery at University Hospital Llandough.
- Two Women's Trails which celebrate the lives of remarkable and significant women who lived in the area.
- The award winning Penarth Pier and Dyffryn House

### *Environmental*

- 27 sites of Special Scientific Interest (SSSIs), 1 Special Protection Area, 3 Special Areas of Conservation and 1 RAMSAR site.
- 740 listed buildings over 100 Scheduled Ancient Monuments, 39 Conservation Areas, 18 areas included in the Register of Landscapes of Historic Parks and Gardens and 2 areas on the Register of Landscapes of Historic Interest in Wales.
- Nineteen parks, seven of which have green flag status which is a mark of excellence, demonstrating good amenities and community involvement in parks.
- Two Country Parks, Porthkerry Park on the outskirts of Barry and Cosmeston Lakes on the outskirts of Penarth. The parks offer over 200 hectares of woodlands, meadows and beaches.
- 10 Council run allotment sites (8 in Barry and 2 in the Western Vale) these can be used to grow vegetables or flowers and even to keep hens.
- The Glamorgan Heritage Coast stretches for 14 miles, from Aberthaw to Porthcawl and provides opportunities for walkers, cyclists or anyone with a love of the countryside.
- The Vale is blessed with a diverse range of beaches including the resort of Barry Island which has recently undergone significant regeneration and the more rugged attractions of Southerndown. Two Vale beaches have blue flag status and four have received seaside awards.

## **Our Projects/Strategies**

There are a range of strategies, programmes and partnerships already active in the Vale that are working to improve social, economic, environmental and cultural well-being and contribute to the seven national wellbeing goals. Some of these are Vale wide whilst others have a specific geographic/community focus.

### **Vale wide initiatives**

***The Vale Public Services Board (PSB) 'Our Vale'*** was established by the Well-being of Future Generations Wales Act 2015. The Board brings a range of partners together to embed and work towards the seven national Well-being goals as outlined by the Act. Through this work the PSB will improve the economic, environmental, cultural and social well-being of the Vale of Glamorgan.

[http://www.valeofglamorgan.gov.uk/en/our\\_council/Public-services-board/Public-Services-Board.aspx](http://www.valeofglamorgan.gov.uk/en/our_council/Public-services-board/Public-Services-Board.aspx)

***The Cardiff and Vale Integrated Health and Social Care Partnership*** ensures that services and resources are used in the most effective and efficient way to improve the health and social care outcomes for the residents of Cardiff and the Vale of Glamorgan.

<http://www.cardiffandvaleuhb.wales.nhs.uk/integrated-health-and-social-care/>

***Safer Vale*** is a multi-agency partnership which is responsible for ensuring that crime and disorder is low and that residents and visitors feel safe within the Vale of Glamorgan.

<http://safervale.co.uk/>

***The Children and Young People's Board***; acts as the lead partnership for children and young people delivering the United Nations Convention on the Rights of the Child through the Welsh Government's 7 Core Aims.

[http://www.valeofglamorgan.gov.uk/en/living/social\\_care/children\\_and\\_young\\_people/cyp\\_team/cypp\\_team.aspx](http://www.valeofglamorgan.gov.uk/en/living/social_care/children_and_young_people/cyp_team/cypp_team.aspx)

***Cardiff Capital Region/City Deal*** involves ten local authorities in a regional approach to innovation, and digital networks, improving skills and training, business support and investment, housing and land use and transport and connectivity. There is a £1.2bn fund to grow GVA by investing in the economic fabric of the region.

<http://cardiffcapitalregioncitydeal.wales/>

***The Vale of Glamorgan Local Development Plan*** sets out the vision, objectives, strategy and policies for managing growth and development in the Vale of Glamorgan whilst protecting and enhancing the environment.

[http://www.valeofglamorgan.gov.uk/en/living/planning\\_and\\_building\\_control/planning\\_policy/local\\_development\\_plan/local\\_development\\_plan.aspx](http://www.valeofglamorgan.gov.uk/en/living/planning_and_building_control/planning_policy/local_development_plan/local_development_plan.aspx)

**The Vale of Glamorgan Town Centres Framework** aims to assist and stimulate economic prosperity and to protect and enhance the centres' future vitality and viability whilst seeking to maintain their inherent character and distinction.

<http://www.valeofglamorgan.gov.uk/en/working/regeneration/Town-Centres/Town-Centres.aspx>

**The Vale Youth Forum (VYF)** is a registered charity and is the youth council for the county. The VYF is a group of young people aged 11-25 who represent their schools, youth clubs and youth organisations. The Forum links in with national organisations to ensure the voices of young people are taken into account at higher levels of decision making.

<http://www.valeofglamorgan.gov.uk/Documents/Living/Youth%20Service/Youth-Cabinet/VYF-Newsletter-Jan-March16.pdf>

**The Vale 50+ Strategy Forum** works both locally and nationally to support the diverse needs of over fifties in the Vale of Glamorgan. They respond to consultations, support health and community safety campaigns and organise a number of events throughout the year.

<http://valeopf.webplus.net/>

### **Area Specific Initiatives**

**Communities First** is the Welsh Government's Community-Focussed 'Tackling Poverty' Programme. The programme supports the most disadvantaged people in the most deprived areas of Wales with the aim of contributing to alleviating persistent poverty. In Barry, it operates in parts of the following wards: Buttrills, Cadoc, Castleland, Court and Gibbonsdown. Funding for 2016/17 is £580,912.02 however the future of the programme is currently uncertain.

<http://www.valeofglamorgan.gov.uk/en/working/regeneration/Communities-First/Communities-First.aspx>

**Flying Start** is funded by Welsh Government and aims to make a decisive difference to the life chances of children aged under 4 in the areas which it runs. It includes four core elements –free quality childcare, parenting support, intensive health visitor support, and support for early literacy. The budget for 2016-17 is £2,562,000. The programme is targeted at families in specific post code areas of Barry in the following wards: Buttrills, Castleland, Cadoc, Court, Illtyd and Gibbonsdown.

[http://www.valeofglamorgan.gov.uk/en/living/social\\_care/children\\_and\\_young\\_people/flying\\_start.aspx](http://www.valeofglamorgan.gov.uk/en/living/social_care/children_and_young_people/flying_start.aspx)

**Creative Rural Communities (CRC)** was established in 2004 and is a rural regeneration initiative. Work is undertaken in partnership with communities to develop innovative projects and ideas that will create long term social and economic benefits for the Vale of Glamorgan. The aim is to empower individuals to become actively involved in the future of their communities. The programme is overseen by a Local Action Group (LAG), membership of this group comes from the Private, Public, Voluntary and Community Sectors of the Vale.

[http://www.valeofglamorgan.gov.uk/en/working/regeneration/rural\\_regeneration/rural\\_regeneration.aspx](http://www.valeofglamorgan.gov.uk/en/working/regeneration/rural_regeneration/rural_regeneration.aspx)

**Community Mapping** has been piloted in the Rural Vale in St Athan, Wenvoe and Rhoose. It is a way of bringing a community together to focus on the positives of the area, recognising that everyone has something to offer and an attempt to look at solutions to particular issues. The process has involved bringing people together to talk about the social and physical assets within the community and what matters to the community.

[http://www.valeofglamorgan.gov.uk/en/working/regeneration/rural\\_regeneration/Community-Mapping/Community-Mapping-Pilot.aspx](http://www.valeofglamorgan.gov.uk/en/working/regeneration/rural_regeneration/Community-Mapping/Community-Mapping-Pilot.aspx)

**The Barry Regeneration Advisory Group** brings together knowledge and experience in the field of regeneration to promote good practice, equality and innovation and to provide independent advice and recommendations. Barry has undergone significant change in recent years as a result of regeneration activity ranging, amongst others, from improvements to Holton Road and the renewal of housing in Castleland to the on-going regeneration of Barry Island. Alongside this the commencement of the next phase of redevelopment of the former Dock area which will bring with it a new school, housing, retailing and connecting road to the island indicates a continued momentum.

<http://www.valeofglamorgan.gov.uk/en/working/regeneration/Barry-Regeneration-Advisory-Group.aspx>

**Vibrant and Viable Places Programme of Investment 2014 – 2017** is a Welsh Government programme which has invested £1 million in Barry over 3 years. Funding from the Tackling Poverty Fund has helped deliver regeneration projects in Barry. The following projects are being supported by public, private and third sector investment:

- Glamorgan Voluntary Services, Third Sector Hub
- [George Street Play Area Improvements](#)
- [Holton Road Grant Programme](#)
- Main Street Grant Programme
- Victoria Gardens Improvements
- Fuel Poverty Reduction Measures
- [Dryden Terrace and Meggitt Road Play Area Improvements](#)
- [Hatch Quarry Play Area Improvements](#)
- YMCA Barry, Third Sector Youth Partnership and Community Internet Café

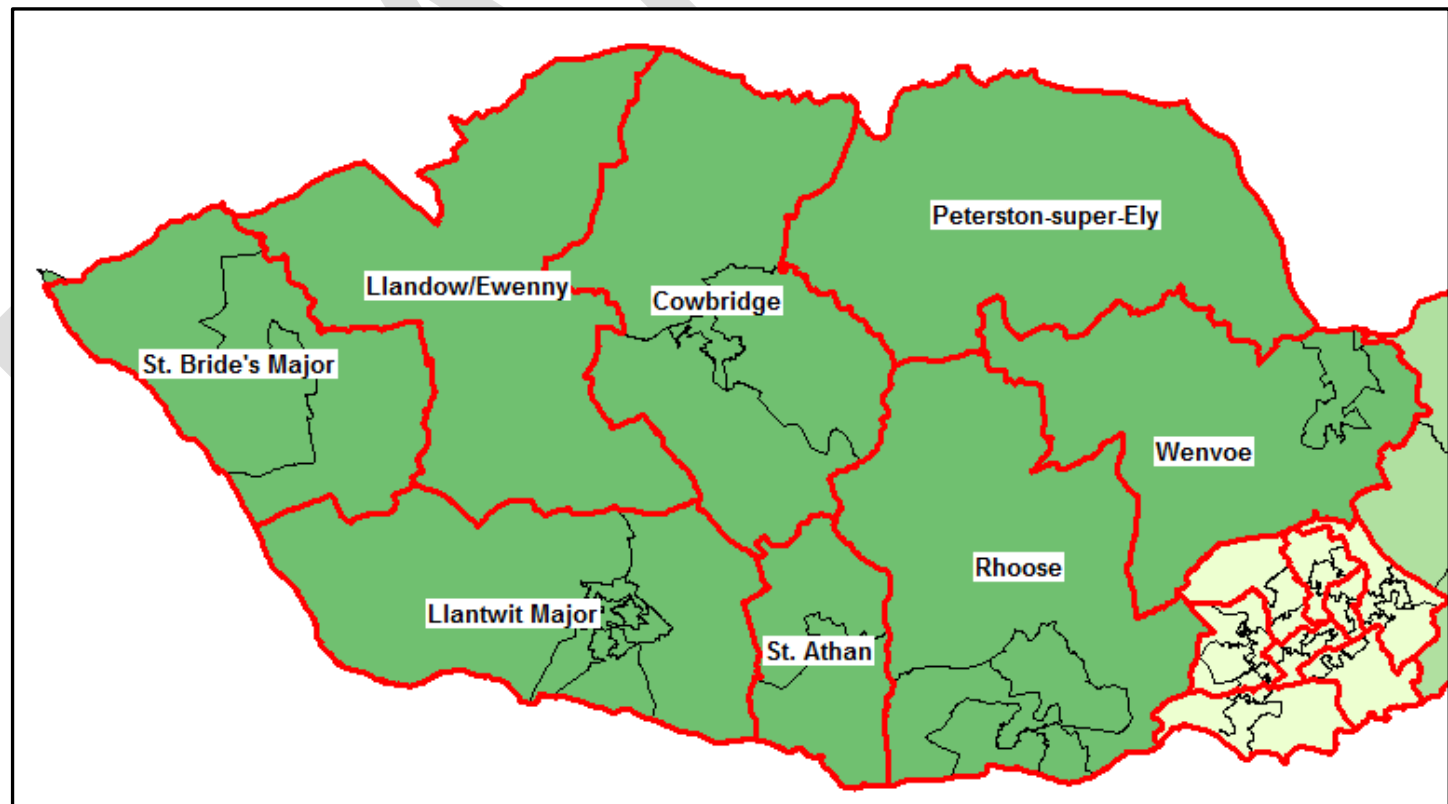

## Community Profile – Western Vale

Note: Key findings from the assessment for this area will be added prior to final publication

### Introduction

For the purposes of the Well-being Assessment and to gain a better understanding of our communities in the Vale of Glamorgan we have divided the area in to three communities, Barry, Western Vale and Eastern Vale. These community profiles have been developed to complement the Vale of Glamorgan profile and we will continue to enhance these profiles as part of our ongoing engagement through the Public Services Board. The profile brings together a range of information about the area including population data, details of projects and assets within the community, it is not intended to be a directory of services but provides some key information about the area. This community profile focuses on the Western Vale as detailed in the map below and the area is made up of the following wards:

- St. Bride's Major
- Llandow/Ewenny
- Llantwit Major
- Cowbridge
- Peterston-Super-Ely
- St.Athan
- Rhoose
- Wenvoe

## **Population data and key statistics for the area**

Note – Data in the following table is based on 2011 Census figures unless otherwise stated. Therefore these figures could differ slightly from those published elsewhere.

The following table provides a comparison **between** our community areas for a range of key statistics.

	Barry	Eastern Vale	Western Vale	Vale of Glamorgan	Wales
<b>Demography and Dynamics</b>					
Resident Population (June 2015)	52,200	36,800	38,500	127,500	3,099,086
Area (Hectares)	1,845	3,542	27,699	33,095	2,073,511
Population Density (number of persons per hectare)	27.8	10.3	1.4	3.8	1.5
% Population Aged 0-15	20.5	17.4	18	18.9	18.2
% Population Aged 16-24	11.2	9.2	10.8	10.5	12.2
% Population Aged 16-64	64.3	61.4	62.4	62.9	63.5
% Population Aged 65+	15.2	21.2	19.6	18.3	18.4
% Population Aged 3+ Able to Speak Welsh	11.1	10.5	10.8	10.8	19
% Population Whose Day-to-Day Activities are Limited	22.4	20.1	17.7	20.3	22.7
<b>Employment</b>					
% JSA Claimants	3.6	1	1.4	2.2	2.8
% Population Employed in Professional Occupations	12	24.6	20.3	18.3	15.8

	Barry	Eastern Vale	Western Vale	Vale of Glamorgan	Wales
<b>Tenure (Percentages may not tally to 100% as other tenure options are available)</b>					
Number of Households	22,167	15,833	15,505	53,505	1,302,676
% Owned Outright	26.9	40.1	42.9	35.8	33.4
% Owned with Mortgage/Loan	36.9	36.2	37.3	36.8	32
% Social Rented - Local Authority	11.5	4.7	4.7	7.5	9.9
% Social Rented - Other	7.1	3.8	1	4.4	6.7
% Private Rented	14.8	12.2	10	12.7	12.7
<b>Household Composition</b>					
% Lone Pensioner Households	12.2	15.3	12.4	13.2	13.7
% Lone Parent Households	14.5	9.4	8.5	7.5	7.5
<b>Household Facilities</b>					
% Households No Access to a Car or Van	27	17.4	10.6	19.4	22.9
% Households with No Central Heating	1.9	2	1.1	1.7	2.3

In addition to differences between our communities, differences also exist **within** them. The Welsh Index of Multiple Deprivation 2014 can be used to demonstrate this. The following table shows the ranks of each LSOA that comprises the Barry Community area across all of the domains that comprise the index.

**Note: This data will be mapped prior to final publication in April 2017**

DRAFT

**WIMD 2014 -Rank of LSOA, where 1 is the Most Deprived LSOA, and 1909 is the Least Deprived LSOA.**

LSOA Name (Eng)	WIMD 2014	Income	Employment	Health	Education	Access to Services	Community Safety	Physical Environment	Housing
Cowbridge 1	1649	1471	1421	1380	1750	1108	909	923	1728
Cowbridge 2	1770	1820	1902	1903	1885	334	1884	1218	1871
Cowbridge 3	1727	1756	1714	1560	1869	599	1143	949	1850

Wenvoe 2	1689	1673	1703	1811	1558	744	922	713	1454

## **The local area**

Almost every area of the Vale of Glamorgan has its own community council, in the Western Vale there are two Town Councils, Llantwit Major and Cowbridge and Llanblethian and 19 community councils. There are a range of community and cultural facilities in the area including St Donats Art Centre, Dyffryn House and the Cowbridge Physic Garden. The areas includes the market towns of Cowbridge and Llantwit Major, one of the most important early Christian settlement in Wales; the area exudes history including Iron Age hill forts, fine Tudor buildings, a Roman villa and a medieval grange.

The coast creates unique coastal habitats such as sand dunes, cliffs, maritime grassland, and rocky and sandy beaches; this unique environment is protected through the Heritage coast, which provides opportunities for walking and other outdoor activities for residents and visitors.

Cardiff and Vale College is one of the largest colleges in the country and the International Centre for Aerospace Training (ICAT) is located in Rhooose close to Cardiff Airport and within the Cardiff Airport and St Athan Enterprise Zone.

Other facilities and amenities in the area include:

- 3 GP practices
- 2 Fire Stations
- 5 Libraries
- 6 Community Centres
- 5 Parks
- 20 schools
- 2 Allotment sites
- 2 foodbanks

## **Key Features/Projects in the area**

- **Cardiff Airport and St Athan Enterprise Zone** is located in an area with a strong aerospace and defence heritage. There are three distinct sites in the Zone offering a range of facilities and accommodation. Together with adjoining development land, the site offers the opportunity for aerospace-related investment, while Cardiff Airport is committed to continuing to grow passenger numbers and expand routes. The St Athan Aerospace Business Park is home to workshops and hangars which make up a significant part of Wales' 20% share of the UK's Aircraft Maintenance Repair Overhaul (MRO) market. In February 2016, the St Athan site beat off competition from more than 20 worldwide locations to secure Aston Martin as its next resident. The luxury car manufacturer will produce the new Aston Martin DBX at this site and full production is expected to begin in 2020 with the creation of 750 new jobs and a further 1000 in the supply chain. At the Gateway Development Zone, next to the airport, there is development land and early plans to develop an Airport City comprising high quality offices as well as education, training and leisure facilities.
- ***Creative Rural Communities (CRC)*** was established in 2004 and is a rural regeneration initiative which is funded through the Welsh Government Rural Communities – Rural Development Programme 2014-2020, the European Agricultural Fund for Rural Development and the Vale of Glamorgan Council. Work is undertaken in partnership with communities to develop innovative projects and ideas that will create long term social and economic benefits for the Vale of Glamorgan. The aim is to empower individuals to become actively involved in the future of their communities. The programme is overseen by a Local Action Group (LAG), membership of this group comes from the Private, Public, Voluntary and Community Sectors of the Vale. The programme covers Dinas Powys and Sully.
- ***Community Mapping*** has been piloted in the Rural Vale in St Athan, Wenvoe and Rhoose. It is a way of bringing a community together to focus on the positives of the area, recognising that everyone has something to offer and an attempt to look at solutions to particular issues. The process has involved bringing people together to talk about the social and physical assets within the community and what matters to the community.

## What we learnt through our engagement

The graph below shows that respondents to the Let's Talk survey who live in the Western Vale tend to be very or fairly satisfied with the Vale of Glamorgan as a place to live.

The majority of respondents across the three areas of the Vale of Glamorgan are either “very” or “fairly” satisfied with the Vale of Glamorgan as a place to live. Respondents to the survey in the Western Vale recorded a higher rate of dissatisfaction with “access to public transport” than the other areas of the Vale of Glamorgan and transport was a common issue across all areas and all methods of engagement.

We also engaged with local communities at a range of events including the Vale Show in Fonmon and a Family Funday in St Athan; as part of the engagement we asked people what they liked about the area, what could be better and what services are important to health and wellbeing. Those people who answered these questions on a postcard also provided their postcode and 46 responses can be particularly attributed to residents in the Western Vale.

The most common response from residents of the Western Vale to the question what's good about where you live were activities and facilities, youth services, a sense of community and the countryside and coast. The most common issues raised in response to what could be better were activities for children and young people, public transport and cleanliness including dogs mess. The responses from the Western Vale to the question about what is important for health and well-being indicated that the most common issues were again access to leisure facilities, transport, being part of a group or the community and access to the GP and health services. Many of the answers given to these questions were consistent across the Vale of Glamorgan and more information is available in the separate 'Let's Talk about the Vale' Engagement report.

As we continue to engage with the local community as part of the development of our well-being objectives and plan we will be keen to explore in more detail what people value about their local area and what would improve their social, economic, environmental and cultural well-being.
